Drug Facts
Active ingredient (in each chewing piece): Purpose
Nicotine (base) 1.5 mg: Substitute for cigarette smoking
In a nicotine gum, nicotine is the active ingredient that helps reduce withdrawal symptoms when you quit smoking.

WARNING

- If you are pregnant or breast feeding, only use this medicine on the advice of your doctor. Women who use nicotine gum should use no more than 24 pieces of nicotine gum per day.

- If you have heart disease, high blood pressure, or diabetes, talk to your doctor before using this medicine because nicotine gum may affect these conditions.

- Do not use this medicine if you are allergic to any of its ingredients.

- Be sure your nicotine gum is properly chilled. Nicotine gum may be used as a substitute for cigarette smoking, but it is not a medicine to treat nicotine withdrawal. Nicotine gum should not be used as a substitute for smoking.

If you have any questions, contact Nicorette at 1-800-QUIT-NOW.

Visit www.nicorette.com for additional information. Ask your pharmacist for more detailed information on Nicorette products.
TO INCREASE YOUR SUCCESS IN QUITTING:
1. You must be motivated to quit.
2. Use this product as part of a smoking cessation program. Consider discussing your treatment plan with your healthcare provider.
3. Quit all nicotine use (cigarettes, cigar, pipe, and chewing tobacco) along with this nicotine replacement. Do not take more than the recommended dosage. Do not use this product for a longer period than recommended without consulting your healthcare provider.
4. Use with a support program such as the Nicotine Dependence Center at 1-800-QUIT-NOW.

How To Open the Nicorette Gum Pocket Pack
1. Gently push tab on side.
2. Pull up tab. Pulling opens gum.
3. Choose Nicorette Gum and follow directions with siblings.

For more information and for a FREE individualized stop smoking program, please visit www.Nicorette.com or see booklet for more details.
Free booklet 25 packs requested. Six tills.

Identified by

Nicorette is the nicotine chewing gum that is registered trademark of the Johnson & Johnson group of companies.

Drug Facts
Active ingredient for each chewing piece: Nicotine

Warning
If you are pregnant or breast-feeding, only use this medication on the advice of your health-care provider. Do not exceed the recommended dosage. If you are taking a product that contains nicotine, such as a nicotine patch or gum, do not exceed the recommended dosage.

Other warnings:
- Do not chew nicotene or breast-feeding, or any other nicotine products at the same time.
- If you have any other questions, contact your health-care provider.

Inactive ingredients:
- Acrylates (acrylates and acrylamides), dextrose, cellulose, gum arabic, cochenel, and E431, E433, E435, E437, E460, E462.

Personalized Quit Plan
Visit www.nicorette.com to develop your own personalized quit plan.
Nicorette Committed Quitters is a personalized stop smoking program that will help you understand your smoking habit and determine how best to treat your cravings. Track, target, and tame your temptations with Nicorette Committed Quitters.
Only available at www.nicorette.com

TO INCREASE YOUR SUCCESS IN QUITTING:
1. Use Nicorette gum daily; see below.
2. Use Enough - Chew at least 3 pieces of Nicorette gum per day during the first six weeks.
3. Use Long Enough - Use Nicorette gum for the full 12 weeks.
4. Use with a support program as directed in the enclosed User's Guide.

Drug Facts
Active Ingredient
Nicotine polacrilex (equal to 4mg nicotine) . . . . . . . . . Stop smoking aid

Use
- reduce withdrawal symptoms, including nicotine craving, associated with quitting smoking

Warnings
- If you are pregnant or breastfeeding, only use this medicine as directed by your health care provider. Smoking can seriously harm your child. Nicotine can cross the placenta and enters your baby's bloodstream. Nicotine use during pregnancy can cause serious birth defects to your baby. Combining smoking and nicotine gum may increase the risk of serious harm to your baby. A pregnant woman who is trying to quit smoking should use Nicorette as directed by her health care provider. Ask a doctor before use if you have:
- a serious medical condition such as heart disease, diabetes, or severe lung disease
- a history of seizures or blackouts
- a history of heart attack or other severe chest pain
- a history of other severe chest pain
- a history of mental health problems such as depression, bipolar disorder, or schizophrenia
- a history of sudden or unexplained death in the family
- a history of lung disease
- a history of alcohol or drug abuse or addiction
- a history of other addiction

As a doctor or pharmacist before you use if you are:
- using a non-prescription stop smoking drug
- using prescription medicine for depression or asthma. Your prescription dose may need to be increased.

Stop use and ask a doctor if:
- flushed, stuffy, or hot spells occur
- irregular heartbeat or palpitations occur
- you get symptoms of nicotine overdose such as nausea, vomiting, diarrhea, dizziness, drowsiness, weakness, and rapid heartbeat.
- you have symptoms of an allergic reaction (such as difficulty breathing, swelling of the face, lips, tongue, or throat)

Keep out of reach of children and pets. Pieces of nicotine gum may have enough nicotine to make children and pets sick. Wash used pieces of gum in water and throw away in the trash. In case of overdose, get medical help or contact a Poison Control Center right away.

Directions
If you are under 18 years of age, ask a doctor before use
- before using this product, read the enclosed User's Guide for complete directions and other important information

Drug Facts (continued)
- begin using the gum on your quit day
- if you smoke your first cigarette more than 30 minutes after waking up, use 2mg nicotine gum
- if you smoke your first cigarette within 30 minutes of waking up, use 4mg nicotine gum according to the following 12 week schedule:

<table>
<thead>
<tr>
<th>Weeks 1 to 3</th>
<th>Weeks 4 to 6</th>
<th>Weeks 7 to 12</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 piece every 1 to 2 hours</td>
<td>1 piece every 1 to 2 hours</td>
<td>1 piece every 1 to 2 hours</td>
</tr>
<tr>
<td>1 piece every 2 to 4 hours</td>
<td>1 piece every 2 to 4 hours</td>
<td>1 piece every 2 to 4 hours</td>
</tr>
</tbody>
</table>

- nicotine gum is a medicine and must be used a certain way to get the best results.
- chew the gum slowly until it melts. Then, pack it between your cheek and gum. When the gum is gone, begin chewing again, until the gum returns.
- repeat this process until most of the chicle is gone (about 30 minutes).
- do not eat or drink for 15 minutes before chewing the nicotine gum, or while chewing a piece.

