**SUPPLEMENT APPROVAL  
FULFILLMENT OF POSTMARKETING REQUIREMENT**

Eli Lilly and Company  
Attention: Shannon Kim  
Manager, Global Regulatory Affairs – US  
Eli Lilly and Company  
Indianapolis, IN 46285

Dear Ms. Kim:

Please refer to your Supplemental New Drug Application (sNDA) dated March 30, 2018, received March 30, 2018, and your amendments, submitted under section 505(b) of the Federal Food, Drug, and Cosmetic Act (FDCA) for Alimta (pemetrexed disodium) for injection; 500 mg and 100 mg.

This Prior Approval supplemental new drug application provides for a new indication for Alimta, in combination with pembrolizumab and platinum chemotherapy, for the initial treatment of patients with metastatic, non-squamous, non-small cell lung cancer (NSCLC) with no EGFR or ALK genomic tumor aberrations.

**APPROVAL & LABELING**

We have completed our review of this supplemental application, as amended. It is approved, effective on the date of this letter, for use as recommended in the enclosed, agreed-upon labeling text.

**WAIVER OF ½ PAGE LENGTH REQUIREMENT FOR HIGHLIGHTS**

Please note that we have previously granted a waiver of the requirements of 21 CFR 201.57(d)(8) regarding the length of Highlights of Prescribing Information.

**CONTENT OF LABELING**

As soon as possible, but no later than 14 days from the date of this letter, submit the content of labeling [21 CFR 314.50(l)] in structured product labeling (SPL) format using the FDA automated drug registration and listing system (eLIST), as described at <http://www.fda.gov/ForIndustry/DataStandards/StructuredProductLabeling/default.htm>. Content of labeling must be identical to the enclosed labeling (text for the Prescribing Information,

Patient Package Insert), with the addition of any labeling changes in pending “Changes Being Effected” (CBE) supplements, as well as annual reportable changes not included in the enclosed labeling.

Information on submitting SPL files using eList may be found in the guidance for industry titled “SPL Standard for Content of Labeling Technical Qs and As” at <http://www.fda.gov/downloads/DrugsGuidanceComplianceRegulatoryInformation/Guidances/UCM072392.pdf>.

The SPL will be accessible from publicly available labeling repositories.

Also within 14 days, amend all pending supplemental applications that include labeling changes for this NDA, including CBE supplements for which FDA has not yet issued an action letter, with the content of labeling [21 CFR 314.50(l)(1)(i)] in Microsoft Word format, that includes the changes approved in this supplemental application, as well as annual reportable changes. To facilitate review of your submission(s), provide a highlighted or marked-up copy that shows all changes, as well as a clean Microsoft Word version. The marked-up copy should provide appropriate annotations, including supplement number(s) and annual report date(s).

### **REQUIRED PEDIATRIC ASSESSMENTS**

Under the Pediatric Research Equity Act (PREA) (21 U.S.C. 355c), all applications for new active ingredients (which includes new salts and new fixed combinations), new indications, new dosage forms, new dosing regimens, or new routes of administration are required to contain an assessment of the safety and effectiveness of the product for the claimed indication in pediatric patients unless this requirement is waived, deferred, or inapplicable

We are waiving the pediatric studies requirement for this application because necessary studies are impossible or highly impracticable due to the rarity of pediatric patients with non-squamous non-small cell lung cancer (NSCLC).

### **FULFILLMENT OF POSTMARKETING REQUIREMENT(S)/COMMITMENT(S)**

We have received your submission dated March 30, 2018, containing the final report for the following postmarketing requirement listed in the June 4, 2018, approval letter for this application.

3424-1 To submit the results of a multicenter randomized trial or trials to verify and describe the clinical benefit of pemetrexed, in combination with platinum therapy and pembrolizumab, over pemetrexed-platinum therapy in patients with non-squamous non-small cell lung cancer as determined by an improvement in overall survival or a large improvement in progression-free survival that is clinically meaningful.

Trial Completion:	December 2019
Final Report Submission:	June 2021

We have reviewed your submission and conclude that the above requirement was fulfilled.
