Constitute Date:

NDC 0004-0261-29
CellCept®
Oral Suspension
(mycophenolate mofetil for oral suspension)
200 mg/mL
Each mL contains 200 mg mycophenolate mofetil after constitution.
Attention Pharmacist: Dispense the accompanying Medication Guide to each patient.

Usual dosage: See package insert. Net contents after constitution: 175 mL, containing 35.0 grams mycophenolate mofetil. Deliverable volume after constitution: 160-165 mL. Phenylketonurics: Contains 0.56 mg phenylalanine per mL after constitution.

To the pharmacist: Tap the closed bottle several times to loosen the powder. Measure 94 mL of water in a graduated cylinder. Add approximately half the total amount of water for constitution to the bottle and shake the closed bottle well for about 1 minute. Add the remainder of water and shake the closed bottle well for about 1 minute. Remove the child-resistant cap and push bottle adapter into neck of bottle. Close bottle with child-resistant cap tightly. This will assure the proper seating of the bottle adapter in the bottle, and child-resistant status of the cap. Dispense with patient instructions and oral dispensers. See enclosed patient instructions for use of oral dispenser.
