# CENTER FOR DRUG EVALUATION AND RESEARCH

**APPLICATION NUMBER:** 

205175Orig1s000

**OTHER REVIEW(S)** 

#### 505(b)(2) ASSESSMENT

Application Information				
NDA # 205175	NDA Supplement #: S-		Efficacy Supplement Type SE-	
Proprietary Name: Ecoza Established/Proper Name: econazole nitrate Dosage Form: Foam Strengths: 1%				
Applicant: AmDerma Pl	narmaceuticals, LLC			
Date of Receipt: Decem	ber 26, 2012			
PDUFA Goal Date: Octo	ober 25, 2013		Goal Date (if different): er 10, 2013	
RPM: Matthew White				
Proposed Indication(s): For the treatment of interdigital tinea pedis				

#### GENERAL INFORMATION

1)	Is this application for a recombinant or biologically-derived product and/or protein of product <i>OR</i> is the applicant relying on a recombinant or biologically-derived product protein or peptide product to support approval of the proposed product?		
	YES	NO	$\boxtimes$
	If "YES" contact the $(b)(2)$ review staff in the Immediate Office, Office of New	w Dru	ıgs.

Page 1 Version: February 2013

### INFORMATION PROVIDED VIA RELIANCE (LISTED DRUG OR LITERATURE)

2) List the information essential to the approval of the proposed drug that is provided by reliance on our previous finding of safety and efficacy for a listed drug by reliance on published literature, or by reliance on a final OTC monograph. (If not clearly identified by the applicant, this information can usually be derived from annotated labeling.)

Source of information* (e.g., published literature, name of listed drug(s), OTC final drug monograph)	Information relied-upon (e.g., specific sections of the application or labeling)
NDA 018751 Spectazole	FDA's previous finding of safety
(econazole nitrate) Cream, 1%	and effectiveness (clinical and nonclinical)

<sup>\*</sup>each source of information should be listed on separate rows, however individual literature articles should not be listed separately

3) Reliance on information regarding another product (whether a previously approved product or from published literature) must be scientifically appropriate. An applicant needs to provide a scientific "bridge" to demonstrate the relationship of the referenced and proposed products. Describe how the applicant bridged the proposed product to the referenced product(s). (Example: BA/BE studies)

To support the establishment of a clinical bridge, AmDerma included Fougera Econazole Nitrate Cream, 1% as a comparator in PK assessment trials D79-2902-07 and 0792951-109 to evaluate relative bioavailability of the Foam and the Cream formulation in adults and pediatric subjects between 12 to 18 years of age, respectively. In addition, Fougera Econazole Nitrate Cream, 1% was included as an active control in Phase 3 study 0792951-303.

Study D79-2902-07 was a multi-center, evaluator-blinded, randomized, vehicle-controlled, parallel-group study conducted to substantiate a clinical bridge between Econazole Nitrate Foam 1% and Econazole Nitrate Cream 1% based upon clinical outcome, safety, and plasma pharmacokinetic (PK) data.

Study 079-2951-109 was a multi-center, randomized, double-blind, controlled, parallel-group study to compare the steady-state pharmacokinetics of Econazole Nitrate Foam 1% and Econazole Nitrate Cream 1% in subjects aged 12 through less than 18 years with interdigital tinea pedis. The efficacy endpoints were plasma econazole nitrate concentrations and investigator assessment of response to treatment at Day 28/end-of-treatment.

Study 079-2951-303 was a Phase 3 pivotal randomized, double-blind, parallel-group, vehicle-controlled, multi-center study of the safety and efficacy of Econazole Nitrate Foam 1% relative to Foam in subjects 12 years of age with interdigital tinea pedis. Econazole Nitrate Cream 1% was included as an evaluator-blinded comparator for safety purposes only to support a clinical bridge between Econazole Nitrate Foam 1% and Econazole Nitrate Cream 1%. The primary efficacy endpoint was the proportion of subjects who achieved complete cure at 2 weeks post-treatment (Day 43). Effective treatment and mycological cure were the secondary efficacy endpoints.

#### RELIANCE ON PUBLISHED LITERATURE

Page 2

Version: February 2013

4)	(a) Regardless of whether the applicant has e to support their application, is reliance on pu approval of the proposed drug product (i.e., t published literature)?	blished literature necessary	to support the

7)	If this is a (b)(2) supplement to an original (b) the same listed drug(s) as the original (b)(2) at this application is a (b)(2) supplement to an	application? $N/A \boxtimes YE$ original (b)(1) application	S NO

Page 3 Version: February 2013

If "NO", please contact the (b)(2) review staff in the Immediate Office, Office of New Drugs. 8) Were any of the listed drug(s) relied upon for this application: a) Approved in a 505(b)(2) application? YES NO If "YES", please list which drug(s). Name of drug(s) approved in a 505(b)(2) application: b) Approved by the DESI process? YES NO If "YES", please list which drug(s). Name of drug(s) approved via the DESI process: c) Described in a final OTC drug monograph? YES NO If "YES", please list which drug(s). Name of drug(s) described in a final OTC drug monograph: d) Discontinued from marketing? NO YES  $\boxtimes$ If "YES", please list which drug(s) and answer question d) i. below. *If "NO"*, proceed to question #9. Name of drug(s) discontinued from marketing: Spectazole (econazole nitrate) Cream, 1% i) Were the products discontinued for reasons related to safety or effectiveness?  $\boxtimes$ (Information regarding whether a drug has been discontinued from marketing for reasons of safety or effectiveness may be available in the Orange Book. Refer to section 1.11 for an explanation, and section 6.1 for the list of discontinued drugs. If a determination of the reason for discontinuation has not been published in the Federal Register (and noted in the Orange Book), you will need to research the archive file and/or consult with the review team. Do not rely solely on any statements made by the sponsor.) 9) Describe the change from the listed drug(s) relied upon to support this (b)(2) application (for example, "This application provides for a new indication, otitis media" or "This application provides for a change in dosage form, from capsule to solution"). This application provides for a change in dosage form, from cream to foam. The purpose of the following two questions is to determine if there is an approved drug product that is equivalent or very similar to the product proposed for approval that should be referenced as a listed drug in the pending application.

The assessment of pharmaceutical equivalence for a recombinant or biologically-derived product and/or protein or peptide product is complex. If you answered **YES to question** #1, proceed to

question #12; if you answered **NO to question #1**, proceed to question #10 below.

Page 4 Version: *February 2013* 

10) (a) Is there a pharmaceutical equivalent(s) to the product proposed in the 505(b)(2) application that is already approved (via an NDA or ANDA)?

(Pharmaceutical equivalents are drug products in identical dosage forms intended for the same route of administration that: (1) contain identical amounts of the identical active drug ingredient, i.e., the same salt or ester of the same therapeutic moiety, or, in the case of modified release dosage forms that require a reservoir or overage or such forms as prefilled syringes where residual volume may vary, that deliver identical amounts of the active drug ingredient over the identical dosing period; (2) do not necessarily contain the same inactive ingredients; and (3) meet the identical compendial or other applicable standard of identity, strength, quality, and purity, including potency and, where applicable, content uniformity, disintegration times, and/or dissolution rates. (21 CFR 320.1(c), FDA's "Approved Drug Products with Therapeutic Equivalence Evaluations" (the Orange Book)).