Stop use and ask a doctor if:
- the gum or the chicle causes you to feel dizzy, faint, or weak.

Other Information
- each piece contains: carbon dioxide, sodium lactate.
- store at 20-25°C (68-77°F).
- protect from heat and freezing.

Inactive Ingredients
ascorbic acid, acarbose, calcium carbonate, cellulose, FD&C yellow 6 AL, red, white and blue, gum base, magnesium stearate, maltodextrin, peppermint oil, sodium citrate, titanium dioxide, xanthan.

Questions or comments? Call toll-free 1-800-418-2142 (English/Spanish) weekdays (9:00 am - 4:30 pm ET).
Drug Facts
Active Ingredient
Nicotine polacrilex (nicotine gum)
Purpose (in each chewing piece)
Stops craving and helps satisfy your urge to smoke
Use as directed
Adults and children 12 years of age and older
Chew 2 pieces of gum at a time, at least 1 hour after a meal and at least 4 hours before your next meal
Chew each piece for a period of 15 minutes
Do not use more than 4 pieces of gum in a 2-hour period
Do not use more than 16 pieces in 24 hours
If you chew more than 16 pieces in a day, go 2 weeks without nicotine gum before you try to stop smoking
Nicotine gum is a medicine
Do not take more than the amount recommended
Overdose of nicotine gum can be harmful
Overdose symptoms may include:
Nausea, vomiting, and diarrhea
Rapid or irregular heartbeat
Dizziness or light-headedness
Drowsiness or irritability
Sweating
If symptoms of an overdose occur, seek medical attention or contact a Poison Control Center right away
Drug Facts (continued)
Nicotine gum is a medicine and must be used in a certain way to get the best results from gum and if it is used too much or too often. Taking more than the amount recommended may increase your risk of harmful side effects from nicotine gum
Side Effects
Tell your doctor right away if you have any of the following side effects, or if you have any other serious or unusual side effects that bother you or do not go away:
Changes in your urge to smoke
Symptoms that your urge to smoke is getting worse
Symptoms of withdrawal, such as irritability or sleep problems
Increased craving for nicotine
Confusion, agitation, or restlessness
Tell your doctor if you have any of these side effects:
Choking
Difficulty breathing
Rash
Stomach pain
Ulcers
Trouble swallowing
Other information
Store at room temperature
Nicotine gum is a white or off-white, rectangular-shaped, nicotine-releasing, chewing gum
To achieve a nicotine blood level that is similar to that produced by smoking a cigarette, chew the gum in a way that yields a rate of delivery similar to that of smoking
Chew each piece of gum for a period of 15 minutes
Do not chew on the gum, or use the gum as a candy
Do not chew on the gum more than 15 minutes after swallowing. For more information on how to chew gum properly, see the Drug Facts (continued) section

KEYS TO SUCCESS.

1) You must really want to quit smoking for Nicorette® Gum to help you.
2) You can greatly increase your chances for success by using at least 9 to 12 pieces every day when you start using Nicorette Gum. See page 12.
3) You should continue to use Nicorette Gum as explained in this User’s Guide for 12 full weeks. If you feel you need to use Nicorette Gum for a longer period to keep from smoking, talk to your health care provider.
4) Nicorette Gum works best when used together with a support program — See page 3 for details.
5) If you have trouble using Nicorette Gum, ask your doctor or pharmacist or call GlaxoSmithKline at 1-800-419-4766 weekdays (10:00 am - 4:30 pm ET).
6) To request a free audio CD containing tips to help make quitting easier, call the toll free number listed above. (ONE CD PER CUSTOMER)
SO YOU DECIDED TO QUIT.

Congratulations.
Your decision to stop smoking is an important one. That’s why you’ve made the right choice in choosing Nicorette Gum.

Your own chances of quitting smoking depend on how much you want to quit, how strongly you are addicted to tobacco, and how closely you follow a quitting program like the one that comes with Nicorette Gum.

QUITTING SMOKING IS HARD!

If you’ve tried to quit before and haven’t succeeded, don’t be discouraged! Quitting isn’t easy. It takes time, and most people try a few times before they are successful. The important thing is to try again until you succeed. This User’s Guide will give you support as you become a non-smoker. It will answer common questions about Nicorette Gum and give tips to help you stop smoking, and should be referred to often.
WHERE TO GET HELP. You are more likely to stop smoking by using Nicorette Gum with a support program that helps you break your smoking habit. There may be support groups in your area for people trying to quit. Call your local chapter of the American Lung Association, American Cancer Society or American Heart Association for further information. Toll free phone numbers are printed on the Wallet Card on the back cover of this User’s Guide.

If you find you cannot stop smoking or if you start smoking again after using Nicorette Gum, remember breaking this addiction doesn’t happen overnight. You may want to talk to a health care professional who can help you improve your chances of quitting the next time you try Nicorette Gum or another method.

LET’S GET ORGANIZED. Your reason for quitting may be a combination of concerns about health, the effect of smoking on your appearance, and pressure from your family.
and friends to stop smoking. Or maybe you’re concerned about the dangerous effect of second-hand smoke on the people you care about. All of these are good reasons. You probably have others. Decide your most important reasons, and write them down on the wallet card inside the back cover of this User’s Guide. Carry this card with you. In difficult moments, when you want to smoke, the card will remind you why you are quitting.

**WHAT YOU’RE UP AGAINST.** Smoking is addictive in two ways. Your need for nicotine has become both physical and mental. You must overcome both addictions to stop smoking. So while **Nicorette** Gum will lessen your body’s physical addiction to nicotine, you’ve got to want to quit smoking to overcome the mental dependence on cigarettes. Once you’ve decided that you’re going to quit, it’s time to get started. But first, there are some important warnings you should consider.
This product is only for those who want to stop smoking. If you are pregnant or breast-feeding, only use this medicine on the advice of your health care provider. Smoking can seriously harm your child. Try to stop smoking without using any nicotine replacement medicine. This medicine is believed to be safer than smoking. However, the risks to your child from this medicine are not fully known.

Ask a doctor before use if you have
• a sodium-restricted diet
• heart disease, recent heart attack, or irregular heartbeat. Nicotine can increase your heart rate.
• high blood pressure not controlled with medication. Nicotine can increase your blood pressure.
• stomach ulcer or diabetes
Ask a doctor or pharmacist before use if you are
• using a non-nicotine stop smoking drug
• taking a prescription medicine for depression or asthma. Your prescription dose may need to be adjusted.

