Indicated for the treatment of frequent heartburn* occurring 2 or more days a week

Drug Facts
Active ingredient (in each tablet) Purpose
Omeprazole delayed-release tablet 20 mg Acid reducer
(equivalent to 20.6 mg omeprazole magnesium)

Use
• treats frequent heartburn (occurs 2 or more days a week)
• not intended for immediate relief of heartburn; this drug may take 1 to 4 days for full effect

Warnings
Allergy alert: Do not use if you are allergic to omeprazole
Do not use if you have:
• trouble or pain swallowing food, vomiting with blood, or bloody or black stools
• heartburn with lightheadedness, sweating or dizziness
• chest pain or shoulder pain with shortness of breath; sweating; pain spreading to arms, neck or shoulders; or lightheadedness
• frequent chest pain
These may be signs of a serious condition. See your doctor.

Ask a doctor before use if you have:
• had heartburn over 3 months. This may be a sign of a more serious condition.
• frequent wheezing, particularly with heartburn
• unexplained weight loss • nausea or vomiting • stomach pain

Ask a doctor or pharmacist before use if you are taking a prescription drug. Acid reducers may interact with certain prescription drugs.

Stop use and ask a doctor if:
• your heartburn continues or worsens
• you need to take this product for more than 14 days
• you need to take more than 1 course of treatment every 4 months
• you get diarrhea • you develop a rash or joint pain

If pregnant or breast-feeding, ask a health professional before use.

Keep out of reach of children.

In case of overdose, get medical help or contact a Poison Control Center right away.

Directions
• for adults 18 years of age and older
• this product is to be used once a day (every 24 hours), every day for 14 days

Purpose
Acid reducer

Drug Facts
Active ingredient (in each tablet)
omeprazole delayed-release tablet 20 mg (equivalent to 20.6 mg omeprazole magnesium)

Use
• treats frequent heartburn (occurs 2 or more days a week)
• not intended for immediate relief of heartburn; this drug may take 1 to 4 days for full effect

Warnings
Allergy alert:
Do not use if you are allergic to omeprazole
Do not use if you have:
• trouble or pain swallowing food, vomiting with blood, or bloody or black stools
• heartburn with lightheadedness, sweating or dizziness
• chest pain or shoulder pain with shortness of breath; sweating; pain spreading to arms, neck or shoulders; or lightheadedness
• frequent chest pain
These may be signs of a serious condition. See your doctor.

Ask a doctor before use if you have:
• had heartburn over 3 months. This may be a sign of a more serious condition.
• frequent wheezing, particularly with heartburn
• unexplained weight loss
• nausea or vomiting
• stomach pain

Ask a doctor or pharmacist before use if you are taking a prescription drug. Acid reducers may interact with certain prescription drugs.

Stop use and ask a doctor if:
• your heartburn continues or worsens
• you need to take this product for more than 14 days
• you need to take more than 1 course of treatment every 4 months
• you get diarrhea
• you develop a rash or joint pain