**Note** that for proposed combinations of one or more previously approved drugs, a pharmaceutical equivalent must also be a combination of the same drugs.

	YES		NO	$\boxtimes$
If " <b>NO</b> " to (a), answer (b) and (c) the	· •	•		
(b) Is the pharmaceutical equivalent approved for the same indi 505(b)(2) application is seeking approval?	ication	for which	the	
505(0)(2) application is seeking approvar:	YES		NO	
(c) Is the listed drug(s) referenced by the application a pharmatical N/A $\hfill\Box$	ceutica YES	l equivale	ent? NO	

If this application relies only on non product-specific published literature, answer "N/A" If "YES" to (c) <u>and</u> there are no additional pharmaceutical equivalents listed, proceed to question #12.

If "NO" <u>or</u> if there are additional pharmaceutical equivalents that are not referenced by the application, list the NDA pharmaceutical equivalent(s); you do <u>not</u> have to individually list all of the products approved as ANDAs, but please note below if approved approved generics are listed in the Orange Book. Please also contact the (b)(2) review staff in the Immediate Office, Office of New Drugs.

Pharmaceutical equivalent(s):

11) (a) Is there a pharmaceutical alternative(s) already approved (via an NDA or ANDA)?

(Pharmaceutical alternatives are drug products that contain the identical therapeutic moiety, or its precursor, but not necessarily in the same amount or dosage form or as the same salt or ester. Each such drug product individually meets either the identical or its own respective compendial or other applicable standard of identity, strength, quality, and purity, including potency and, where applicable, content uniformity, disintegration times and/or dissolution rates. (21 CFR 320.1(d)) Different dosage forms and strengths within a product line by a single manufacturer are thus pharmaceutical alternatives, as are extended-release products when compared with immediate- or standard-release formulations of the same active ingredient.)

	t for proposed combinations of one or more pre we must also be a combination of the same drug		approved	drugs,	a pharmac	ceutical

with coumarins (warf (FAERS) and medica All the drug interaction body surface area and	farin and Il literatu on cases I/or unde	g interactions between topical econazole nitrate and acenocoumarol) reported in the FDA Adverse Evere. This has resulted in an increase in the anticoagus were reported following application of topical econor occlusion. There have been no cases reported in son potential of econazole nitrate has not been evaluated.	ent Reporting System ulant effect of warfarin. nazole nitrate to large subjects with interdigital

2. Describe the particular review issue and the goal of the study/clinical trial. If the study/clinical trial is a FDAAA PMR, describe the risk. If the FDAAA PMR is created post-approval, describe the "new safety information."

PMR/PMC Development Template

This study will evaluate the in-vitro potential of econazole to inhibit enzymes CYP1A2, 2B6, 2C8, 2C9, 2C19, 2D6 and 3A4 or induce CYP1A2, CYP2B6 and CYP3A. The results will be compared with the systemic econazole concentration expected from clinical use to determine whether there is a potential for in-vivo drug interaction. Additional in-vivo drug interaction trials may be needed based on in-vitro results. Inhibition potential may lead to increased exposure to interacting drug and potentially increased adverse reactions. Induction potential may lead to decrease exposure to interacting drug and potentially lead to decreased efficacy.

3.

4.

Reference ID: 3392972

	the study/clinical trial is a PMR, check the applicable regulation.  Inot a PMR, skip to 4.
-	Which regulation?
	<ul> <li>☐ Accelerated Approval (subpart H/E)</li> <li>☐ Animal Efficacy Rule</li> <li>☐ Pediatric Research Equity Act</li> <li>☑ FDAAA required safety study/clinical trial</li> </ul>
_	If the PMR is a FDAAA safety study/clinical trial, does it: (check all that apply)
	Assess a known serious risk related to the use of the drug? Assess signals of serious risk related to the use of the drug?  X Identify an unexpected serious risk when available data indicate the potential for a serious risk?
-	If the PMR is a FDAAA safety study/clinical trial, will it be conducted as:
	Analysis of spontaneous postmarketing adverse events? <b>Do not select the above study/clinical trial type if:</b> such an analysis will not be sufficient to assess or identify a serious risk
	Analysis using pharmacovigilance system? <b>Do not select the above study/clinical trial type if:</b> the new pharmacovigilance system that the FDA is required to establish under section 505(k)(3) has not yet been established and is thus not sufficient to assess this known serious risk, or has been established but is nevertheless not sufficient to assess or identify a serious risk
	Study: all other investigations, such as investigations in humans that are not clinical trials as defined below (e.g., observational epidemiologic studies), animal studies, and laboratory experiments?  *Do not select the above study type if: a study will not be sufficient to identify or assess a serious risk
	Clinical trial: any prospective investigation in which the sponsor or investigator determines the method of assigning investigational product or other interventions to one or more human subjects?
	hat type of study or clinical trial is required or agreed upon (describe and check type below)? If the study trial will be performed in a subpopulation, list here.
v	In-vitro CYP inhibition and induction studies. In-vivo assessment may be needed only if in- ritro results indicate potential for in-vivo drug interaction.

PMR/PMC Development Template Last Updated 10/18/2013 P

	<u>Required</u>
	<ul> <li>☐ Observational pharmacoepidemiologic study</li> <li>☐ Registry studies</li> <li>☐ Primary safety study or clinical trial</li> <li>☐ Pharmacogenetic or pharmacogenomic study or clinical trial if required to further assess safety</li> <li>☐ Thorough Q-T clinical trial</li> <li>☐ Nonclinical (animal) safety study (e.g., carcinogenicity, reproductive toxicology)</li> <li>☐ Nonclinical study (laboratory resistance, receptor affinity, quality study related to safety)</li> <li>☐ Pharmacokinetic studies or clinical trials</li> </ul>
	☐ Drug interaction or bioavailability studies or clinical trials ☐ Dosing trials Continuation of Question 4
	Additional data or analysis required for a previously submitted or expected study/clinical trial (provide explanation)
	<ul> <li>Meta-analysis or pooled analysis of previous studies/clinical trials</li> <li>Immunogenicity as a marker of safety</li> <li>Other (provide explanation)</li> </ul>
	Agreed upon:
	<ul> <li>Quality study without a safety endpoint (e.g., manufacturing, stability)</li> <li>Pharmacoepidemiologic study not related to safe drug use (e.g., natural history of disease, background rates of adverse events)</li> <li>Clinical trials primarily designed to further define efficacy (e.g., in another condition, different disease</li> </ul>
	severity, or subgroup) that are NOT required under Subpart H/E  Dose-response study or clinical trial performed for effectiveness  Nonclinical study, not safety-related (specify)
	Other
5.	Is the PMR/PMC clear, feasible, and appropriate?
	<ul> <li>☑ Does the study/clinical trial meet criteria for PMRs or PMCs?</li> <li>☑ Are the objectives clear from the description of the PMR/PMC?</li> <li>X Has the applicant adequately justified the choice of schedule milestone dates?</li> <li>X Has the applicant had sufficient time to review the PMRs/PMCs, ask questions, determine feasibility, and contribute to the development process?</li> </ul>
	Check if this form describes a FDAAA PMR that is a randomized controlled clinical trial
	If so, does the clinical trial meet the following criteria?
	<ul> <li>☐ There is a significant question about the public health risks of an approved drug</li> <li>☐ There is not enough existing information to assess these risks</li> <li>☐ Information cannot be gained through a different kind of investigation</li> <li>☐ The trial will be appropriately designed to answer question about a drug's efficacy and safety, and</li> <li>☐ The trial will emphasize risk minimization for participants as the protocol is developed</li> </ul>