Stop use and ask a doctor if
• mouth, teeth or jaw problems occur
• irregular heartbeat or palpitations occur
• you get symptoms of nicotine overdose such as nausea, vomiting, dizziness, diarrhea, weakness and rapid heartbeat
• you have symptoms of an allergic reaction (such as difficulty breathing or rash)

Keep out of reach of children and pets. Pieces of nicotine gum may have enough nicotine to make children and pets sick. Wrap used pieces of gum in paper and throw away in the trash. In case of overdose, get medical help or contact a Poison Control Center right away.

Becoming a non-smoker starts today. First, check that you bought the right starting dose. If you smoke your first cigarette within 30 minutes of waking up, use 4mg nicotine gum. If you smoke your first cigarette more
than 30 minutes after waking up, use 2mg nicotine gum. Next, read through the entire User's Guide carefully. Then, set your personalized quitting schedule. Take out a calendar that you can use to track your progress, and identify four dates, using the stickers in the center of this User's Guide:

**STEP 1. (Weeks 1-6). Your quit date (and the day you’ll start using Nicorette Gum).** Choose your quit date (it should be soon). This is the day you will begin using Nicorette Gum to satisfy your cravings for nicotine.

For the first six weeks, you’ll use a piece of Nicorette Gum every hour or two. Be sure to follow the directions starting on pages 10 and 12. Place the Step 1 stickers on this date.

**STEP 2. (Weeks 7 to 9). The day you’ll start reducing your use of Nicorette Gum.** After six weeks, you’ll begin gradually reducing your Nicorette Gum usage to one piece every two to four hours. Place the Step 2 sticker on this date (the first day of week seven).

**STEP 3. (Weeks 10-12). The day you’ll further reduce your use of Nicorette Gum.**
Nine weeks after you begin using Nicorette Gum, you will further reduce your nicotine intake by using one piece every four to eight hours. Place the Step 3 sticker on this date (the first day of week ten). For the next three weeks, you’ll use a piece of Nicorette Gum every four to eight hours.

**End of treatment: The day you’ll complete Nicorette Gum therapy.**

Identify the date thirteen weeks after the date you chose in Step 1, and place the “EX-SMOKER” sticker on your calendar.

---

**PLAN AHEAD.**

Because smoking is an addiction, it is not easy to stop. After you’ve given up cigarettes, you will still have a strong urge to smoke. Plan ahead NOW for these times, so you’re not defeated in a moment of weakness. The following tips may help:

- Keep the phone numbers of supportive friends and family members handy.
- Keep a record of your quitting process. Track the number of Nicorette Gum pieces you use each day, and whether you feel a craving for cigarettes. In the event that
you slip, immediately stop smoking and resume your quit attempt with the Nicorette Gum program.

- Put together an Emergency Kit that includes items that will help take your mind off occasional urges to smoke. Include cinnamon gum or lemon drops to suck on, a relaxing CD, and something for your hands to play with, like a smooth rock, rubber band, or small metal balls.

- Set aside some small rewards, like a new magazine or a gift certificate from your favorite store, which you’ll “give” yourself after passing difficult hurdles.

- Think now about the times when you most often want a cigarette, and then plan what else you might do instead of smoking. For instance, you might plan to take your coffee break in a new location, or take a walk right after dinner, so you won’t be tempted to smoke.
Nicorette Gum’s sugar-free chewing pieces provide nicotine to your system – they work as a temporary aid to help you quit smoking by reducing nicotine withdrawal symptoms. Nicorette Gum provides a lower level of nicotine to your blood than cigarettes, and allows you to gradually do away with your body’s need for nicotine. Because Nicorette Gum does not contain the tar or carbon monoxide of cigarette smoke, it does not have the same health dangers as tobacco. However, it still delivers nicotine, the addictive part of cigarette smoke. Nicotine can cause side effects such as headache, nausea, upset stomach, and dizziness.

If you are under 18 years of age, ask a doctor before use. Before you can use Nicorette Gum correctly, you have to practice! That sounds silly, but it isn’t. Nicorette Gum isn’t like ordinary chewing gum. It’s a medicine, and must be chewed a certain way to work right. Chewed like ordinary gum, Nicorette Gum won’t work well and
can cause side effects. An overdose can occur if you chew more than one piece of Nicorette Gum at the same time, or if you chew many pieces one after another. Read all the following instructions before using Nicorette Gum. Refer to them often to make sure you’re using Nicorette Gum correctly. If you chew too fast, or do not chew correctly, you may get hiccups, heartburn, or other stomach problems. Don’t eat or drink for 15 minutes before using Nicorette Gum, or while chewing a piece. The effectiveness of Nicorette Gum may be reduced by some foods and drinks, such as coffee, juices, wine or soft drinks.

1) Begin using Nicorette Gum on your quit day.
2) To reduce craving and other withdrawal symptoms, use Nicorette Gum according to the dosage schedule on page 12.
3) Chew each Nicorette Gum piece very slowly several times.
4) Stop chewing when you notice a peppery taste, or a slight tingling in your mouth. (This usually happens after about 15 chews, but may vary from person to person.)
5) “PARK” the Nicorette Gum piece between your cheek and gum, and leave it there.

6) When the peppery taste or tingle is almost gone (in about a minute), start to chew a few times slowly again. When the taste or tingle returns, stop again.

7) Park the Nicorette Gum piece again (in a different place in your mouth).

8) Repeat steps 3 to 7 (chew, chew, park) until most of the nicotine is gone from the Nicorette Gum piece (usually happens in about half an hour; the peppery taste or tingle won’t return.)

9) Wrap the used Nicorette Gum piece in paper and throw away in the trash.

The following chart lists the recommended usage schedule for Nicorette Gum:

<table>
<thead>
<tr>
<th>Weeks 1 to 6</th>
<th>Weeks 7 to 9</th>
<th>Weeks 10 to 12</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 piece every 1 to 2 hours</td>
<td>1 piece every 2 to 4 hours</td>
<td>1 piece every 4 to 8 hours</td>
</tr>
</tbody>
</table>

DO NOT USE MORE THAN 24 PIECES PER DAY.

