Dear Ms. Vargo:

Please refer to your supplemental new drug application (sNDA) dated and received October 23, 2019, and your amendments, submitted under section 505(b) of the Federal Food, Drug, and Cosmetic Act (FDCA) for Braftovi (encorafenib) capsules, 50 mg and 75 mg.

This Prior Approval supplemental new drug application provides for modifications to Table 1 entitled Recommended Dose Reductions with BRAFTOVI in the DOSAGE AND ADMINISTRATION, Dose Modifications for Adverse Reactions (2.3) subsection and to the Dose Modifications for Coadministration with Strong or Moderate CYP3A4 Inhibitors (2.4) subsection, to include the addition of a new Table 3 entitled “Recommended Dose Reductions for BRAFTOVI for coadministration with Strong or Moderate CYP3A4 Inhibitors” to reflect the removal of the 50 mg capsule dosage form from DOSAGE FORM AND STRENGTHS (3) for encorafenib in combination with binimetinib for the treatment of patients with unresectable or metastatic melanoma with BRAF V600E or V600K mutation, as detected by an FDA-approved test.

Finally, the product labeling and Medication Guide was revised to include minor editorial changes.

**APPROVAL & LABELING**

We have completed our review of this application, as amended. It is approved, effective on the date of this letter, for use as recommended in the enclosed agreed-upon labeling.

**CONTENT OF LABELING**

As soon as possible, but no later than 14 days from the date of this letter, submit the content of labeling [21 CFR 314.50(l)] in structured product labeling (SPL) format using the FDA automated drug registration and listing system (eLIST), as described at
FDA.gov.¹ Content of labeling must be identical to the enclosed labeling text for the Prescribing Information and Medication Guide, with the addition of any labeling changes in pending “Changes Being Effected” (CBE) supplements, as well as annual reportable changes not included in the enclosed labeling.

Information on submitting SPL files using eList may be found in the guidance for industry SPL Standard for Content of Labeling Technical Qs and As.²

The SPL will be accessible from publicly available labeling repositories.

Also within 14 days, amend all pending supplemental applications that include labeling changes for this NDA, including CBE supplements for which FDA has not yet issued an action letter, with the content of labeling [21 CFR 314.50(l)(1)(i)] in Microsoft Word format, that includes the changes approved in this supplemental application, as well as annual reportable changes. To facilitate review of your submission(s), provide a highlighted or marked-up copy that shows all changes, as well as a clean Microsoft Word version. The marked-up copy should provide appropriate annotations, including supplement number(s) and annual report date(s).

REQUIRED PEDIATRIC ASSESSMENTS

Under the Pediatric Research Equity Act (PREA) (21 U.S.C. 355c), all applications for new active ingredients (which includes new salts and new fixed combinations), new indications, new dosage forms, new dosing regimens, or new routes of administration are required to contain an assessment of the safety and effectiveness of the product for the claimed indication in pediatric patients unless this requirement is waived, deferred, or inapplicable.

Because none of these criteria apply to your application, you are exempt from this requirement.