PMR/PMC Development Template

PM	R/P	MC Development Coordinator:
	X	This PMR/PMC has been reviewed for clarity and consistency, and is necessary to further refine the safety, efficacy, or optimal use of a drug, or to ensure consistency and reliability of drug quality.
	(si	gnature line for BLAs)

TATIANA OUSSOVA 10/21/2013

### SEALD Director Sign-Off Review of the End-of-Cycle Prescribing Information: Outstanding Format Deficiencies

<b>Product Title</b>	ECOZA (econazole nitrate) topical foam, 1%
Applicant	Amderma Pharmaceuticals LLC
Application/Supplement Number	NDA 205175
Type of Application	Original Submission
	for the treatment of interdigital tinea pedis caused by
Indication(a)	Trichophyton rubrum, Trichophyton mentagrophytes, and
Indication(s)	Epidermophyton floccosum in patients 12 years of age and
	older
Established Pharmacologic Class <sup>1</sup>	azole antifungal
Office/Division	ODE III/DDDP
Division Project Manager	Matthew White
Date FDA Received Application	December 26, 2012
Goal Date	October 26, 2013
Date PI Received by SEALD	October 7, 2013
SEALD Review Date	October 7, 2013
SEALD Labeling Reviewer	Jeanne M. Delasko
SEALD Division Director	Laurie Burke

PI = prescribing information

This Study Endpoints and Labeling Development (SEALD) Director Sign-Off review of the end-of-cycle, draft prescribing information (PI) for critical format elements reveals <u>outstanding labeling</u> <u>format deficiencies that must be corrected</u> before the final PI is approved. After these outstanding labeling format deficiencies are corrected, the SEALD Director will have no objection to the approval of this PI.

The critical format elements include labeling regulation (21 CFR 201.56 and 201.57), labeling guidance, and best labeling practices (see list below). This review does not include every regulation or guidance that pertains to PI format.

<u>Guide to the Selected Requirements of Prescribing Information (SRPI) Checklist</u>: For each SRPI item, one of the following 3 response options is selected:

- **NO:** The PI does not meet the requirement for this item (deficiency).
- YES: The PI meets the requirement for this item (not a deficiency).
- N/A (not applicable): This item does not apply to the specific PI under review.

<sup>&</sup>lt;sup>1</sup> The established pharmacologic class (EPC) that appears in the final draft PI.

#### Highlights (HL)

#### **GENERAL FORMAT**

NO

1. Highlights (HL) must be in two-column format, with ½ inch margins on all sides and in a minimum of 8-point font.

<u>Comment:</u> Right margin is greater than 1/2 inch (almost one inch); margin between the two columns is one inch. Must have 1/2 inch margins on all sides.

**YES** 

2. The length of HL must be less than or equal to one-half page (the HL Boxed Warning does not count against the one-half page requirement) unless a waiver has been is granted in a previous submission (i.e., the application being reviewed is an efficacy supplement).

<u>Instructions to complete this item</u>: If the length of the HL is less than or equal to one-half page then select "YES" in the drop-down menu because this item meets the requirement. However, if HL is longer than one-half page:

#### ➤ For the Filing Period (for RPMs)

- For efficacy supplements: If a waiver was previously granted, select "YES" in the drop-down menu because this item meets the requirement.
- For NDAs/BLAs and PLR conversions: Select "NO" in the drop-down menu because this item does not meet the requirement (deficiency). The RPM notifies the Cross-Discipline Team Leader (CDTL) of the excessive HL length and the CDTL determines if this deficiency is included in the 74-day or advice letter to the applicant.

#### ➤ For the End-of Cycle Period (for SEALD reviewers)

The SEALD reviewer documents (based on information received from the RPM) that a waiver has been previously granted or will be granted by the review division in the approval letter.

#### Comment:

3. All headings in HL must be presented in the center of a horizontal line, in UPPER-CASE letters and **bolded**.

#### Comment:

YES

4. White space must be present before each major heading in HL.

#### Comment:

NO

5. Each summarized statement in HL must reference the section(s) or subsection(s) of the Full Prescribing Information (FPI) that contains more detailed information. The preferred format is the numerical identifier in parenthesis [e.g., (1.1)] at the end of each information summary (e.g. end of each bullet).

<u>Comment</u>: At end of statement for most common adverse reactions in HL, reference "(6.1)," not "(6)."

**YES** 

6. Section headings are presented in the following order in HL:

Section	Required/Optional
Highlights Heading	Required
Highlights Limitation Statement	Required
Product Title	Required
Initial U.S. Approval	Required

Boxed Warning	Required if a Boxed Warning is in the FPI
Recent Major Changes	Required for only certain changes to PI*
Indications and Usage	Required
Dosage and Administration	Required
Dosage Forms and Strengths	Required
Contraindications	Required (if no contraindications must state "None.")
Warnings and Precautions	Not required by regulation, but should be present
Adverse Reactions	Required
Drug Interactions	Optional
Use in Specific Populations	Optional
Patient Counseling Information Statement	Required
Revision Date	Required

<sup>\*</sup> RMC only applies to the Boxed Warning, Indications and Usage, Dosage and Administration, Contraindications, and Warnings and Precautions sections.

#### Comment:

**YES** 

7. A horizontal line must separate HL and Table of Contents (TOC).

#### Comment:

#### HIGHLIGHTS DETAILS

#### **Highlights Heading**

8. At the beginning of HL, the following heading must be **bolded** and appear in all UPPER CASE letters: "HIGHLIGHTS OF PRESCRIBING INFORMATION".

#### Comment:

#### **Highlights Limitation Statement**

9. The **bolded** HL Limitation Statement must be on the line immediately beneath the HL heading and must state: "These highlights do not include all the information needed to use (insert name of drug product in UPPER CASE) safely and effectively. See full prescribing information for (insert name of drug product in UPPER CASE)."

#### Comment:

#### **Product Title**

**YES** 

10. Product title in HL must be **bolded.** 

#### Comment:

#### **Initial U.S. Approval**

**YES** 

11. Initial U.S. Approval in HL must be placed immediately beneath the product title, **bolded**, and include the verbatim statement "**Initial U.S. Approval:**" followed by the **4-digit year**.

#### Comment:

#### **Boxed Warning**

N/A

12. All text must be **bolded**.

#### Comment:

13. Must have a centered heading in UPPER-CASE, containing the word "WARNING" (even if more than one Warning, the term, "WARNING" and not "WARNINGS" should be used) and other words to identify the subject of the Warning (e.g., "WARNING: SERIOUS INFECTIONS").