To improve your chances of quitting, use at least 9 pieces of Nicorette Gum a day. If you experience strong or frequent cravings, you may use a second piece within the hour. However, do not continuously use one

Having a Plan Will Help You Quit

is a FREE custom-tailored plan to help you break your psychological addiction to smoking — while NICORETTE Gum fights the physical addiction. To get your plan, call toll free 1-800-770-0708 or visit us on the Web at www.committedquitters.com.
WHEN YOU CALL:

You will be asked a few questions to understand YOU and YOUR specific needs.

AFTER YOU CALL:

In a few days, you will receive your custom-tailored stop smoking plan. You will continue to receive personal, custom-tailored support — six times during the next twelve weeks.
Your Plan Will Contain:

**Week 1**
12-week stop smoking plan

**Week 2**
Newsletter with stories from other successful quitters

**Week 3**
Motivational postcard
Week 6
More tips on quitting

Week 9
Congratulations Packet

Week 12
Award Certificate

Materials are subject to change.
How To Survive the First Week:

1. Control your physical cravings for nicotine.
Use enough – You can greatly increase your chances for success by using at least 9 to 12 pieces every day when you start using Nicorette Gum.

2. Get rid of all signs that you ever smoked —
ashtrays, matches and, of course, cigarettes.

3. Stay active.
Keep busy to take your mind off smoking.

4. Think positive!
The first week is the toughest. Remind yourself that it will get easier.

Use the sample of the Stop Smoking Plan (see next page) to get you through the first week until your materials arrive.
If you have gone back to smoking, call 1-800-770-0708 to order relapse information.

- Make sure you tell friends and family members that you quit.
- Use enough Nicorette Gum — at least 9 to 12 pieces per day.
- Stay active. Keep busy to take your mind off smoking.
- When an urge to smoke strikes, take a few deep breaths and remind yourself how important quitting is to you.
The Committed Quitters® program is a plan specifically individualized for you.

Call Between 7 am and 12 Midnight ET or enroll online 24 hours a day. (ONE PLAN PER CUSTOMER)

piece after another, since this may cause you hiccups, heartburn, nausea or other side effects.

H ow To Reduce Your Nicorette Gum Usage.

The goal of using Nicorette Gum is to slowly reduce your dependence on nicotine. The schedule for using Nicorette Gum will help you reduce your nicotine craving gradually as you reduce and then stop your use of Nicorette Gum. Here are some tips to help you cut back during each step and then stop using Nicorette Gum:

• After a while, start chewing each Nicorette Gum piece for only 10 to 15 minutes, instead of half an hour. Then, gradually begin to reduce the number of pieces used.
• Or, try chewing each piece for longer than half an hour, but reduce the number of pieces you use each day.
• Substitute ordinary chewing gum for some of the Nicorette Gum pieces you would normally use. Increase the number of pieces of ordinary gum as you cut back on the Nicorette Gum pieces.
• Check how well you’ve reduced your daily usage of Nicorette Gum in Weeks 10 to 12. You should only be using about 3 to 5 pieces a day. Get ready to stop.

The following tips may help you try to stop Nicorette Gum when you have completed treatment.
• Set a stop date.
• Use the same number of pieces of confectionery gum or mints as you were using Nicorette Gum per day.

At the times when you have an urge to use Nicorette Gum, use a strong flavored gum or mint such as cinnamon or peppermint.
• Reduce the number of pieces of gum or mints you use by one piece per day until you do not need to use any gum or mints.

Talk to your doctor or health care provider if you:
• still feel the need to use Nicorette Gum at the end of week 12 to keep from smoking
• start using Nicorette Gum again after stopping
• start smoking again
Within the first few weeks of giving up smoking, you may be tempted to smoke for pleasure, particularly after completing a difficult task, or at a party or bar. Here are some tips to help get you through the important first stages of becoming a non-smoker:

**On Your Quit Date:**

- Ask your family, friends and co-workers to support you in your efforts to stop smoking.
- Throw away all your cigarettes, matches, lighters, ashtrays, etc.
- Keep busy on your quit day. Exercise. Go to a movie. Take a walk. Get together with friends.
- Figure out how much money you’ll save by not smoking. Most ex-smokers can save more than $1,000 a year.
- Write down what you will do with the money you save.
• Know your high risk situations and plan ahead how you will deal with them.

• Keep Nicorette Gum near your bed, so you’ll be prepared for any nicotine cravings when you wake up in the morning.

• Visit your dentist and have your teeth cleaned to get rid of the tobacco stains.

**Right after Quitting:**

• During the first few days after you’ve stopped smoking, spend as much time as possible at places where smoking is not allowed.

• Drink large quantities of water and fruit juices.

• Try to avoid alcohol, coffee and other beverages you associate with smoking.

• Remember that temporary urges to smoke will pass, even if you don’t smoke a cigarette.

• Keep your hands busy with something like a pencil or a paper clip.

• Find other activities which help you relax without cigarettes.

• Swim, jog, take a walk, play basketball.
Stop smoking, you might feel edgy and nervous and have trouble concentrating. You might get headaches, feel dizzy and a little out of sorts, feel sweaty or have stomach upsets. You might even have trouble sleeping at first. These are typical withdrawal symptoms that will go away with time. Your smoker’s cough will get worse before it gets better. But don’t worry, that’s a good sign. Coughing helps clear the tar deposits out of your lungs.

- Don’t worry too much about gaining weight. Watch what you eat, take time for daily exercise, and change your eating habits if you need to.
- Laughter helps. Watch or read something funny.

**WHAT TO EXPECT.**

Your body is now coming back into balance. During the first few days after you stop smoking, you might feel edgy and nervous and have trouble concentrating. You might get headaches, feel dizzy and a little out of sorts, feel sweaty or have stomach upsets. You might even have trouble sleeping at first. These are typical withdrawal symptoms that will go away with time. Your smoker’s cough will get worse before it gets better. But don’t worry, that’s a good sign. Coughing helps clear the tar deposits out of your lungs.

- Don’t worry too much about gaining weight. Watch what you eat, take time for daily exercise, and change your eating habits if you need to.
- Laughter helps. Watch or read something funny.
After A Week Or Two.
By now you should be feeling more confident that you can handle those smoking urges. Many of your withdrawal symptoms have left by now, and you should be noticing some positive signs: less coughing, better breathing and an improved sense of taste and smell, to name a few.

