Dear Ms. Abraham:

Please refer to your Supplemental New Drug Application (sNDA) dated and received October 9, 2018, and your amendments, submitted under section 505(b) of the Federal Food, Drug, and Cosmetic Act (FDCA) for Pepcid Complete[®] (famotidine 10 mg, calcium carbonate 800 mg, magnesium hydroxide 165 mg) chewable tablet.

This “changes being effected” supplemental new drug application provides for “**Ask a doctor or pharmacist before use if you are** taking a prescription drug. Acid reducers may interact with certain prescription drugs.” This supplemental new drug application also provides for a modification of the Drug Facts label to include “**Ask a doctor before use if you have**” subheading, add “[bullet] kidney disease” to the bottom of the list.” These warnings are in response to the Agency’s communications of June 29 and August 10, 2018. In addition, this supplement provides for the following:

1. Revision to the declaration of net quantity of contents so that it is distinct from the flavor statement (e.g., “Berry Flavor,” “Cool Mint Flavor,” or “Tropical Fruit Flavor”)
2. Addition of the strength of each active ingredient to the statement of identity

We have completed our review of this application, as amended. It is approved, effective on the date of this letter, for use as recommended in the agreed-upon labeling text and with the minor editorial revision and recommendation listed below.

1. Update the copyright date by replacing “20XX” with an actual date
2. Remove the new warning flax six months after marketing
