Avagard™
Surgical and Healthcare Personnel Hand Antiseptic with Moisturizers

40.6 fl oz • 1200 mL

Drug Facts

Active Ingredients
- Chlorhexidine gluconate 1% w/w
- Ethyl alcohol 61% w/w

Purpose
- Antiseptic

Uses
- Surgical hand antiseptic
- Significantly reduces the number of microorganisms on the hands and forearms prior to surgery or patient care
- Healthcare personnel hand antiseptic: hand rub to help reduce bacteria that potentially can cause disease
- Recommended for repeated use

Warnings
- For external use only. Flammable, keep away from fire or flames.
- Allergy Alert: This product may cause a severe allergic reaction. Symptoms may include:
  - Wheezing and difficulty breathing
  - Shock
  - Facial swelling
  - Hives
  - Rash
- If an allergic reaction occurs, stop use and seek medical help right away.

Do not use if you are allergic to chlorhexidine gluconate or any other ingredient in this product.

When using this product:
- Do not touch the eye with hands that have been treated with this preparation.
- Keep out of eyes, ears, and mouth. May cause serious and permanent eye injury if permitted to enter and remain in the eye.
- If contact occurs, rinse with cold water right away.
- Do not use routinely if you have wounds which involve more than the superficial layers of the skin.

Stop use and ask a doctor if irritation, sensitization or allergic reaction occurs. These may be signs of a serious condition.

Keep out of reach of children. If swallowed, get medical help or contact a Poison Control Center right away.

Drug Facts (continued)

Directions
- Use with care in premature infants or infants under 2 months of age. These products may cause irritation or chemical burns.
- Surgical hand antiseptic: apply to clean, dry hands and nails. For the first use of each day, clean under nails with a nail stick.
- Dispense one pump (2 mL) into the palm of one hand.
- Dip the fingertips of the opposite hand into the lotion and work it under the nails.
- Spread the remaining lotion over the hand and up to just above the elbow.
- Using another 2 mL of lotion, repeat with the other hand.
- Dispense another 2 mL of lotion into either hand, apply to all aspects of both hands up to the wrists.
- Allow to dry before donning gloves.

Healthcare personnel hand antiseptic: apply to clean, dry hands and nails.
- Dispense one pump (2 mL) into the palm of one hand.
- Paying particular attention to the spaces between the fingers and under fingernails, apply the lotion evenly to cover both hands up to the wrists.
- Allow to dry without wiping.

Other Information
- Store at 20-25°C (68-77°F).

Inactive ingredients:
- Beheneth 10, behenyl alcohol, C20-40 parфи-24, cetyl palmitate, dioctyl dimethyl dihydrogenated stearate, dimethicone, glycerin, polyethylene glycol, quatsilane, water

Avagard™ Product Information

PRODUCT TITLE
Avagard™
(Chlorhexidine gluconate 1% and ethyl alcohol 61%, w/w)

Surgical and Healthcare Personnel Hand Antiseptic with moisturizers

DESCRIPTION
Avagard Antiseptic Hand Preparation with moisturizers for surgical and healthcare disinfection, provides rapid bactericidal action and persistent antimicrobial protection against a broad spectrum of organisms. Avagard antiseptic hand prep contains 1% (w/w) chlorhexidine gluconate, and 61% (w/w) ethyl alcohol in an emollient-rich lotion base.

This product is flammable, keep away from fire or flame, heat, sparks and sources of static discharge.

Avagard antiseptic hand prep does not require the use of water, or mechanical scrubbing with a surgical brush to achieve the bactericidal effect. Water should not be used in its application.
CLINICAL PHARMACOLOGY

In vitro Microbiology

The following in vitro data are available but their clinical significance is unknown.

Time Kill Study: In an independent Time Kill Study, the speed of the microbiocidal activity of Avagard antiseptic hand prep was measured using a select battery of microorganisms. Avagard antiseptic hand prep demonstrated rapid bactericidal activity against the broad range of microorganisms tested.

Minimum Inhibitory Concentration Study: In an independent study, Avagard antiseptic hand prep was tested against 1058 isolates while the vehicle control and the reference product were tested against 266 isolates of the organisms listed below. Avagard antiseptic hand prep demonstrated antiseptic activity against all organisms tested.

Clinical Studies

The following section details studies designed to simulate actual clinical use.

Surgical Hand Antiseptic Studies: The procedure used was the FDA specified test method for Surgical Scrub products. In two studies, the immediate bactericidal effect of Avagard antiseptic hand prep after a single application resulted in a 2.5 log reduction from a 6 log baseline (99.6%) in resident bacterial flora, with a continued 3.5 log reduction (99.96%) after the final (eleventh) scrub. Reductions on surgically gloved hands were maintained over the six-hour test period.

![Graph showing log reduction of normal flora on the hands over multiple days and times. The graph includes bars for Study 1 and Study 2, showing log reductions at 1, 3, and 6 hours for each day.]
Health Care Personnel Antiseptic Study: The procedure used was the FDA specified test method for health care personnel handwash products\(^2\). After one application, use of Avagard antiseptic hand prep demonstrated a 2.1 log reduction from a 7 log baseline (99.2%) of bacteria on artificially contaminated hands. After the final (tenth) application, the reduction increased to 3.7 logs (99.98%).

