## **REQUIRED PEDIATRIC ASSESSMENTS**

Because this drug product for this indication has an orphan drug designation, you are exempt from this requirement.

# **SENTINEL/ARIA NOTIFICATION**

The Food and Drug Administration Amendments Act of 2007 (FDAAA) required FDA to establish a national electronic system to monitor the safety of FDA-regulated medical products. In fulfillment of this mandate, FDA established the Sentinel System, which enables FDA to proactively monitor drug safety using electronic health data from multiple data sources that contribute to the Sentinel Distributed Database.

FDA plans to evaluate the use of dehydrated alcohol in the Sentinel System as part of the implementation of section 505(o) of the FDCA. We have determined that the new pharmacovigilance system, Sentinel's Active Risk Identification and Analysis (ARIA) System, established under section 505(k)(3) of the FDCA, is sufficient to assess the following serious risks: heart failure, ventricular fibrillation, atrioventricular block with and without permanent pacemaker insertion, subsequent septal myectomy, and death.

The ARIA safety assessment will be posted to the Sentinel website at this location: <a href="https://www.sentinelinitiative.org">https://www.sentinelinitiative.org</a>. Once there is sufficient product uptake to support an analysis, an analysis plan will be posted online. After the analysis is complete, FDA will also post the results on the Sentinel website. FDA will notify you prior to posting the analysis plan and prior to posting the results.