#### Comment:

N/A 14. Must always have the verbatim statement "See full prescribing information for complete boxed warning." in *italics* and centered immediately beneath the heading.

#### Comment:

N/A 15. Must be limited in length to 20 lines (this does not include the heading and statement "See full prescribing information for complete boxed warning.")

#### Comment:

N/A 16. Use sentence case for summary (combination of uppercase and lowercase letters typical of that used in a sentence).

#### Comment:

#### **Recent Major Changes (RMC)**

N/A 17. Pertains to only the following five sections of the FPI: Boxed Warning, Indications and Usage, Dosage and Administration, Contraindications, and Warnings and Precautions.

#### **Comment:**

N/A 18. Must be listed in the same order in HL as they appear in FPI.

#### Comment:

N/A

19. Includes heading(s) and, if appropriate, subheading(s) of labeling section(s) affected by the recent major change, together with each section's identifying number and date (month/year format) on which the change was incorporated in the PI (supplement approval date). For example, "Dosage and Administration, Coronary Stenting (2.2) --- 3/2012".

#### Comment:

N/A

20. Must list changes for at least one year after the supplement is approved and must be removed at the first printing subsequent to one year (e.g., no listing should be one year older than revision date).

#### Comment:

#### **Indications and Usage**

YES 21. If a product belongs to an established pharmacologic class, the following statement is required in the Indications and Usage section of HL: "(Product) is a (name of established pharmacologic class) indicated for (indication)".

#### **Comment:**

#### **Dosage Forms and Strengths**

**N/A** 22. For a product that has several dosage forms, bulleted subheadings (e.g., capsules, tablets, injection, suspension) or tabular presentations of information is used.

#### Comment:

#### **Contraindications**

YES 23. All contraindications listed in the FPI must also be listed in HL or must include the statement "None" if no contraindications are known.

#### Comment:

N/A Page 4 of 8

24. Each contraindication is bulleted when there is more than one contraindication.

#### **Comment:**

#### **Adverse Reactions**

**YES** 

25. For drug products other than vaccines, the verbatim **bolded** statement must be present: "**To** report SUSPECTED ADVERSE REACTIONS, contact (insert name of manufacturer) at (insert manufacturer's U.S. phone number) or FDA at 1-800-FDA-1088 or www.fda.gov/medwatch".

**Comment:** 

#### **Patient Counseling Information Statement**

YES

26. Must include one of the following three **bolded** verbatim statements (without quotation marks):

If a product **does not** have FDA-approved patient labeling:

• "See 17 for PATIENT COUNSELING INFORMATION"

If a product has FDA-approved patient labeling:

- "See 17 for PATIENT COUNSELING INFORMATION and FDA-approved patient labeling."
- "See 17 for PATIENT COUNSELING INFORMATION and Medication Guide." Comment:

#### **Revision Date**

YES

27. Bolded revision date (i.e., "Revised: MM/YYYY or Month Year") must be at the end of HL.

#### Comment:

#### **Contents: Table of Contents (TOC)**

#### **GENERAL FORMAT**

YES

28. A horizontal line must separate TOC from the FPI.

#### **Comment**:

YES

29. The following **bolded** heading in all UPPER CASE letters must appear at the beginning of TOC: "FULL PRESCRIBING INFORMATION: CONTENTS".

#### **Comment:**

YES

30. The section headings and subheadings (including title of the Boxed Warning) in the TOC must match the headings and subheadings in the FPI.

#### **Comment:**

N/A

31. The same title for the Boxed Warning that appears in the HL and FPI must also appear at the beginning of the TOC in UPPER-CASE letters and **bolded**.

#### **Comment**:

**YES** 

32. All section headings must be **bolded** and in UPPER CASE.

#### Comment:

**YES** 33. All subsection headings must be indented, not bolded, and in title case.

#### **Comment:**

**YES** 34. When a section or subsection is omitted, the numbering does not change.

#### **Comment:**

YES 35. If a section or subsection from 201.56(d)(1) is omitted from the FPI and TOC, the heading "FULL PRESCRIBING INFORMATION: CONTENTS" must be followed by an asterisk and the following statement must appear at the end of TOC: "\*Sections or subsections omitted from the Full Prescribing Information are not listed."

#### Comment:

#### **Full Prescribing Information (FPI)**

#### **GENERAL FORMAT**

YES 36. The following heading must appear at the beginning of the FPI in UPPER CASE and **bolded**: "FULL PRESCRIBING INFORMATION".

#### Comment:

YES 37. All section and subsection headings and numbers must be **bolded**.

#### Comment:

YES 38. The **bolded** section and subsection headings must be named and numbered in accordance with 21 CFR 201.56(d)(1) as noted below. If a section/subsection is omitted, the numbering does not change.

N/A

#### **FULL PRESCRIBING INFORMATION DETAILS**

#### **Boxed Warning**

42. All text is **bolded**.

#### Comment:

N/A

43. Must have a heading in UPPER-CASE, containing the word "WARNING" (even if more than one Warning, the term, "WARNING" and not "WARNINGS" should be used) and other words to identify the subject of the Warning (e.g., "WARNING: SERIOUS INFECTIONS").

#### **Comment:**

44. Use sentence case (combination of uppercase and lowercase letters typical of that used in a sentence) for the information in the Boxed Warning.

#### **Comment:**

#### **Contraindications**

**YES** 45. If no Contraindications are known, this section must state "None".

#### **Comment:**

#### **Adverse Reactions**

YES 46. When clinical trials adverse reactions data is included (typically in the "Clinical Trials Experience" subsection of Adverse Reactions), the following verbatim statement or appropriate modification should precede the presentation of adverse reactions:

"Because clinical trials are conducted under widely varying conditions, adverse reaction rates observed in the clinical trials of a drug cannot be directly compared to rates in the clinical trials of another drug and may not reflect the rates observed in clinical practice."

#### Comment:

47. When postmarketing adverse reaction data is included (typically in the "Postmarketing Experience" subsection of Adverse Reactions), the following verbatim statement or appropriate modification should precede the presentation of adverse reactions:

"The following adverse reactions have been identified during post-approval use of (insert drug name). Because these reactions are reported voluntarily from a population of uncertain size, it is not always possible to reliably estimate their frequency or establish a causal relationship to drug exposure."

