Dear Dr. Zhang:

Please refer to your supplemental new drug application (sNDA) dated and received on August 17, 2022, submitted under section 505(b) of the Federal Food, Drug, and Cosmetic Act (FDCA) for Ubrelvy (ubrogepant) tablets.

This Prior Approval sNDA provides for the following revisions to the Prescribing Information (PI):

- Addition of “serious hypersensitivity to ubrogepant or any component of UBRELVEY” to the Contraindications section (4)
- Addition of “Hypersensitivity Reactions” as a Warnings and Precautions subsection (5.1), with a subsequent addition of hypersensitivity to the Adverse Reactions/Postmarketing Experience (6.2) subsection
- Addition of the contact information for the pregnancy exposure registry in the Use in Specific Populations/Pregnancy subsection (8.1)
- Inclusion of new information concerning the drug-drug interaction evaluations that found no significant pharmacokinetic interactions between ubrogepant and erenumab, galcanezumab, and atogepant within the Clinical Pharmacology/ Pharmacokinetics subsection (12.3).

Appropriate revisions were made to the Patient Information to align with the new information added to the PI.

### **APPROVAL & LABELING**

We have completed our review of this application, as amended. It is approved, effective on the date of this letter, for use as recommended in the enclosed agreed-upon labeling.

## **CONTENT OF LABELING**

As soon as possible, but no later than 14 days from the date of this letter, submit the content of labeling [21 CFR 314.50(l)] in structured product labeling (SPL) format using the FDA automated drug registration and listing system (eLIST), as described at FDA.gov.<sup>1</sup> Content of labeling must be identical to the enclosed labeling text for the Prescribing Information and Patient Information, with the addition of any labeling changes in pending “Changes Being Effected” (CBE) supplements, as well as annual reportable changes not included in the enclosed labeling.

Information on submitting SPL files using eList may be found in the guidance for industry *SPL Standard for Content of Labeling Technical Qs and As*.<sup>2</sup>

The SPL will be accessible from publicly available labeling repositories.

Also, within 14 days, amend all pending supplemental applications that include labeling changes for this NDA, including CBE supplements for which FDA has not yet issued an action letter, with the content of labeling [21 CFR 314.50(l)(1)(i)] in Microsoft Word format, that includes the changes approved in this supplemental application, as well as annual reportable changes. To facilitate review of your submission(s), provide a highlighted or marked-up copy that shows all changes, as well as a clean Microsoft Word version. The marked-up copy should provide appropriate annotations, including supplement number(s) and annual report date(s).

## **REQUIRED PEDIATRIC ASSESSMENTS**

Under the Pediatric Research Equity Act (PREA) (21 U.S.C. 355c), all applications for new active ingredients (which includes new salts and new fixed combinations), new indications, new dosage forms, new dosing regimens, or new routes of administration are required to contain an assessment of the safety and effectiveness of the product for the claimed indication(s) in pediatric patients unless this requirement is waived, deferred, or inapplicable.

Because none of these criteria apply to your supplemental application, you are exempt from this requirement.

## **PROMOTIONAL MATERIALS**

You may request advisory comments on proposed introductory advertising and promotional labeling. For information about submitting promotional materials, see the final guidance for industry *Providing Regulatory Submissions in Electronic and Non-*
