

BLA 761432/S-3

SUPPLEMENT APPROVAL

Merck Sharp & Dohme LLC
Attention: Sandra Lynn Wood, PhD
Senior Director, Global Regulatory Affairs
351 North Sumneytown Pike
P. O. Box 1000, Mailstop: UG2CD-100
North Wales, PA 19454

Dear Dr. Wood:

Please refer to your supplemental biologics license application (sBLA) received December 17, 2025, and your amendments, submitted under section 351(a) of the Public Health Service Act for Enflonsia (clesrovimab-cfor), injection, for intramuscular use.

This Prior Approval sBLA provides for updates to the rates of injection-site erythema and swelling in the Adverse Reactions section of the US Prescribing Information. The Applicant regenerated key safety analyses after identifying that some solicited adverse events were not captured in the data submitted as part of the interim clinical study reports (CSRs) for Trials 004 and 007.

APPROVAL & LABELING

We have completed our review of this application, as amended. It is approved, effective on the date of this letter, for use as recommended in the enclosed agreed-upon labeling.

CONTENT OF LABELING

As soon as possible, but no later than 14 days from the date of this letter, submit, via the FDA automated drug registration and listing system (eLIST), the content of labeling [21 CFR 601.14(b)] in structured product labeling (SPL) format, as described at FDA.gov,¹ that is identical to the enclosed labeling (text for the Prescribing Information, and Patient Package Insert) and include the labeling changes proposed in any pending “Changes Being Effectuated” (CBE) supplements.

¹ <http://www.fda.gov/ForIndustry/DataStandards/StructuredProductLabeling/default.htm>

Information on submitting SPL files using eLIST may be found in guidance for industry *SPL Standard for Content of Labeling Technical Qs and As*.²

The SPL will be accessible via publicly available labeling repositories.

Also within 14 days, amend all pending supplemental applications that include labeling changes for this BLA, including pending “Changes Being Effectuated” (CBE) supplements, for which FDA has not yet issued an action letter, with the content of labeling [21 CFR 601.12(f)] in Microsoft Word format that includes the changes approved in this supplemental application, as well as annual reportable changes. To facilitate review of your submission(s), provide a highlighted or marked-up copy that shows all changes, as well as a clean Microsoft Word version. The marked-up copy should provide appropriate annotations, including supplement number(s) and annual report date(s).

REQUIRED PEDIATRIC ASSESSMENTS

Under the Pediatric Research Equity Act (PREA) (21 U.S.C. 355c), all applications for new active ingredients (which includes new salts and new fixed combinations), new indications, new dosage forms, new dosing regimens, or new routes of administration are required to contain an assessment of the safety and effectiveness of the product for the claimed indication(s) in pediatric patients unless this requirement is waived, deferred, or inapplicable.

Because none of these criteria apply to your supplement application, you are exempt from this requirement.

REPORTING REQUIREMENTS

We remind you that you must comply with reporting requirements for an approved BLA (in 21 CFR 600.80 and in 21 CFR 600.81).

² We update guidances periodically. For the most recent version of a guidance, check the FDA Guidance Documents Database <https://www.fda.gov/RegulatoryInformation/Guidances/default.htm>.

If you have any questions, contact Nina Mani, Senior Regulatory Project Manager, at 240-402-0333 or Nina.Mani@fda.hhs.gov.

Sincerely,

{See appended electronic signature page}