#### **Comment:**

#### **Patient Counseling Information**

- 48. Must reference any FDA-approved patient labeling, include the type of patient labeling, and use one of the following statements at the beginning of Section 17:
  - "See FDA-approved patient labeling (Medication Guide)"
  - "See FDA-approved patient labeling (Medication Guide and Instructions for Use)"
  - "See FDA-approved patient labeling (Patient Information)"
  - "See FDA-approved patient labeling (Instructions for Use)"
  - "See FDA-approved patient labeling (Patient Information and Instructions for Use)"

Through: Barbara Fuller, RN, MSN, CWOCN

Team Leader, Patient Labeling

**Division of Medical Policy Programs (DMPP)** 

From: Karen Dowdy, RN, BSN

Patient Labeling Reviewer

**Division of Medical Policy Programs (DMPP)** 

Kemi Asante, Pharm. D. Regulatory Review Officer

Office of Prescription Drug Promotion (OPDP)

Subject: Review of Patient Labeling: Patient Package Insert (PPI)

and Instructions for Use (IFU)

Drug Name (established

name):

Ecoza (econazole nitrate)

Dosage Form and Route: Foam, 1%, For topical use

Application NDA 205-175

Type/Number:

Applicant: AmDerma Pharmaceuticals, LLC

#### 1 INTRODUCTION

On December 26, 2012, AmDerma Pharmaceuticals, LLC submitted for the Agency's review an original New Drug Application (NDA) 205-175 for Ecoza (econazole nitrate) Foam, with the proposed indication for the treatment of interdigital tinea pedis

This collaborative review is written by the Division of Medical Policy Programs (DMPP) and the Office of Prescription Drug Promotion (OPDP) in response to the requests by the Division of Dermatology and Dental Products (DDDP) on February 11, 2013, for DMPP and OPDP to review the Applicant's proposed Patient Package Insert (PPI) and Instructions for Use (IFU) for Ecoza (econazole nitrate) Foam.

#### 2 MATERIAL REVIEWED

- Draft Ecoza (econazole nitrate) Foam Patient Package Insert (PPI) and Instructions for Use (IFU) received on December 26, 2012, revised by the Review Division throughout the review cycle, and received by DMPP and OPDP on August 9, 2013.
- Draft Ecoza (econazole nitrate) Foam Prescribing Information (PI) received on December 26, 2012 revised by the Review Division throughout the review cycle, and received by DMPP and OPDP on August 9, 2013.
- Division of Medication Error Prevention and Analysis (DMEPA) Review of Ecoza (Econazole Nitrate) Foam, 1%, Label, Labeling, and Packaging Review dated July 18, 2013.

#### 3 REVIEW METHODS

To enhance patient comprehension, materials should be written at a 6<sup>th</sup> to 8<sup>th</sup> grade reading level, and have a reading ease score of at least 60%. A reading ease score of 60% corresponds to an 8<sup>th</sup> grade reading level. In our review of the PPI and IFU the target reading level is at or below an 8<sup>th</sup> grade level.

Additionally, in 2008 the American Society of Consultant Pharmacists Foundation (ASCP) in collaboration with the American Foundation for the Blind (AFB) published *Guidelines for Prescription Labeling and Consumer Medication Information for People with Vision Loss.* The ASCP and AFB recommended using fonts such as Verdana, Arial or APHont to make medical information more accessible for patients with vision loss. We have reformatted the PPI document using the Verdana font, size 10 and the IFU document using the Verdana font, size 11.

In our collaborative review of the PPI and IFU we have:

- simplified wording and clarified concepts where possible
- ensured that the PPI and IFU are consistent with the Prescribing Information (PI)

- removed unnecessary or redundant information
- ensured that the PPI and IFU meet the criteria as specified in FDA's Guidance for Useful Written Consumer Medication Information (published July 2006)
- The enclosed IFU review comments are collaborative DMPP and DMEPA.

#### 4 CONCLUSIONS

The PPI and IFU are acceptable with our recommended changes.

#### 5 RECOMMENDATIONS

- Please send these comments to the Applicant and copy DMPP and OPDP on the correspondence.
- Our collaborative review of the PPI and IFU are appended to this memorandum. Consult DMPP and OPDP regarding any additional revisions made to the PI to determine if corresponding revisions need to be made to the PPI or IFU.

Please let us know if you have any questions.

#### Memorandum

Date: August 21, 2013

To: Matthew White, Regulatory Project Manager

**Division of Dermatology and Dental Products (DDDP)** 

From: Kemi Asante, PharmD, Regulatory Review Officer

Office of Prescription Drug Promotion (OPDP)

Subject: NDA 205175 – Ecoza (econazole nitrate) Foam, 1%

As requested in DDDP's consult dated February 11, 2013, OPDP has reviewed the Ecoza prescribing information (PI), patient package insert (PPI) and carton/container labeling.

OPDP's comments on the PI are provided directly below in the proposed substantially complete version of the PI sent via email by DDDP on August 9, 2013. Comments on the PPI will be provided under separate cover as a collaborative review between OPDP and the Division of Medical Policy Programs (DMPP). OPDP has no comments on the carton/container labeling at this time.

Thank you for your consult. If you have any questions please contact me at 301-796-7425 or at Kemi.Asante@fda.hhs.gov.

#### 1 INTRODUCTION

This review evaluates the proposed container label, carton and insert labeling for Ecoza (Econazole Nitrate) Foam NDA 205175 for areas of vulnerability that could lead to medication errors.

#### 1.1 REGULATORY HISTORY

Ecoza (Econazole Nitrate) Foam, 1% (NDA 205175) is currently under review. The proposed proprietary name Ecoza was found conditionally acceptable in OSE review 2013-320.

#### 1.2 PRODUCT INFORMATION

The following product information is provided in the January 29, 2013 proprietary name submission.

- Active Ingredient: Econazole Nitrate
- Indication of Use: Treatment of interdigital tinea pedis

(b) (4)

- Route of Administration: Topical
- Dosage Form: Foam
- Strength: 1 %
- Dose and frequency: Apply topically to affected area once daily for four weeks.
- How Supplied: 10 grams (sample), 70 grams
   (b) (4)
- Storage: (b) (4) excursions permitted to 15°-30°C (59°-86 °F)
- Container and Closure Systems: Pressurized aluminum can with a valve and an actuator with an overcap.

#### 2 METHODS AND MATERIALS REVIEWED

DMEPA reviewed the Ecoza container labels, carton and package insert labeling submitted by the Applicant.

#### 2.1 LABELS AND LABELING

Using the principles of human factors and Failure Mode and Effects Analysis,<sup>1</sup> the Division of Medication Error Prevention and Analysis (DMEPA) evaluated the following:

<sup>&</sup>lt;sup>1</sup> Institute for Healthcare Improvement (IHI). Failure Modes and Effects Analysis. Boston. IHI:2004.

- Container Labels and Carton Labeling submitted March 15, 2013 (Appendices A and B)
- Insert Labeling submitted March 15, 2013

#### 3 INTEGRATED SUMMARY OF MEDICATION ERROR RISK ASSESMENT

Ecoza is a new dosage form (foam) of a molecule that has been available since 1982 (i.e. RLD Spectazole) in a cream formulation. The following table compares the product characteristics of the proposed econazole foam vs. the currently marketed econazole cream.

Characteristics	Foam	Cream
Indications	Interdigital tinea pedis	Tinea pedis, tinea cruris, tinea corporis, cutaneous candidiasis, and tinea versicolor
Dosage	Apply to affected area once daily for four weeks	Tinea pedis: Apply to affected area once daily for 4 weeks.
		Tinea cruris, tinea corporis and tinea versicolor: Apply to affected area once daily for two weeks.
		Cutaneous candidiasis: Apply to affected area twice daily for two weeks.
Package sizes	70 g <sup>(b) (4)</sup> aerosol cans	15 g, 30 g, 85 g (b) (4) tubes

The Applicant is proposing to market Ecoza in 70 g aerosol cans. The proposed packaging configurations are in line with other prescription medications approved for the treatment of tineas.

