Please refer to your supplemental new drug application (sNDA) dated February 26, 2020, received February 26, 2020, and your amendments, submitted under section 505(b) of the Federal Food, Drug, and Cosmetic Act (FDCA) for ProHance (gadoteridol) Injection and ProHance Multipack (gadoteridol) Injection.

This Prior Approval Supplemental new drug application provides for expansion of the central nervous system (CNS) indication to include pediatric patients younger than age 2 years, including term neonates, at a dose of 0.1 mmol/kg (0.2 mL/kg).

APPROVAL & LABELING

We have completed our review of this application, as amended. It is approved, effective on the date of this letter, for use as recommended in the enclosed agreed-upon labeling.

CONTENT OF LABELING

As soon as possible, but no later than 14 days from the date of this letter, submit the content of labeling [21 CFR 314.50(l)] in structured product labeling (SPL) format using the FDA automated drug registration and listing system (eLIST), as described at FDA.gov.¹ Content of labeling must be identical to the enclosed labeling (Prescribing Information and Medication Guide), with the addition of any labeling changes in pending “Changes Being Effected” (CBE) supplements, as well as annual reportable changes not included in the enclosed labeling.

Information on submitting SPL files using eList may be found in the guidance for industry *SPL Standard for Content of Labeling Technical Qs and As*.²

The SPL will be accessible from publicly available labeling repositories.

We note that you have fulfilled the pediatric study requirement in pediatric patients from birth, including term neonates, to 17 years of age.
