Cat. No. 260800 NDC #054365-400-14

Chlorhexidine Gluconate 2% w/v
and Isopropyl Alcohol 70% v/v
Patient Preoperative Skin Preparation • 26-mL Applicator

WARNING, FLAMMABLE.
KEEP AWAY FROM FIRE OR FLAME.

Drug Facts

Active ingredients Purpose
Chlorhexidine gluconate 2% w/v Antiseptic
Isopropyl alcohol 70% v/v Antiseptic

Use for the preparation of the patient's skin prior to surgery

Warnings
For external use only. Flammable, keep away from fire or flame. To reduce risk of fire:

- do not use 26-mL applicator for head and neck surgery
- do not use on an area smaller than 8.4 in. x 8.4 in.
- Use a small applicator instead
- solution contains alcohol and gives off **flammable vapors**
- do not drape or use ignition source (e.g., cautery, laser) until solution is completely dry (minimum of 3 minutes on hairless skin)
- avoid getting solution into hairy areas. Solution may take much longer to dry or may not dry completely
- do not allow solution to pool
- remove wet materials from prep area

Do not use

- in children less than 2 months of age because of the potential for excessive skin irritation and increased drug absorption
- on patients with known allergies to chlorhexidine gluconate or isopropyl alcohol
- for lumbar puncture or in contact with the meninges
- on open skin wounds or as a general skin cleanser

When using this product keep out of eyes, ears, and mouth. May cause serious or permanent injury if permitted to enter and remain. If contact occurs, rinse with cold water right away and contact a doctor.

Stop use and ask a doctor if irritation, sensitization, or allergic reaction occurs. These may be signs of a serious condition.

Keep out of reach of children. If swallowed, get medical help or contact a Poison Control Center right away.

Directions

- before using this product see insert for important information
- to reduce the risk of fire the following strategies are recommended:
 - at the end of prep, discard any portion of the solution which is not required to cover the prep area. It is not necessary to use the entire amount available.
 - use in a well ventilated area
 - avoid getting solution into hairy areas. If this occurs, wipe hair with towel. Solution may take much longer to dry or may not dry completely
 - do not allow solution to pool
 - tuck prep towels to absorb solution, and then remove
 - remove wet materials from prep area
 - drape after solution is completely dry
- Maximal treatment area for one applicator is approximately 13.2 in. x 13.2 in. (1126 cm²). Discard the applicator after a single use.
- pinch the wing on the applicator to break the ampule and release the antiseptic. Do not touch the sponge. Wet the sponge by repeatedly pressing and releasing the sponge against the treatment area until liquid is visible on the skin.
- **dry surgical sites** (such as abdomen or arm): Use repeated back-and-forth strokes of the sponge for approximately 30 seconds. Completely wet the treatment area with antiseptic. Allow the area to air dry for approximately **three (3) minutes**. Do not blot or wipe away.
- **moist surgical sites** (such as the inguinal fold): Use repeated back-and-forth strokes of the sponge for approximately 2 minutes. Completely wet the treatment area with antiseptic. Allow the area to air dry for approximately **three (3) minutes**. Do not blot or wipe away.

Other Information

- Store between 15-30 °C (59-86 °F)
- Avoid freezing and excessive heat above 40 °C (104 °F)

Inactive ingredients

- USP purified water

See Drug Facts for full labeling information

Enturia recommends all users participate in a product in-service training prior to use. In-servicing is available from your Enturia sales representative.

ChloroPrep is a fast-acting, broad spectrum, persistent antiseptic that significantly reduces the number of microorganisms on intact skin.

To Reduce Risk of Fire:

- Do not drape or use ignition source (e.g. cautery, laser) until solution is completely dry (minimum of 3 minutes on hairless skin)
- Allow preparation to completely dry:
 - if the preparation area is to be extended, or
 - if prepping for an additional procedure, or
 - if re-application of skin preparation is required,
 - drying time for dry surgical sites (such as abdomen or arm) is approximately **three (3) minutes**.
 - drying time for moist surgical sites (such as inguinal fold) is approximately **three (3) minutes**.
- Whenever prepping the neck area, place towels under each side to absorb excess solution.
- Do not allow the solution to pool.
- Remove any wet materials, drapes and gowns before draping.
- Avoid getting solution into hairy areas. If this occurs, wipe hair with towel. Solution may take much longer to dry or may not dry completely.

Directions for Use:**Prepare Patient for ChloroPrep Solution:**

- When hair removal is necessary, the preferred method is to use a surgical clipper on the morning of the surgery.
- Preparation should be applied to clean, dry, residue-free, intact skin.
- When applying the solution, start at the incision site and apply the solution in a back and forth or up and down motion.

Cat No. 260800

NDC #054365-400-14

ChloroPrep
One-Step

Chlorhexidine Gluconate 2% w/v
Isopropyl Alcohol 70% v/v • 26-mL Applicator

Patient Preoperative Skin Preparation

STERILE EO

External Use Only
Professional Use Only

Sterile Contents:*
Applicator(1)
Cotton Swabs (2)

* Sterility of contents guaranteed unless package is damaged or open.

After ChloroPrep is Applied:

- Allow solution to completely dry prior to draping.

While Waiting for ChloroPrep to Dry:

- Do not drape.
- Check for pooled preparation. Use sterile gauze to absorb pooled solution. Do not blot. Allow solution to dry.
- Remove all wet materials.

When ChloroPrep Solution is Dry:

- Begin draping only after solution is dry and all solution-soaked materials are removed.
- If incise drapes are used, apply directly to dry prepped area.