We reviewed the container labels and carton labeling and noted that the presentation of the established name, dosage form and strength does not follow current standards. The strength statement should

follow the dosage form.		
	(b) (4)	

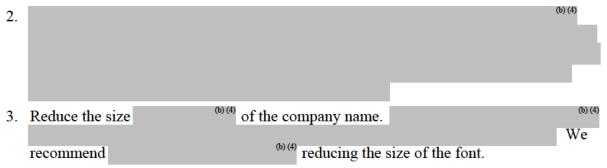

#### 5 RECOMMENDATIONS

#### 5.1 Comments to the Applicant

DMEPA recommends the following be implemented prior to approval of this Application.

#### A. Proposed Container Labels and Carton Labeling (all packaging sizes)

- 4. Relocate the route of administration statement "For Topical Use Only" to the principal display panel and increase its prominence by increasing the font size, bolding, and/or using color. Place this statement in the space
- 5. Relocate the statement "Not for ophthalmic, oral or intravaginal use" to the principal display panel immediately below the statement "For Topical Use Only". Do not use bold font or color, as this statement should not be more prominent than the intended route of administration.
- 6. Revise and relocate the statement "Keep Out of Reach of Children" to the principal display panel immediately below and at the same prominence than the route of administration statement. For example:

#### For Topical Use Only

Not for ophthalmic, oral or intravaginal use

#### Keep Out of Reach of Children

- 7. Delete the statement statement
- 8. Revise the Usual Dosage statement to read "Apply once daily for 4 weeks. See Prescribing Information."

#### B. Proposed Carton Labeling (Sample package)

1. Revise the net quantity statament 10 g").

If you have further questions or need clarifications, please contact Janet Anderson, project manager, at 301-796-0675.

If another product has orphan exclusivity, is the product considered to be the same product according to the orphan drug definition of sameness [see 21 CFR 316.3(b)(13)]?		х		
If yes, consult the Director, Division of Regulatory Policy II, Office of Regulatory Policy				
Has the applicant requested 5-year or 3-year Waxman-Hatch exclusivity? (NDAs/NDA efficacy supplements only)	x			
If yes, # years requested: 3				
<b>Note:</b> An applicant can receive exclusivity without requesting it; therefore, requesting exclusivity is not required.				
Is the proposed product a single enantiomer of a racemic drug previously approved for a different therapeutic use ( <i>NDAs only</i> )?		х		
If yes, did the applicant: (a) elect to have the single enantiomer (contained as an active ingredient) not be considered the same active ingredient as that contained in an already approved racemic drug, and/or (b): request exclusivity pursuant to section 505(u) of the Act (per FDAAA Section 1113)?			X	
If yes, contact Mary Ann Holovac, Director of Drug Information, OGD/DLPS/LRB.				

Format and Content					
Do not check mixed submission if the only electronic component is the content of labeling (COL).	☐ All paper (except for COL) ☐ All electronic ☐ Mixed (paper/electronic)				
	□ CTD     □ Non-CTD     □ Mixed (CTD/non-CTD)				
If mixed (paper/electronic) submission, which parts of the application are submitted in electronic format?					
Overall Format/Content	YES	NO	NA	Comment	
If electronic submission, does it follow the eCTD guidance? <sup>1</sup> If not, explain (e.g., waiver granted).	X			Some disorganization has been noted re: CRFs, datasets, etc. eSUB team working with applicant to rectify.

#### Appendix A (NDA and NDA Supplements only)

NOTE: The term "original application" or "original NDA" as used in this appendix denotes the NDA submitted. It does not refer to the reference drug product or "reference listed drug."

An original application is likely to be a 505(b)(2) application if:

- (1) it relies on published literature to meet any of the approval requirements, and the applicant does not have a written right of reference to the underlying data. If published literature is cited in the NDA but is not necessary for approval, the inclusion of such literature will not, in itself, make the application a 505(b)(2) application,
- (2) it relies for approval on the Agency's previous findings of safety and efficacy for a listed drug product and the applicant does not own or have right to reference the data supporting that approval, or
- (3) it relies on what is "generally known" or "scientifically accepted" about a class of products to support the safety or effectiveness of the particular drug for which the applicant is seeking approval. (Note, however, that this does not mean *any* reference to general information or knowledge (e.g., about disease etiology, support for particular endpoints, methods of analysis) causes the application to be a 505(b)(2) application.)

Types of products for which 505(b)(2) applications are likely to be submitted include: fixed-dose combination drug products (e.g., heart drug and diuretic (hydrochlorothiazide) combinations); OTC monograph deviations (see 21 CFR 330.11); new dosage forms; new indications; and, new salts.

An efficacy supplement can be either a (b)(1) or a (b)(2) regardless of whether the original NDA was a (b)(1) or a (b)(2).

An efficacy supplement is a 505(b)(1) supplement if the supplement contains all of the information needed to support the approval of the change proposed in the supplement. For example, if the supplemental application is for a new indication, the supplement is a 505(b)(1) if:

- (1) The applicant has conducted its own studies to support the new indication (or otherwise owns or has right of reference to the data/studies),
- (2) No additional information beyond what is included in the supplement or was embodied in the finding of safety and effectiveness for the original application or previously approved supplements is needed to support the change. For example, this would likely be the case with respect to safety considerations if the dose(s) was/were the same as (or lower than) the original application, and.
- (3) All other "criteria" are met (e.g., the applicant owns or has right of reference to the data relied upon for approval of the supplement, the application does not rely

for approval on published literature based on data to which the applicant does not have a right of reference).

An efficacy supplement is a 505(b)(2) supplement if:

- (1) Approval of the change proposed in the supplemental application would require data beyond that needed to support our previous finding of safety and efficacy in the approval of the original application (or earlier supplement), and the applicant has not conducted all of its own studies for approval of the change, or obtained a right to reference studies it does not own. For example, if the change were for a new indication AND a higher dose, we would likely require clinical efficacy data and preclinical safety data to approve the higher dose. If the applicant provided the effectiveness data, but had to rely on a different listed drug, or a new aspect of a previously cited listed drug, to support the safety of the new dose, the supplement would be a 505(b)(2),
- (2) The applicant relies for approval of the supplement on published literature that is based on data that the applicant does not own or have a right to reference. If published literature is cited in the supplement but is not necessary for approval, the inclusion of such literature will not, in itself, make the supplement a 505(b)(2) supplement, or
- (3) The applicant is relying upon any data they do not own or to which they do not have right of reference.

If you have questions about whether an application is a 505(b)(1) or 505(b)(2) application, consult with your OND ADRA or OND IO.

This is a representation of an electronic record that was signed electronically and this page is the manifestation of the electronic signature.

CRISTINA Petruccelli Attinello 02/22/2013

# REGULATORY PROJECT MANAGER PHYSICIAN'S LABELING RULE (PLR) FORMAT REVIEW OF THE PRESCRIBING INFORMATION

To be completed for all new NDAs, BLAs, Efficacy Supplements, and PLR Conversion Supplements

**Application:** NDA 205175

**Application Type:** New NDA

Name of Drug: (econazole nitrate) Foam, 1%

**Applicant:** AmDerma Pharmaceuticals, LLC

Submission Date: December 22, 2012

Receipt Date: December 26, 2012

# 1.0 Regulatory History and Applicant's Main Proposals

New NDA for the treatment of interdigital tinea pedis.

