PRODUCTION (NOT COLOR ACCURATE)
problems, such as heartburn; you have high blood pressure, heart disease, liver cirrhosis, kidney disease, asthma, thyroid disease, diabetes, glaucoma, have trouble urinating due to an enlarged prostate gland, or had a stroke; you are taking a diuretic.

Ask a doctor or pharmacist before use if you are under a doctor's care for any serious condition, taking sedatives or tranquilizers, taking any other product that contains phenylephrine, ephedrine or any other nasal decongestant or antihistamine, taking aspirin for heart attack or stroke, because ibuprofen may decrease this benefit of aspirin or taking any other drug.

When using this product take with food or milk if stomach upset occurs, avoid alcoholic drinks, be careful when driving a motor vehicle or operating machinery, drowsiness may occur, alcohol, sedatives, and tranquilizers may increase drowsiness, may cause excitability especially in children.

Stop use and ask a doctor if you experience any of the following signs of stomach bleeding: feel faint, vomit blood, have bloody or black stools or have stomach pain that does not get better; you have symptoms of heart problems or stroke, chest pain, trouble breathing, weakness in one part or side of body, slurred speech, or leg swelling; pain gets worse or lasts more than 7 days, nasal congestion lasts for more than 7 days, redness or swelling is present in the painful area, you continue to have symptoms after symptoms improve; symptoms continue or get worse; any new symptoms appear.

If pregnant or breast-feeding, ask a health professional before use. It is especially important not to use ibuprofen during the last 3 months of pregnancy unless definitely needed to do so by a doctor because it may cause problems in the unborn child or complications during delivery. Keep out of reach of children.

In case of overdose, get medical help or contact a Poison Control Center right away.

Directions: Do not take more than directed.
