How To Use The DROP-TAINER® Bottle

The DROP-TAINER® bottle is designed to assure the delivery of a precise dose of medication. Before using your DROP-TAINER bottle, read the complete instructions carefully.

1. Before each use, shake once and remove the screw cap.

2. Invert the bottle and hold the bottle between your thumb and middle finger, with the tips of the fingers pointing towards you.

3. Tilt your head back and position the bottle above the affected eye.

DO NOT TOUCH THE EYE WITH THE TIP OF THE DROPPER.

* DROP-TAINER is a registered trademark of Alcon Manufacturing, Ltd.

[BACK]

4. With the opposite hand, place a finger under the eye. Gently pull down until a "V" pocket is made between your eye and lower lid.

5. With the hand holding the bottle, place your index finger on the bottom of the bottle. Push the bottom of the bottle to dispense one drop of medication.

DO NOT SQUEEZE THE SIDES OF THE BOTTLE.

6. Keep your head tilted backward and close your eye to allow absorption of the medication into the eye.

If you have any questions concerning the instillation of your eye medication, please consult your eye care specialist.