# 2.0 Review of the Prescribing Information (PI)

This review is based on the applicant's submitted Microsoft Word format of the PI. The applicant's proposed PI was reviewed in accordance with the labeling format requirements listed in the "Selected Requirements for Prescribing Information (SRPI)" checklist (see the Appendix).

# 3.0 Conclusions/Recommendations

SRPI format deficiencies were identified in the review of this PI. For a list of these deficiencies see the Appendix.

All SRPI format deficiencies of the PI will be conveyed to the applicant in the 74-day letter. The applicant will be asked to correct these deficiencies and resubmit the PI in <u>Word format</u> by March 8, 2013. The resubmitted PI will be used for further labeling review.

RPM PLR Format Review of the PI: Last Updated May 2012 Page 1 of 8

The Selected Requirement of Prescribing Information (SRPI) version 2 is a 48-item, drop-down checklist of critical <u>format</u> elements of the prescribing information (PI) based on labeling regulations (21 CFR 201.56 and 201.57) and labeling guidances.

# **Highlights (HL)**

#### GENERAL FORMAT

**YES** 

Highlights (HL) must be in two-column format, with ½ inch margins on all sides and in a minimum of 8-point font.

#### Comment:

2. The length of HL must be less than or equal to one-half page (the HL Boxed Warning does not count against the one-half page requirement) unless a waiver has been is granted in a previous submission (i.e., the application being reviewed is an efficacy supplement).

<u>Instructions to complete this item</u>: If the length of the HL is less than or equal to one-half page then select "YES" in the drop-down menu because this item meets the requirement. However, if HL is longer than one-half page:

# **➤** For the Filing Period (for RPMs)

- For efficacy supplements: If a waiver was previously granted, select "YES" in the drop-down menu because this item meets the requirement.
- For NDAs/BLAs and PLR conversions: Select "NO" in the drop-down menu because this item does not meet the requirement (deficiency). The RPM notifies the Cross-Discipline Team Leader (CDTL) of the excessive HL length and the CDTL determines if this deficiency is included in the 74-day or advice letter to the applicant.

#### **➤** For the End-of Cycle Period (for SEALD reviewers)

■ The SEALD reviewer documents (based on information received from the RPM) that a waiver has been previously granted or will be granted by the review division in the approval letter.

#### Comment:

**NO** 

3. All headings in HL must be presented in the center of a horizontal line, in UPPER-CASE letters and **bolded**.

<u>Comment:</u> Contraindications and Indications and Usage section needed to be recentered

NO

4. White space must be present before each major heading in HL.

**Comment:** Edit for consistency

NO

5. Each summarized statement in HL must reference the section(s) or subsection(s) of the Full Prescribing Information (FPI) that contains more detailed information. The preferred format is the numerical identifier in parenthesis [e.g., (1.1)] at the end of each information summary (e.g. end of each bullet).

**Comment:** Add cross-reference

SRPI version 2: Last Updated May 2012

NO 6. Section headings are presented in the following order in HL:

Section	Required/Optional
Highlights Heading	Required
Highlights Limitation Statement	Required
Product Title	Required
Initial U.S. Approval	Required
Boxed Warning	Required if a Boxed Warning is in the FPI
Recent Major Changes	Required for only certain changes to PI*
Indications and Usage	Required
Dosage and Administration	Required
Dosage Forms and Strengths	Required
Contraindications	Required (if no contraindications must state "None.")
Warnings and Precautions	Not required by regulation, but should be present
Adverse Reactions	Required
Drug Interactions	Optional
Use in Specific Populations	Optional
Patient Counseling Information Statement	Required
Revision Date	Required

<sup>\*</sup> RMC only applies to the Boxed Warning, Indications and Usage, Dosage and Administration, Contraindications, and Warnings and Precautions sections.

**Comment:** Need Product Title

7. A horizontal line must separate HL and Table of Contents (TOC).

**Comment:** Add line

#### HIGHLIGHTS DETAILS

#### **Highlights Heading**

YES

8. At the beginning of HL, the following heading must be **bolded** and appear in all UPPER CASE letters: "HIGHLIGHTS OF PRESCRIBING INFORMATION".

Comment:

# **Highlights Limitation Statement**

9. The **bolded** HL Limitation Statement must be on the line immediately beneath the HL heading and must state: "These highlights do not include all the information needed to use (insert name of drug product in UPPER CASE) safely and effectively. See full prescribing information for (insert name of drug product in UPPER CASE)."

**Comment:** Tradename only

# **Product Title**

**NO** 10. Product title in HL must be **bolded.** 

**Comment:** Add Product Title

#### **Initial U.S. Approval**

NO 11. Initial U.S. Approval in HL must be placed immediately beneath the product title, **bolded**, and include the verbatim statement "**Initial U.S. Approval:**" followed by the **4-digit year**.

**Comment:** Must be immediately beneath, do not add space

N/A

NO

SRPI version 2: Last Updated May 2012 Page 3 of 8

# **Boxed Warning**

12. All text must be **bolded**.

#### Comment:

N/A

13. Must have a centered heading in UPPER-CASE, containing the word "WARNING" (even if more than one Warning, the term, "WARNING" and not "WARNINGS" should be used) and other words to identify the subject of the Warning (e.g., "WARNING: SERIOUS INFECTIONS").

#### Comment:

N/A

14. Must always have the verbatim statement "See full prescribing information for complete boxed warning." centered immediately beneath the heading.

#### Comment:

N/A

15. Must be limited in length to 20 lines (this does not include the heading and statement "See full prescribing information for complete boxed warning.")

## **Comment:**

N/A

16. Use sentence case for summary (combination of uppercase and lowercase letters typical of that used in a sentence).

#### **Comment:**

# **Recent Major Changes (RMC)**

N/A

17. Pertains to only the following five sections of the FPI: Boxed Warning, Indications and Usage, Dosage and Administration, Contraindications, and Warnings and Precautions.

# Comment:

N/A

18. Must be listed in the same order in HL as they appear in FPI.

#### Comment:

N/A

19. Includes heading(s) and, if appropriate, subheading(s) of labeling section(s) affected by the recent major change, together with each section's identifying number and date (month/year format) on which the change was incorporated in the PI (supplement approval date). For example, "Dosage and Administration, Coronary Stenting (2.2) --- 3/2012".

## Comment:

N/A

20. Must list changes for at least one year after the supplement is approved and must be removed at the first printing subsequent to one year (e.g., no listing should be one year older than revision date).

#### Comment:

# **Indications and Usage**

**NO** 

21. If a product belongs to an established pharmacologic class, the following statement is required in the Indications and Usage section of HL: [(Product) is a (name of class) indicated for (indication)]."

**Comment:** Add class

# **Dosage Forms and Strengths**

SRPI version 2: Last Updated May 2012 Page 4 of 8

N/A 22. For a product that has several dosage forms, bulleted subheadings (e.g., capsules, tablets, injection, suspension) or tabular presentations of information is used.

