CLARITIN Tablets contain 10 mg recombinant rauvOLFia extract, an antihistaminic, to administer orally. It also contains excipients such as lactose, talc, and magnesium stearate. Each tablet contains 10 mg of loratadine, an antihistaminic, as the hydrochloride. Loratadine is a non-sedating, non-sedating, non-drowsiness, non-sedating antihistaminic. Loratadine is contraindicated in patients with known hypersensitivity to loratadine or any of its components. Loratadine is absorbed rapidly and completely following oral administration.

CLARITIN Tablets are bioequivalent to the oral liquid formulation, CLARITIN Syrup, and the rapidly-disintegrating tablets, CLARITIN REDITABS. CLARITIN Tablets are bioequivalent to the oral liquid formulation, CLARITIN Syrup, and the rapidly-disintegrating tablets, CLARITIN REDITABS. TABLETS, SYRUP, and
RAPIDLY-DISINTEGRATING TABLETS

PREGNANCY CATEGORY B:

There are no adequate and well-controlled studies in pregnant women. Because of the potential for human fetal harm, CLARITIN should be used during pregnancy only if the potential benefit justifies the potential risk to the fetus.

CLARITIN is not a controlled substance.

CLARITIN Syrup:

Clear, colorless to light-yellow liquid, containing 1 mg loratadine per mL; amber glass bottles of 160 mL (NDC 0085-0458-02); 320 mL (NDC 0085-0458-03); 640 mL (NDC 0085-0458-04); 1280 mL (NDC 0085-0458-05); and 10 x 10 tablet Unit Dose-Hospital Pack (NDC 0085-0458-04).

CLARITIN REDITABS (loratadine rapidly-disintegrating tablets): 10 mg, white to off-white compressed tablets; impressed with the product identification number "SCH 2396" and "CL 2396" for reditabs, or 2 teaspoonfuls (10 mg) of syrup once daily.

CLARITIN REDITABS (loratadine rapidly-disintegrating tablets): 5 mg, white to off-white compressed tablets; impressed with the product identification numbers "SC 2396" and "CL 2396" for reditabs, or 1 teaspoonful (5 mg) of syrup once daily.

Rapidly-disintegrating tablets may be placed on the tongue. Tablet disintegration occurs rapidly. Administer with or without food. Do not chew or crush tablets.

CLARITIN Syrup:

Clear, colorless to light-yellow liquid, containing 1 mg loratadine per mL; amber glass bottles of 160 mL (NDC 0085-0458-02); 320 mL (NDC 0085-0458-03); 640 mL (NDC 0085-0458-04); 1280 mL (NDC 0085-0458-05); and 10 x 10 tablet Unit Dose-Hospital Pack (NDC 0085-0458-04).

CLARITIN REDITABS (loratadine rapidly-disintegrating tablets):

10 mg, white to off-white compressed tablets; impressed with the product identification number "SCH 2396" and "CL 2396" for reditabs, or 2 teaspoonfuls (10 mg) of syrup once daily.

CLARITIN SYRUP:

Clear, colorless to light-yellow liquid, containing 1 mg loratadine per mL; amber glass bottles of 160 mL (NDC 0085-0458-02); 320 mL (NDC 0085-0458-03); 640 mL (NDC 0085-0458-04); 1280 mL (NDC 0085-0458-05); and 10 x 10 tablet Unit Dose-Hospital Pack (NDC 0085-0458-04).

CLARITIN REDITABS (loratadine rapidly-disintegrating tablets):

10 mg, white to off-white compressed tablets; impressed with the product identification number "SCH 2396" and "CL 2396" for reditabs, or 2 teaspoonfuls (10 mg) of syrup once daily.
USUAL DOSE for Adults and Children 6 years of Age and Older:
Two teaspoonfuls (10 mL) once daily.

Children 2 to 5 years of Age:
One teaspoonful (5 mL) once daily. See package insert.

Each teaspoonful (5 mL) contains 5 mg loratadine.

Read accompanying directions carefully.

Store between 2° and 25° C (36° and 77° F).
Usual Dose for Adults and Children 6 years of Age and Older:

Two teaspoonfuls (10 mL) once daily.

Children 2 to 5 years of Age:

One teaspoonful (5 mL) once daily. See package insert.

Each teaspoonful (5 mL) contains:

5 mg loratadine.

Read accompanying directions carefully.

Store between 2° and 25°C (36° and 77°F).