After A Month.
You probably have the urge to smoke much less often now. But urges may still occur, and when they do, they are likely to be powerful ones that come out of nowhere. Don’t let them catch you off guard. Plan ahead for these difficult times. Concentrate on the ways non-smokers are more attractive than smokers. Their skin is less likely to wrinkle. Their teeth are whiter, cleaner. Their breath is fresher. Their hair and clothes smell better. That cough that seems to make even a laugh sound more like a rattle is a thing of the past. Their children and others around them are healthier, too.
What To Do About Relapse.
What should you do if you slip and start smoking again? The answer is simple. A lapse of one or two or even a few cigarettes has not spoiled your efforts! Discard your cigarettes, forgive yourself and try again. If you start smoking again, keep your box of Nicorette Gum for your next quit attempt.

If you have taken up regular smoking again, don’t be discouraged. Research shows that the best thing you can do is to try again. The important thing is to learn from your last attempt.

- Admit that you’ve slipped, but don’t treat yourself as a failure.
- Try to identify the “trigger” that caused you to slip, and prepare a better plan for dealing with this problem next time.
- Talk positively to yourself – tell yourself that you have learned something from this experience.
- Make sure you used Nicorette Gum correctly over the full 12 weeks to reduce your craving for nicotine.
- Remember that it takes practice to do
anything, and quitting smoking is no exception.

**WHEN THE STRUGGLE IS OVER.**

Once you’ve stopped smoking, take a second and pat yourself on your back. Now do it again. You deserve it. Remember now why you decided to stop smoking in the first place. Look at your list of reasons. Read them again. And smile. Now think about all the money you are saving and what you’ll do with it. All the non-smoking places you can go, and what you might do there.

All those years you may have added to your life, and what you’ll do with them. Remember that temptation may not be gone forever. However, the hard part is behind you so look forward with a positive attitude, and enjoy your new life as a non-smoker.

**QUESTIONS & ANSWERS.**

1. How will I feel when I stop smoking and start using Nicorette Gum?

You’ll need to prepare yourself for some nicotine withdrawal symptoms. These begin almost immediately after you stop
smoking, and are usually at their worst during the first three or four days. Understand that any of the following is possible:

- craving for cigarettes
- anxiety, irritability, restlessness, mood changes, nervousness
- drowsiness
- trouble concentrating
- increased appetite and weight gain
- headaches, muscular pain, constipation, fatigue.

**Nicorette Gum** can help provide relief from withdrawal symptoms such as irritability and nervousness, as well as the craving for nicotine you used to satisfy by having a cigarette.

2. **Is Nicorette Gum just substituting one form of nicotine for another?**

**Nicorette** Gum does contain nicotine. The purpose of **Nicorette** Gum is to provide you with enough nicotine to help control the physical withdrawal symptoms so you can deal with the mental aspects of quitting. During the 12 week program, you will gradually...
reduce your nicotine intake by switching to fewer pieces each day.

3. Can I be hurt by using Nicorette Gum?
For most adults, the amount of nicotine in the gum is less than from smoking. Some people will be sensitive to even this amount of nicotine and should not use this product without advice from their doctor (see page 5).

Because Nicorette Gum is a gum-based product, chewing it can cause dental fillings to loosen and aggravate other mouth, tooth and jaw problems. Nicorette Gum can also cause hiccups, heartburn and other stomach problems especially if chewed too quickly or not chewed correctly.

4. Will I gain weight?
Many people do tend to gain a few pounds the first 8-10 weeks after they stop smoking. This is a very small price to pay for the enormous gains that you will make in your overall health and attractiveness. If you
continue to gain weight after the first two months, try to analyze what you’re doing differently. Reduce your fat intake, choose healthy snacks, and increase your physical activity to burn off the extra calories.

5. Is Nicorette Gum more expensive than smoking?
The total cost of Nicorette Gum for the twelve week program is about equal to what a person who smokes one and a half packs of cigarettes a day would spend on cigarettes for the same period of time.

Also, use of Nicorette Gum is only a short-term cost, while the cost of smoking is a long-term cost, because of the health problems smoking causes.

6. What if I slip up?
Discard your cigarettes, forgive yourself and then get back on track. Don’t consider yourself a failure or punish yourself. In fact, people who have already tried to quit are more likely to be successful the next time.

KEYS TO SUCCESS.

1) You must really want to quit smoking for Nicorette® Gum to help you.
2) You can greatly increase your chances for success by using at least 9 to 12 pieces every day when you start using Nicorette Gum. See page 12.
3) You should continue to use Nicorette Gum as explained in this User’s Guide for 12 full weeks. If you feel you need to use Nicorette Gum for a longer period to keep from smoking, talk to your health care provider.
4) Nicorette Gum works best when used together with a support program — See page 3 for details.
5) If you have trouble using Nicorette Gum, ask your doctor or pharmacist or call GlaxoSmithKline at 1-800-419-4766 weekdays (10:00 am - 4:30 pm ET).
6) To request a free audio CD containing tips to help make quitting easier, call the toll free number listed above. (ONE CD PER CUSTOMER)
SO YOU DECIDED TO QUIT.

Congratulations.

Your decision to stop smoking is an important one. That’s why you’ve made the right choice in choosing Nicorette Gum.

Your own chances of quitting smoking depend on how much you want to quit, how strongly you are addicted to tobacco, and how closely you follow a quitting program like the one that comes with Nicorette Gum.

QUITTING SMOKING IS HARD!

If you’ve tried to quit before and haven’t succeeded, don’t be discouraged! Quitting isn’t easy. It takes time, and most people try a few times before they are successful. The important thing is to try again until you succeed. This User’s Guide will give you support as you become a non-smoker. It will answer common questions about Nicorette Gum and give tips to help you stop smoking, and should be referred to often.
WHERE TO GET HELP. You are more likely to stop smoking by using Nicorette Gum with a support program that helps you break your smoking habit. There may be support groups in your area for people trying to quit. Call your local chapter of the American Lung Association, American Cancer Society or American Heart Association for further information. Toll free phone numbers are printed on the Wallet Card on the back cover of this User’s Guide.

If you find you cannot stop smoking or if you start smoking again after using Nicorette Gum, remember breaking this addiction doesn’t happen overnight. You may want to talk to a health care professional who can help you improve your chances of quitting the next time you try Nicorette Gum or another method.

