General Information About the Safe and Effective Use of Oral Transmucosal Fentanyl Citrate (OTFC)

• If you are no longer using OTFC or if you have unused OTFC in your home, please follow these steps
  1. Remove all OTFC from the locked storage space.
  2. Remove one OTFC unit from its blister package using scissors, and hold the OTFC by its handle over the rim of a toilet.
  3. Using wire-cutting pliers, cut the medicine end off so that it falls into the toilet.
  4. Dispose of any unopened OTFC units remaining from a prescription as soon as they are no longer needed.

OTFC is supplied in single sealed child-resistant blister packages. Do not reuse the blister package.

• You can use the OTFC Child Safety Kit to help you store OTFC and your other medicines out of the reach and sight of children.

• A portable locking pouch is available for you to secure the storage space where you keep your medicines. Call your pharmacist or doctor for information about OTFC that is written only for the purpose for which it was prescribed.

• If for some reason you cannot finish the entire OTFC unit and cannot save the unused portion, throw the unused portion away safely.

• Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.
