Drug Facts

Active ingredients

Chlorhexidine Gluconate 2% w/v . . . . . . . . . . Antiseptic
and Isopropyl Alcohol 70% v/v . . . . . . . . . . Antiseptic

Purpose

For the preparation of the patient's skin prior to surgery

Use

For external use only. Flammable, keep away from fire or flame. To reduce risk of fire:
- Do not use in area for head and neck surgery
- Use a small applicator instead
- Solution contains alcohol and gives off flammable vapors. Do not apply directly to skin
- Avoid getting solution into hairy areas. Solution may take much longer to dry or may not dry completely
- Do not allow solution to pool
- Do not use wet materials from prep area

Warnings

For external use only. Flammable, keep away from fire or flame.
- Do not use on an area smaller than 8.4 in. x 8.4 in.
- Do not use for head and neck surgery
- Do not use 26-mL applicator for head and neck surgery
- Do not allow solution to pool
- Do not use on an area smaller than 8.4 in. x 8.4 in.
- Do not use wet materials from prep area

Keep out of reach of children.

Directions

- Do not use on children less than 2 months of age because of the potential for excessive skin irritation and increased drug absorption
- Use repeated back-and-forth strokes of the sponge until liquid is visible on the treatment area
- Do not use in area for head and neck surgery
- Use a small applicator instead
- Solution contains alcohol and gives off flammable vapors. Do not apply directly to skin
- Avoid getting solution into hairy areas. Solution may take much longer to dry or may not dry completely
- Do not allow solution to pool
- Do not use wet materials from prep area

Other information

- Do not freeze and excessive heat above 40 °C (104 °F)
- Store between 15–30 °C (59–86 °F)

Inactive ingredients

USP purified water

* Sterility of contents guaranteed unless package is damaged or open.

### Directions for Use

**Prepare Patient for ChloraPrep Solution:**
- When hair removal is necessary, the preferred method is to use a surgical clipper on the morning of the surgery.
- Preparation should be applied to clean, dry, residue-free, intact skin.
- When applying the solution, start at the incision site and apply the solution in a back and forth or up and down motion.

**After ChloraPrep is Applied:**
- Allow solution to completely dry prior to draping.

**While Waiting for ChloraPrep to Dry:**
- Do not drape.
- Check for pooled preparation. Use sterile gauze to absorb pooled solution.
- Do not blot. Allow solution to dry.
- Remove all wet materials.

**When ChloraPrep Solution is Dry:**
- Begin draping only after solution is dry and all solution-soaked materials are removed.
- If incise drapes are used, apply directly to dry prepped area.

*See Drug Facts for full labeling information*

Enturia recommends all users participate in a product in-service training prior to use. In-service training is available from your Enturia sales representative.

ChloraPrep is a fast-acting, broad spectrum, persistent antiseptic that significantly reduces the number of microorganisms on intact skin.

**To Reduce Risk of Fire:**
- Do not use 26-mL applicator for head and neck surgery.
- Do not use on an area smaller than 8.4 in. x 8.4 in. Use a smaller applicator instead.
- Solution contains alcohol and gives off flammable vapors.
- Do not store or use solution source (e.g. cautery, laser) until solution is completely dry (minimum of 3 minutes on hairless skin).
- Avoid getting solution into hair areas. Solution may take much longer to dry or may not dry completely.
- Do not allow solution to pool.
- Do not blot.
- Remove all wet materials.

**Warning:**

- Keep away from fire or flame. To reduce risk of fire:
  - do not use 26-mL applicator for head and neck surgery.
  - do not use on an area smaller than 8.4 in. x 8.4 in. Use a small applicator instead.
  - solution contains alcohol and gives off flammable vapors.
  - do not store or use solution source (e.g. cautery, laser) until solution is completely dry (minimum of 3 minutes on hairless skin).
  - avoid getting solution into hair areas. Solution may take much longer to dry or may not dry completely.
  - do not allow solution to pool.
  - do not blot.