LET’S GET ORGANIZED. Your reason for quitting may be a combination of concerns about health, the effect of smoking on your appearance, and pressure from your family...
and friends to stop smoking. Or maybe you’re concerned about the dangerous effect of second-hand smoke on the people you care about. All of these are good reasons. You probably have others. Decide your most important reasons, and write them down on the wallet card inside the back cover of this User’s Guide. Carry this card with you. In difficult moments, when you want to smoke, the card will remind you why you are quitting.

WHAT YOU’RE UP AGAINST. Smoking is addictive in two ways. Your need for nicotine has become both physical and mental. You must overcome both addictions to stop smoking. So while Nicorette Gum will lessen your body’s physical addiction to nicotine, you’ve got to want to quit smoking to overcome the mental dependence on cigarettes. Once you’ve decided that you’re going to quit, it’s time to get started. But first, there are some important warnings you should consider.
This product is only for those who want to stop smoking. If you are pregnant or breast-feeding, only use this medicine on the advice of your health care provider. Smoking can seriously harm your child. Try to stop smoking without using any nicotine replacement medicine. This medicine is believed to be safer than smoking. However, the risks to your child from this medicine are not fully known.

Ask a doctor before use if you have
- a sodium-restricted diet
- heart disease, recent heart attack, or irregular heartbeat. Nicotine can increase your heart rate.
- high blood pressure not controlled with medication. Nicotine can increase your blood pressure.
- stomach ulcer or diabetes
Ask a doctor or pharmacist before use if you are
• using a non-nicotine stop smoking drug
• taking a prescription medicine for depression or asthma. Your prescription dose may need to be adjusted.

Stop use and ask a doctor if
• mouth, teeth or jaw problems occur
• irregular heartbeat or palpitations occur
• you get symptoms of nicotine overdose such as nausea, vomiting, dizziness, diarrhea, weakness and rapid heartbeat
• oral blistering occurs

• you have symptoms of an allergic reaction (such as difficulty breathing or rash)

Keep out of reach of children and pets. Pieces of nicotine gum may have enough nicotine to make children and pets sick. Wrap used pieces of gum in paper and throw away in the trash. In case of overdose, get medical help or contact a Poison Control Center right away.

Becoming a non-smoker starts today. First, check that you bought the right starting dose. If you smoke your first cigarette within 30 minutes of waking up, use 4mg nicotine.
gum. If you smoke your first cigarette more than 30 minutes after waking up, use 2mg nicotine gum. Next, read through the entire User’s Guide carefully. Then, set your personalized quitting schedule. Take out a calendar that you can use to track your progress, and identify four dates, using the stickers in the center of this User’s Guide:

**STEP 1. (Weeks 1-6). Your quit date (and the day you’ll start using Nicorette Gum).** Choose your quit date (it should be soon). This is the day you will begin using Nicorette Gum to satisfy your cravings for nicotine.

For the first six weeks, you’ll use a piece of Nicorette Gum every hour or two. Be sure to follow the directions starting on pages 10 and 12. Place the Step 1 stickers on this date.

**STEP 2. (Weeks 7 to 9). The day you’ll start reducing your use of Nicorette Gum.** After six weeks, you’ll begin gradually reducing your Nicorette Gum usage to one piece every two to four hours. Place the Step 2 sticker on this date (the first day of week seven).
STEP 3. (Weeks 10-12). The day you’ll further reduce your use of Nicorette Gum. Nine weeks after you begin using Nicorette Gum, you will further reduce your nicotine intake by using one piece every four to eight hours. Place the Step 3 sticker on this date (the first day of week ten). For the next three weeks, you’ll use a piece of Nicorette Gum every four to eight hours.

End of treatment: The day you’ll complete Nicorette Gum therapy. Identify the date thirteen weeks after the date you chose in Step 1, and place the “EX-SMOKER” sticker on your calendar.

PLAN AHEAD. Because smoking is an addiction, it is not easy to stop. After you’ve given up cigarettes, you will still have a strong urge to smoke. Plan ahead NOW for these times, so you’re not defeated in a moment of weakness. The following tips may help:

- Keep the phone numbers of supportive friends and family members handy.
- Keep a record of your quitting process.
Track the number of **Nicorette** Gum pieces you use each day, and whether you feel a craving for cigarettes. In the event that you slip, immediately stop smoking and resume your quit attempt with the **Nicorette** Gum program.

- Put together an Emergency Kit that includes items that will help take your mind off occasional urges to smoke. Include cinnamon gum or lemon drops to suck on, a relaxing CD, and something for your hands to play with, like a smooth rock, rubber band, or small metal balls.
- Set aside some small rewards, like a new magazine or a gift certificate from your favorite store, which you’ll “give” yourself after passing difficult hurdles.
- Think now about the times when you most often want a cigarette, and then plan what else you might do instead of smoking. For instance, you might plan to take your coffee break in a new location, or take a walk right after dinner, so you won’t be tempted to smoke.
HOW NICORETTE GUM WORKS.

Nicorette Gum’s sugar-free chewing pieces provide nicotine to your system – they work as a temporary aid to help you quit smoking by reducing nicotine withdrawal symptoms. Nicorette Gum provides a lower level of nicotine to your blood than cigarettes, and allows you to gradually do away with your body’s need for nicotine. Because Nicorette Gum does not contain the tar or carbon monoxide of cigarette smoke, it does not have the same health dangers as tobacco. However, it still delivers nicotine, the addictive part of cigarette smoke. Nicotine can cause side effects such as headache, nausea, upset stomach, and dizziness.

HOW TO USE NICORETTE GUM.

If you are under 18 years of age, ask a doctor before use. Before you can use Nicorette Gum correctly, you have to practice! That sounds silly, but it isn’t. Nicorette Gum isn’t like ordinary chewing gum. It’s a medicine, and must be chewed a certain way to work right. Chewed like ordinary gum, Nicorette Gum won’t work well and
can cause side effects. An overdose can occur if you chew more than one piece of Nicorette Gum at the same time, or if you chew many pieces one after another. Read all the following instructions before using Nicorette Gum. Refer to them often to make sure you’re using Nicorette Gum correctly. If you chew too fast, or do not chew correctly, you may get hiccups, heartburn, or other stomach problems. Don’t eat or drink for 15 minutes before using Nicorette Gum, or while chewing a piece. The effectiveness of Nicorette Gum may be reduced by some foods and drinks, such as coffee, juices, wine or soft drinks.

