Drug Facts

Active ingredient (in each 5 mL teaspoonful)

Ibuprofen 100 mg (NSAID) * pain reliever/fever reducer

*nonsteroidal anti-inflammatory drug

Uses

• temporarily relieves minor aches and pains due to:
  • the common cold
  • flu
  • sore throat
  • headaches
  • toothaches
  • reduces fever

Warnings

Allergy alert:

Ibuprofen may cause a severe allergic reaction, especially in people allergic to aspirin. Symptoms may include:

• hives
• facial swelling
• asthma (wheezing)
• shock
• skin reddening
• rash
• blisters

If an allergic reaction occurs, stop use and seek medical help right away.

Stomach bleeding warning:

This product contains a nonsteroidal anti-inflammatory drug (NSAID), which may cause stomach bleeding. The chance is higher if the child:

• has had stomach ulcers or bleeding problems
• takes other drugs containing an NSAID (aspirin, ibuprofen, naproxen, or others)
• has been drinking fluids
• lost a lot of fluid due to vomiting or diarrhea
• had stomach ulcers or bleeding in the past
• has bleeding problems
• has high blood pressure
• has heart or kidney disease
• is taking a blood thinner (anticoagulant) or steroid drug
• is taking other drugs containing an NSAID (aspirin, ibuprofen, naproxen, or others)

Sore throat warning:

Severe or persistent sore throat or sore throat accompanied by high fever, headache, nausea, and vomiting may be serious. Consult doctor promptly. Do not use more than 2 days or administer to children under 3 years of age unless directed by doctor.

Do not use:

• if the child has ever had an allergic reaction to any other pain reliever/fever reducer
• if the child has ever had problems with bleeding
• if the child has ever had stomach problems that lasted or came back, such as heartburn, upset stomach, or stomach pain

Ask a doctor before use if the child has:

• problems or serious side effects from taking pain relievers or fever reducers
• stomach problems that last or come back, such as heartburn, upset stomach, or stomach pain

Stop use and ask a doctor if:

• the child feels faint, vomits blood, or has bloody or black stools. These are signs of stomach bleeding.
• the child gets ulcers, or ulcers recur
• the child gets ulcers in the mouth or on the tongue
• the child has any new symptoms appear

Keep out of reach of children.

In case of overdose, get medical help or contact a Poison Control Center right away.

Directions

• do not give more than directed
• do not give longer than 10 days, unless directed by a doctor (see Warnings)
• find the right dose in the chart below. If possible use weight to dose; otherwise use age.
• repeat dose every 6-8 hours, if needed
• do not use more than 4 times a day

Attention:

use this product only with the teaspoon provided and do not overfill. The provided teaspoon holds 5 mL when filled level to the top rim and 2.5 mL when leveled at the 1/2 teaspoon mark. Level by mildly shaking or tapping the spoon.
