Drug Facts

Active ingredients (in each caplet)	Purposes
Naproxen sodium 220 mg (NSAID)* (naproxen 200 mg)	Pain reliever/fever reducer
Pseudoephedrine HCl 120 mg extended-release	Nasal decongestant

*nonsteroidal anti-inflammatory drug

Uses temporarily relieves these cold, sinus, and flu symptoms:
• headache
• nasal and sinus congestion (promotes sinus drainage and restores freer breathing through the nose)
• sinus pressure
• minor body aches and pains
• fever

Warnings
Allergy alert: Naproxen sodium may cause a severe allergic reaction, especially in people allergic to aspirin. Symptoms may include:
• hives • facial swelling • asthma (wheezing)
• shock • skin reddening • rash
• blisters
If an allergic reaction occurs, stop use and seek medical help right away.

Stomach bleeding warning: This product contains an NSAID, which may cause severe stomach bleeding. The chance is higher if you:
• are age 60 or older
• have had stomach ulcers or bleeding problems
• take a blood thinning (anticoagulant) or steroid drug
• take other drugs containing prescription or nonprescription NSAIDs (aspirin, ibuprofen, naproxen, or others)
• have 3 or more alcoholic drinks every day while using this product
• take more or for a longer time than directed

Drug Facts (continued)

Heart attack and stroke warning: NSAIDs, except aspirin, increase the risk of heart attack, heart failure, and stroke. These can be fatal. The risk is higher if you use more than directed or for longer than directed.

Do not use
• if you have ever had an allergic reaction to any other pain reliever/fever reducer
• right before or after heart surgery
• if you are now taking a prescription monoamine oxidase inhibitor (MAOI) (certain drugs for depression, psychiatric, or emotional conditions, or Parkinson's disease), or for 2 weeks after stopping the MAOI drug. If you do not know if your prescription drug contains an MAOI, ask a doctor or pharmacist before taking this product.

Ask a doctor before use if
• in children under 12 years of age
• the stomach bleeding warning applies to you
• you have a history of stomach problems, such as heartburn
• you have high blood pressure, heart disease, liver cirrhosis, or kidney disease, asthma, thyroid disease, diabetes, have trouble urinating due to an enlarged prostate gland, or had a stroke
• you are taking a diuretic
• you have problems or serious side effects from taking pain relievers or fever reducers

Ask a doctor or pharmacist before use if you are
• under a doctor's care for any serious condition
• taking aspirin for heart attack or stroke, because naproxen may decrease this benefit of aspirin
• taking any other drug

When using this product
• take with food or milk if stomach upset occurs

Drug Facts (continued)

Stop use and ask a doctor if
• you experience any of the following signs of stomach bleeding:
• feel faint • vomit blood • have bloody or black stools
• have stomach pain that does not get better
• you have new symptoms of heart problems or stroke:
• chest pain • weakness in one part or side of body
• slurred speech • leg swelling
• redness or swelling is present in the painful area
• any new symptoms appear
• fever gets worse or lasts more than 3 days
• you have difficulty swallowing or the caplet feels stuck in your throat
• you get nervous, dizzy, or sleepless
• nasal congestion lasts more than 7 days

If pregnant or breast-feeding, ask a health professional before use. It is especially important not to use naproxen sodium at 20 weeks or later in pregnancy unless definitely directed to do so by a doctor because it may cause problems in the unborn child or complications during delivery.

Keep out of reach of children. In case of overdose, get medical help or contact a Poison Control Center right away.

Bayer

Drug Facts (continued)