Safety Studies
In a Human Repeat Insult Patch Test (Jordan-King Modification of the Draize Sensitization Procedure)\(^3,4\) conducted in 217 subjects, Avagard antiseptic hand prep displayed no evidence suggesting a sensitization potential. In a 21-Day Evaluation of the Cumulative Irritation Potential\(^5\) of Avagard antiseptic hand prep and its vehicle, both articles were classified as mild materials, under occlusive and semi-occlusive conditions. The test products were allowed to dry on the skin for 15 minutes prior to patch application, which may have minimized irritation potential. However, available safety data indicates that repeated use of Avagard antiseptic hand prep was associated with little change in moisture, scaliness, erythema or tactile roughness when compared to baseline conditions.

In animal studies, Avagard antiseptic hand prep produced mild ocular irritation when instilled into the eyes of albino rabbits. Avagard antiseptic hand prep was not teratogenic when applied to the skin of rats. Avagard antiseptic hand prep has not been tested for mutagenicity or carcinogenicity.
INDICATIONS AND USAGE
Avagard™ Antiseptic Hand Preparation is indicated for use as a surgical hand antiseptic and as a healthcare personnel hand antiseptic.

CONTRAINDICATIONS
Avagard Antiseptic Hand Preparation should not be used by persons who are known to be hypersensitive to chlorhexidine gluconate or any of its components.

WARNINGS
FOR EXTERNAL USE ONLY. FLAMMABLE, KEEP AWAY FROM FIRE OR FLAME. ALLERGY ALERT: THIS PRODUCT MAY CAUSE A SEVERE ALLERGIC REACTION. SYMPTOMS MAY INCLUDE: WHEEZING/DIFFICULTY BREATHING, SHOCK, FACIAL SWELLING, HIVES, RASH. IF AN ALLERGIC REACTION OCCURS, STOP USE AND SEEK MEDICAL HELP RIGHT AWAY. DO NOT USE IF YOU ARE ALLERGIC TO CHLORHEXIDINE GLUCONATE OR ANY OTHER INGREDIENTS IN THIS PRODUCT. KEEP OUT OF EYES, EARS AND MOUTH. IF AVAGARD ANTISEPTIC HAND PREPARATION SHOULD CONTACT THOSE AREAS, RINSE WITH COLD WATER RIGHT AWAY. Products containing chlorhexidine gluconate have been reported to cause serious and permanent eye injury if permitted to remain in the eye. Do not use routinely if you have wounds that involve more than the superficial layers of the skin. Irritation, sensitization and generalized allergic reactions have been reported with some chlorhexidine-containing products. If adverse reactions occur, discontinue use immediately, and, if severe, contact a physician. Keep out of reach of children. If swallowed, get medical help or contact a Poison Control Center right away.

ADVERSE REACTIONS
There were two adverse events probably or possibly related to Avagard antiseptic hand prep use in the 85 subjects who used this product in pivotal clinical trials. One subject suffered conjunctivitis and blurred vision after he rubbed his eye with a hand that had been treated with Avagard antiseptic hand prep. The other subject developed a maculopapular rash.
DIRECTIONS FOR USE

Use with care in premature infants or infants under 2 months of age. These products may cause irritation or chemical burns.

Surgical Hand Antiseptic
1. Apply to clean, dry hands and nails. For the first use of each day, clean under nails with a nail stick.
2. Dispense one pump (2 ml) of lotion into the palm of the hand.
3. Dip the fingertips of the opposite hand into the lotion and work it under the nails. Spread the remaining lotion over the hand and up to just above the elbow.
4. Using another 2 ml of lotion, repeat above steps with the other hand.
5. Dispense another 2 ml of lotion into either hand and reapply to all aspects of both hands up to the wrists.
6. Allow to dry before donning gloves.

Healthcare Personnel Hand Antiseptic
1. Apply to clean, dry hands and nails.
2. Dispense one pump (2 ml) into the palm of one hand.
3. Paying particular attention to the spaces between the fingers and under the fingernails, apply the lotion evenly to cover both hands up to the wrists.
4. Allow to dry without wiping.

HOW SUPPLIED
500 ml (16 fl oz) filled plastic bottle with wall-bracket dispenser assembly (NDC #17518-051-01)
1200 ml (40.6 fl oz) filled plastic bottle with wall-bracket dispenser assembly (NDC #17518-051-04)

Store at 20-25°C (68-77°F)

INFORMATION FOR THE USER
Skin Condition Studies
Two independent 5-day handwashing studies were performed in a total of 58 subjects with normal, healthy skin, who washed with Avagard antiseptic hand prep. In these studies, use of Avagard antiseptic hand prep was associated with little change in moisture, scaliness, erythema, or tactile roughness after repeated use, when compared to baseline condition.
