Dear Mr. Bosco:

Please refer to your supplemental new drug applications dated May 26, 1999, received May 27, 1999, submitted under section 505(b) of the Federal Food, Drug, and Cosmetic Act for Ery-Ped<sup>®</sup> 200 mg and 400 mg (erythromycin ethylsuccinate for oral suspension, USP), NDA 50-207; E.E.S<sup>®</sup> Granules for Oral Suspension (erythromycin ethylsuccinate for oral suspension, USP), NDA 50-207; Ery-Ped<sup>®</sup> Chewable Tablets (erythromycin ethylsuccinate tablets, USP), NDA 50-297; P.C.E.<sup>®</sup> Tablets 333 mg (erythromycin particles in tablets), NDA 50-611. We note that these applications are subject to the exemption provisions contained in section 125(d)(2) of Title I of the FDA Modernization Act of 1997.

We also acknowledge receipt of your submissions dated June 4, 1999, received June 7, 1999.

These supplemental new drug applications provide for removal of recommendations by the American Heart Association and the American Dental Association for the use of erythromycin products as prophylaxis of bacterial endocarditis in product labeling. The following changes are noted in the package insert:

Under **INDICATIONS AND USAGE**, Prophylaxis subsection has been deleted.  
Under **DOSAGE AND ADMINISTRATION**, Prophylaxis subsection has been deleted.  
In the **REFERENCES** section, Reference No. "4" has been deleted.

We have completed the review of these supplemental applications and have concluded that adequate information has been presented to demonstrate that the drug product is safe and effective for use as recommended in the submitted labeling (package insert submitted May 26, 1999, and June 4, 1999). Accordingly, the supplemental applications are approved effective on the date of this letter.

Also, we remind you that these labeling changes may apply to any additional erythromycin products not listed in this letter.