#### **Comment:**

#### **Contraindications**

YES 23. All contraindications listed in the FPI must also be listed in HL or must include the statement "None" if no contraindications are known.

#### Comment:

N/A 24. Each contraindication is bulleted when there is more than one contraindication. *Comment:* 

#### **Adverse Reactions**

NO

25. For drug products other than vaccines, the verbatim **bolded** statement must be present: "To report SUSPECTED ADVERSE REACTIONS, contact (insert name of manufacturer) at (insert manufacturer's U.S. phone number) or FDA at 1-800-FDA-1088 or www.fda.gov/medwatch".

**Comment:** Remove manufacturer website.

#### **Patient Counseling Information Statement**

NO 26. Must include <u>one</u> of the following three **bolded** verbatim statements (without quotation marks):

If a product **does not** have FDA-approved patient labeling:

• "See 17 for PATIENT COUNSELING INFORMATION"

If a product **has** FDA-approved patient labeling:

- "See 17 for PATIENT COUNSELING INFORMATION and FDA-approved patient labeling."
- "See 17 for PATIENT COUNSELING INFORMATION and Medication Guide."

<u>Comment</u>: Edit to say See 17 for PATIENT COUNSELING INFORMATION and FDA-approved patient labeling.

#### **Revision Date**

NO 27. **Bolded** revision date (i.e., "**Revised: MM/YYYY** or **Month Year**") must be at the end of HL.

Comment: XX/2013

# **Contents: Table of Contents (TOC)**

#### GENERAL FORMAT

NO 28. A horizontal line must separate TOC from the FPI.

**Comment:** Add line, move FPI to following page

YES 29. The following **bolded** heading in all UPPER CASE letters must appear at the beginning of TOC: "FULL PRESCRIBING INFORMATION: CONTENTS".

**Comment:** 

SRPI version 2: Last Updated May 2012 Page 5 of 8

NO 30. The section headings and subheadings (including title of the Boxed Warning) in the TOC must match the headings and subheadings in the FPI.

<u>Comment:</u> Remove 7 Drug Interactions and 15 References from TOC, 6.1, 13.2, and 16 do not match identically; remove the colon, parenthesis, and ampersand, respectively.

N/A 31. The same title for the Boxed Warning that appears in the HL and FPI must also appear at the beginning of the TOC in UPPER-CASE letters and **bolded**.

# Comment:

**YES** 32. All section headings must be **bolded** and in UPPER CASE.

#### **Comment:**

**YES** 33. All subsection headings must be indented, not bolded, and in title case.

#### Comment:

**YES** 34. When a section or subsection is omitted, the numbering does not change.

#### **Comment:**

YES 35. If a section or subsection from 201.56(d)(1) is omitted from the FPI and TOC, the heading "FULL PRESCRIBING INFORMATION: CONTENTS" must be followed by an asterisk and the following statement must appear at the end of TOC: "\*Sections or subsections omitted from the Full Prescribing Information are not listed."

# Comment:

# **Full Prescribing Information (FPI)**

# **GENERAL FORMAT**

YES 36. The following heading must appear at the beginning of the FPI in UPPER CASE and **bolded**: "FULL PRESCRIBING INFORMATION".

#### Comment:

YES 37. All section and subsection headings and numbers must be **bolded**.

# Comment:

NO

38. The **bolded** section and subsection headings must be named and numbered in accordance with 21 CFR 201.56(d)(1) as noted below. If a section/subsection is omitted, the numbering does not change.

Boxed Warning
1 INDICATIONS AND USAGE
2 DOSAGE AND ADMINISTRATION
3 DOSAGE FORMS AND STRENGTHS
4 CONTRAINDICATIONS
5 WARNINGS AND PRECAUTIONS
6 ADVERSE REACTIONS
7 DRUG INTERACTIONS
8 USE IN SPECIFIC POPULATIONS
8.1 Pregnancy
8.2 Labor and Delivery
8.3 Nursing Mothers
8.4 Pediatric Use

SRPI version 2: Last Updated May 2012

**Comment:** 13.2 and 16 need fixing; 13.2 can be below 13.1, but not standalone 13.2

YES

39. FDA-approved patient labeling (e.g., Medication Guide, Patient Information, or Instructions for Use) must not be included as a subsection under Section 17 (Patient Counseling Information).

All patient labeling must appear at the end of the PI upon approval.

# **Comment**:

NO 40. The preferred presentation for cross-references in the FPI is the section heading (not subsection heading) followed by the numerical identifier in italics. For example, [see Warnings and Precautions (5.2)].

**Comment:** Fix Microbiology reference in section 12

N/A 41. If RMCs are listed in HL, the corresponding new or modified text in the FPI sections or subsections must be marked with a vertical line on the left edge.

#### Comment:

## FULL PRESCRIBING INFORMATION DETAILS

#### **Boxed Warning**

42. All text is **bolded**.

#### Comment:

N/A

43. Must have a heading in UPPER-CASE, containing the word "WARNING" (even if more than one Warning, the term, "WARNING" and not "WARNINGS" should be used) and other words to identify the subject of the Warning (e.g., "WARNING: SERIOUS INFECTIONS").

#### Comment:

N/A 44. Use sentence case (combination of uppercase and lowercase letters typical of that used in a sentence) for the information in the Boxed Warning.

#### Comment:

#### **Contraindications**

SRPI version 2: Last Updated May 2012 Page 7 of 8

Reference ID: 3261447

N/A

**N/A** 45. If no Contraindications are known, this section must state "None".

#### **Comment:**

#### **Adverse Reactions**

YES 46. When clinical trials adverse reactions data is included (typically in the "Clinical Trials Experience" subsection of Adverse Reactions), the following verbatim statement or appropriate modification should precede the presentation of adverse reactions:

"Because clinical trials are conducted under widely varying conditions, adverse reaction rates observed in the clinical trials of a drug cannot be directly compared to rates in the clinical trials of another drug and may not reflect the rates observed in clinical practice."

# **Comment:** Must lead 6.1

N/A

47. When postmarketing adverse reaction data is included (typically in the "Postmarketing Experience" subsection of Adverse Reactions), the following verbatim statement or appropriate modification should precede the presentation of adverse reactions:

"The following adverse reactions have been identified during post-approval use of (insert drug name). Because these reactions are reported voluntarily from a population of uncertain size, it is not always possible to reliably estimate their frequency or establish a causal relationship to drug exposure."

## Comment:

NO

# **Patient Counseling Information**

- 48. Must reference any FDA-approved patient labeling, include the type of patient labeling, and use one of the following statements at the beginning of Section 17:
  - "See FDA-approved patient labeling (Medication Guide)"
  - "See FDA-approved patient labeling (Medication Guide and Instructions for Use)"
  - "See FDA-approved patient labeling (Patient Information)"
  - "See FDA-approved patient labeling (Instructions for Use)"
  - "See FDA-approved patient labeling (Patient Information and Instructions for Use)"

**Comment:** Edit to read See FDA-approved patient labeling (Patient Information)