1) Begin using Nicorette Gum on your quit day.
2) To reduce craving and other withdrawal symptoms, use Nicorette Gum according to the dosage schedule on page 12.
3) Chew each Nicorette Gum piece very slowly several times.
4) Stop chewing when you notice a peppery taste, or a slight tingling in your mouth. (This usually happens after about 15 chews, but may vary from person to person.)
5) “PARK” the Nicorette Gum piece between your cheek and gum, and leave it there.

6) When the peppery taste or tingle is almost gone (in about a minute), start to chew a few times slowly again. When the taste or tingle returns, stop again.

7) Park the Nicorette Gum piece again (in a different place in your mouth).

8) Repeat steps 3 to 7 (chew, chew, park) until most of the nicotine is gone from the Nicorette Gum piece (usually happens in about half an hour; the peppery taste or tingle won’t return.)

9) Wrap the used Nicorette Gum piece in paper and throw away in the trash.

The following chart lists the recommended usage schedule for Nicorette Gum:

<table>
<thead>
<tr>
<th>Weeks 1 to 6</th>
<th>Weeks 7 to 9</th>
<th>Weeks 10 to 12</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 piece every 1 to 2 hours</td>
<td>1 piece every 2 to 4 hours</td>
<td>1 piece every 4 to 8 hours</td>
</tr>
</tbody>
</table>

DO NOT USE MORE THAN 24 PIECES PER DAY.

To improve your chances of quitting, use at least 9 pieces of Nicorette Gum a day. If you experience strong or frequent cravings, you may use a second piece within the hour. However, do not continuously use one...

Having a Plan Will Help You Quit

is a FREE custom-tailored plan to help you break your psychological addiction to smoking — while NICORETTE Gum fights the physical addiction. To get your plan, call toll free 1-800-770-0708 or visit us on the Web at www.committedquitters.com.
WHEN YOU CALL:
You will be asked a few questions to understand YOU and YOUR specific needs.

AFTER YOU CALL:
In a few days, you will receive your custom-tailored stop smoking plan. You will continue to receive personal, custom-tailored support — six times during the next twelve weeks.
Your Plan Will Contain:

**Week 1**
12-week stop smoking plan

**Week 2**
Newsletter with stories from other successful quitters

**Week 3**
Motivational postcard
How To Survive the First Week:

1. Control your physical cravings for nicotine.
Use enough – You can greatly increase your chances for success by using at least 9 to 12 pieces every day when you start using Nicorette Gum.

2. Get rid of all signs that you ever smoked —
ashtrays, matches and, of course, cigarettes.

3. Stay active.
Keep busy to take your mind off smoking.

4. Think positive!
The first week is the toughest.
Remind yourself that it will get easier.

Use the sample of the Stop Smoking Plan (see next page) to get you through the first week until your materials arrive.
The toughest hurdle — your first week without cigarettes.

Your craving for nicotine will be strongest during this first week. To deal with physical withdrawal, use Nicorette Gum properly. Follow the directions on your Nicorette Gum package.

WEEK ONE

Day Pieces Chewed Planning: Plan ahead. Note events here that will tempt you to smoke, and how you will deal with them.
1. ____________
2. ____________
3. ____________
4. ____________
5. ____________
6. ____________
7. ____________

If you have gone back to smoking, call 1-800-770-0708 to order relapse information.

TIPS
- Make sure you tell friends and family members that you quit.
- Use enough Nicorette Gum — at least 9 to 12 pieces per day.
- Stay active. Keep busy to take your mind off smoking.
- When an urge to smoke strikes, take a few deep breaths and remind yourself how important quitting is to you.
The Committed Quitters® program is a plan specifically individualized for you.

Call Between 7 am and 12 Midnight ET or enroll online 24 hours a day. (ONE PLAN PER CUSTOMER)

piece after another, since this may cause you hiccups, heartburn, nausea or other side effects.

The goal of using Nicorette Gum is to slowly reduce your dependence on nicotine. The schedule for using Nicorette Gum will help you reduce your nicotine craving gradually as you reduce and then stop your use of Nicorette Gum. Here are some tips to help you cut back during each step and then stop using Nicorette Gum:

- After a while, start chewing each Nicorette Gum piece for only 10 to 15 minutes, instead of half an hour. Then, gradually begin to reduce the number of pieces used.
- Or, try chewing each piece for longer than half an hour, but reduce the number of pieces you use each day.
- Substitute ordinary chewing gum for some of the Nicorette Gum pieces you would normally use. Increase the number of pieces of ordinary gum as you cut back on the Nicorette Gum pieces.
• Check how well you’ve reduced your daily usage of **Nicorette** Gum in Weeks 10 to 12. You should only be using about 3 to 5 pieces a day. Get ready to stop.

The following tips may help you try to stop **Nicorette** Gum when you have completed treatment.
• Set a stop date.
• Use the same number of pieces of confectionery gum or mints as you were using **Nicorette** Gum per day.

At the times when you have an urge to use **Nicorette** Gum, use a strong flavored gum or mint such as cinnamon or peppermint.
• Reduce the number of pieces of gum or mints you use by one piece per day until you do not need to use any gum or mints.

**Talk to your doctor or health care provider if you:**
• still feel the need to use **Nicorette** Gum at the end of week 12 to keep from smoking
• start using **Nicorette** Gum again after stopping
• start smoking again

Reference ID: 3398928
Within the first few weeks of giving up smoking, you may be tempted to smoke for pleasure, particularly after completing a difficult task, or at a party or bar. Here are some tips to help get you through the important first stages of becoming a non-smoker:

**On Your Quit Date:**
- Ask your family, friends and co-workers to support you in your efforts to stop smoking.
- Throw away all your cigarettes, matches, lighters, ashtrays, etc.
- Keep busy on your quit day. Exercise. Go to a movie. Take a walk. Get together with friends.
- Figure out how much money you’ll save by not smoking. Most ex-smokers can save more than $1,000 a year.
- Write down what you will do with the money you save.
• Know your high risk situations and plan ahead how you will deal with them.
• Keep Nicorette Gum near your bed, so you’ll be prepared for any nicotine cravings when you wake up in the morning.
• Visit your dentist and have your teeth cleaned to get rid of the tobacco stains.

Right after Quitting:
• During the first few days after you’ve stopped smoking, spend as much time as possible at places where smoking is not allowed.
• Drink large quantities of water and fruit juices.
• Try to avoid alcohol, coffee and other beverages you associate with smoking.
• Remember that temporary urges to smoke will pass, even if you don’t smoke a cigarette.
• Keep your hands busy with something like a pencil or a paper clip.
• Find other activities which help you relax without cigarettes.
• Swim, jog, take a walk, play basketball.
Don’t worry too much about gaining weight. Watch what you eat, take time for daily exercise, and change your eating habits if you need to.

Laughter helps. Watch or read something funny.

WHAT TO EXPECT. Your body is now coming back into balance. During the first few days after you stop smoking, you might feel edgy and nervous and have trouble concentrating. You might get headaches, feel dizzy and a little out of sorts, feel sweaty or have stomach upsets. You might even have trouble sleeping at first. These are typical withdrawal symptoms that will go away with time. Your smoker’s cough will get worse before it gets better. But don’t worry, that’s a good sign. Coughing helps clear the tar deposits out of your lungs.
After A Week Or Two.
By now you should be feeling more confident that you can handle those smoking urges. Many of your withdrawal symptoms have left by now, and you should be noticing some positive signs: less coughing, better breathing and an improved sense of taste and smell, to name a few.

After A Month.
You probably have the urge to smoke much less often now. But urges may still occur, and when they do, they are likely to be powerful ones that come out of nowhere. Don’t let them catch you off guard. Plan ahead for these difficult times. Concentrate on the ways non-smokers are more attractive than smokers. Their skin is less likely to wrinkle. Their teeth are whiter, cleaner. Their breath is fresher. Their hair and clothes smell better. That cough that seems to make even a laugh sound more like a rattle is a thing of the past. Their children and others around them are healthier, too.
What To Do About Relapse.
What should you do if you slip and start smoking again? The answer is simple. A lapse of one or two or even a few cigarettes has not spoiled your efforts! Discard your cigarettes, forgive yourself and try again. If you start smoking again, keep your box of Nicorette Gum for your next quit attempt.

If you have taken up regular smoking again, don’t be discouraged. Research shows that the best thing you can do is to try again. The important thing is to learn from your last attempt.

- Try to identify the “trigger” that caused you to slip, and prepare a better plan for dealing with this problem next time.
- Talk positively to yourself – tell yourself that you have learned something from this experience.
- Make sure you used Nicorette Gum correctly over the full 12 weeks to reduce your craving for nicotine.
- Remember that it takes practice to do
anything, and quitting smoking is no exception.

**WHEN THE STRUGGLE IS OVER.** Once you’ve stopped smoking, take a second and pat yourself on your back. Now do it again. You deserve it. Remember now why you decided to stop smoking in the first place. Look at your list of reasons. Read them again. And smile. Now think about all the money you are saving and what you’ll do with it. All the non-smoking places you can go, and what you might do there.

All those years you may have added to your life, and what you’ll do with them. Remember that temptation may not be gone forever. However, the hard part is behind you so look forward with a positive attitude, and enjoy your new life as a non-smoker.

**QUESTIONS & ANSWERS.**

1. **How will I feel when I stop smoking and start using Nicorette Gum?**
   You’ll need to prepare yourself for some nicotine withdrawal symptoms. These begin almost immediately after you stop...
smoking, and are usually at their worst during the first three or four days. Understand that any of the following is possible:

- craving for cigarettes
- anxiety, irritability, restlessness, mood changes, nervousness
- drowsiness
- trouble concentrating
- increased appetite and weight gain
- headaches, muscular pain, constipation, fatigue.

**Nicorette** Gum can help provide relief from withdrawal symptoms such as irritability and nervousness, as well as the craving for nicotine you used to satisfy by having a cigarette.

2. **Is Nicorette Gum just substituting one form of nicotine for another?**

**Nicorette** Gum does contain nicotine. The purpose of **Nicorette** Gum is to provide you with enough nicotine to help control the physical withdrawal symptoms so you can deal with the mental aspects of quitting. During the 12 week program, you will gradually
reduce your nicotine intake by switching to fewer pieces each day.

3. Can I be hurt by using Nicorette Gum?
For most adults, the amount of nicotine in the gum is less than from smoking. Some people will be sensitive to even this amount of nicotine and should not use this product without advice from their doctor (see page 5).

Because Nicorette Gum is a gum-based product, chewing it can cause dental fillings to loosen and aggravate other mouth, tooth and jaw problems. Nicorette Gum can also cause hiccups, heartburn and other stomach problems especially if chewed too quickly or not chewed correctly.

4. Will I gain weight?
Many people do tend to gain a few pounds the first 8-10 weeks after they stop smoking. This is a very small price to pay for the enormous gains that you will make in your overall health and attractiveness. If you
continue to gain weight after the first two months, try to analyze what you’re doing differently. Reduce your fat intake, choose healthy snacks, and increase your physical activity to burn off the extra calories.

5. Is Nicorette Gum more expensive than smoking?
The total cost of Nicorette Gum for the twelve week program is about equal to what a person who smokes one and a half packs of cigarettes a day would spend on cigarettes for the same period of time.

Also, use of Nicorette Gum is only a short-term cost, while the cost of smoking is a long-term cost, because of the health problems smoking causes.

6. What if I slip up?
Discard your cigarettes, forgive yourself and then get back on track. Don’t consider yourself a failure or punish yourself. In fact, people who have already tried to quit are more likely to be successful the next time.
**Recommended dosage schedule for Nicorette Gum:**

<table>
<thead>
<tr>
<th>STEP 1</th>
<th>STEP 2</th>
<th>STEP 3</th>
</tr>
</thead>
<tbody>
<tr>
<td>weeks 1 to 6</td>
<td>weeks 7 to 9</td>
<td>weeks 10 to 12</td>
</tr>
<tr>
<td>1 piece every 1 to 2 hours</td>
<td>1 piece every 2 to 4 hours</td>
<td>1 piece every 4 to 8 hours</td>
</tr>
</tbody>
</table>
My most important reasons to quit smoking are:
