# The Chemistry Review for NDA 207925

## The Executive Summary

### I. Recommendations

#### A. Recommendation and Conclusion on Approvability

*The application is approvable from a CMC perspective pending on the final acceptable recommendation from the Office of Compliance.*

#### B. Recommendation on Phase 4 (Post-Marketing) Commitments, Agreements, and/or Risk Management Steps, if Approvable

*None*

### II. Summary of Chemistry Assessments

#### A. Description of the Drug Product(s) and Drug Substance(s)

##### 1. Drug Substance

*The drug substance [REDACTED] (b) (4) Ivacaftor is [REDACTED] (b) (4) used in the manufacturing of kalydeco (Ivacaftor) 150 mg tablets (NDA 203188, approved on 1/31/2012, also owned by Vertex). All drug substance CMC information is referred to NDA 203188 accordingly.*

##### 2. Drug Product

*The drug product Ivacaftor granules is an immediate release dosage form for oral administration intended for the treatment of cystic fibrosis (CF) in patients age 2 years and older and with certain mutations. The ivacaftor granule has a [REDACTED] (b) (4) target weight of 6.87 mg. Each granule contains a target of [REDACTED] (b) (4) of ivacaftor. The excipients include colloidal silicon dioxide, croscarmellose sodium, hypromellose acetate succinate, lactose monohydrate, magnesium stearate, mannitol, sucralose, and sodium lauryl sulfate, all of compendial grade. The composition of the granules is similar to that of the approved 150 mg tablets but without coating, and with mannitol, sucralose [REDACTED] (b) (4). Two strengths of the drug product will be marketed, i.e., 50 mg and 75 mg per packet. Both strengths are filled with the same granules but with different fill weight.*

[REDACTED] (b) (4)  
*The proposed dosage form is granules, which is concurred by ONDP at the precedence meeting.*

*The drug product is manufactured by [REDACTED] (b) (4). The manufacturing process includes [REDACTED] (b) (4) the unit dose, 50 mg or 75 mg. The applicant has conducted extensive pharmaceutical development using design of experiments*

(DOE) as the tool. Through those experiments and data analysis, as well as the risk assessment based on the investigation outcomes described in NDA 203188 for 150 mg tablets [REDACTED] (b) (4) composition and manufacturing process with the granules, the criticality of the material attributes and process parameters are assessed, and the design spaces and normal operational ranges (NOR) are established. Adequate in-process and material controls are in place. The manufacturing process is robust, capable of consistently producing quality drug product when operated within the design space and NOR.

Two of the more critical quality attributes for the drug product are dissolution and physical form. The biopharm team recommended approval of this NDA from their perspective. The desired physical form of the drug substance Ivacaftor is [REDACTED] (b) (4).

The proposed drug product specification is acceptable. The attributes, acceptance criteria, and analytical methods are the same as those for the 150 mg tablets. The lower strengths of this product do not affect the pertinent threshold for impurity/degradant controls as per ICHQ3B. The proposed testing strategy (certain attributes are tested on the bulk granules instead of the content in the packet) was agreed upon by the Agency during EOPII meeting.

The drug product is chemically and physically stable under the proposed storage conditions. Release data from multiple batches manufactured by the commercial process met the proposed specification. No impurity/degradant was detected at above the identification threshold both at release and during stability study. During the EOPII meeting the Agency agreed that the bracketing [REDACTED] (b) (4) strengths of drug product when manufactured using the same commercial process and packaged in the same commercial container/closure system could be used for stability study in lieu of the to be marketed 50 mg and 75 mg strengths. The applicant therefore provided 24 months of long term stability data from developmental batches (manufactured using the same commercial process and packaged in the commercial container/closure system), 12 months long term, and 6 months of accelerated stability data from 6 registration batches (three each from [REDACTED] (b) (4) mg and 75 mg) to support the proposed shelf life of 24 months. All stability data met the specification. No significant trend (>5%) is observed through 12 month time point for all the testing attributes, [REDACTED] (b) (4)

[REDACTED] The requested shelf life is granted. In-use stability study conducted as per the Agency's recommendations during EOPII meeting demonstrates that the drug product remains chemically and physically stable within one hour after mixing with the common food.

The primary container closure system for ivacaftor granules will be a printed, foil laminate packet (b) (4). Fifty six packets (for each strength) are packed into a carton. CFR citation for direct food contact is provided for the components of the primary container/closure system.

The following comments regarding the labeling and container labels should be conveyed to the review team.

1. Indicate the drug product strength in the Highlights of Prescription section of the package insert as per 21CFR201.57(a)(8).
2. Change the color scheme of the inner wallet, carton, and stick pack for 50 mg and 75 mg strengths such that they are adequately distinguishable.
3. Increase the font of the established name to be at least half of that for the proprietary name for all container labels as per 201.10(g)(2)
4. Clearly indicate the location for Lot number and expiration date on all container labels as per 21CFR201.17 and 21CFR201.18.

#### B. Description of How the Drug Product is Intended to be Used

KALYDECO (ivacaftor) Granules should be mixed with one teaspoon (5 mL) of age-appropriate soft food or liquid and completely consumed to ensure delivery of the entire dose. Once mixed, the product has been shown to be stable for one hour, and therefore should be consumed during this period. Some examples of appropriate soft foods or liquids may include puréed fruits or vegetables, yogurt, applesauce, water, milk, or juice. This description is included in the package insert.

#### C. Basis for Approvability or Not-Approval Recommendation

NA

### III. Lifecycle Knowledge Management

From Initial Risk Identification			Review Assessment		
Attribute/ CQA	Factors that can impact the CQA	Risk Ranking*	Risk Mitigation approach in control strategy	Risk Evaluation	Lifecycle Considerations/ Comments**

**ONDQA Initial Quality Assessment (IQA) and Filing Review  
For Pre-Marking Applications**

NDA #: 207925

Received Date: 17-SEP-2014

<b>ONDQA-BIOPHARMACEUTICS</b>				
<b>A. INITIAL OVERVIEW OF THE NDA APPLICATION FOR FILING</b>				
	<b>Parameter</b>	<b>Yes</b>	<b>No</b>	<b>Comment</b>
1.	Does the application contain dissolution data?	x		
2.	Is the dissolution test part of the DP specifications?	x		
3.	Does the application contain the dissolution method development report?	x		
4.	Is there a validation package for the analytical method and dissolution methodology?	x		
5.	Does the application include a biowaiver request?		x	Not Applicable.
6.	Is there information provided to support the biowaiver request?		x	Not Applicable.
7.	Does the application include an IVIVC model?		x	Not Applicable.
8.	Is information such as BCS classification mentioned, and supportive data provided?	x		(b) (4)
9.	Is information on mixing the product with foods or liquids included?		x	The draft labeling states "The entire contents of each packet of granules should be mixed with one teaspoon (5 mL) of age-appropriate soft food or liquid and completely consumed. Once mixed, the product has been shown to be stable for one hour, and therefore should be consumed during this period. Some examples of soft foods or liquids may include puréed fruits or vegetables, yogurt, applesauce, water, milk or juice." CMC will review this issue.
10.	Is there any <i>in vivo</i> BA or BE information in the submission?	x		VX10-770-012 and VX12-770-015 will be reviewed by Clinical Pharmacology.

<b>B. FILING CONCLUSION</b>				
	<b>Parameter</b>	<b>Yes</b>	<b>No</b>	<b>Comment</b>

**ONDQA Initial Quality Assessment (IQA) and Filing Review  
For Pre-Marking Applications**

NDA #: 207925

Received Date: 17-SEP-2014

11.	<b>IS THE BIOPHARMACEUTICS SECTIONS OF THE APPLICATION FILEABLE?</b>	x		
12.	If the NDA is not fileable from the biopharmaceutics perspective, state the reasons and provide <b>filing</b> comments to be sent to the Applicant.	-	-	
13.	Are there any <b>potential review</b> issues to be forwarded to the Applicant for the 74-day letter?		x	

**INITIAL BIOPHARMACEUTICS ASSESSMENT**

The Biopharmaceutics review for this NDA will be focused on the evaluation and acceptability of the proposed dissolution methodology and acceptance criterion.

The proposed dissolution method is:

USP Apparatus	Rotation Speed	Media Volume	Temp	Medium
2	65 rpm	900 ml	37 °C	50 mM phosphate buffer (pH 6.8) w/ 0.4% SLS

The proposed dissolution acceptance criterion is:

<b>Acceptance Criterion</b>
Q = <sup>(b)</sup> <sub>(4)</sub> % at 20 min

**RECOMMENDATION:**

The ONDQA Biopharmaceutics team has reviewed NDA 207-925 for filing purposes. We found this NDA **fileable** from a Biopharmaceutics perspective. The Applicant has submitted a reviewable submission.

## CMC FILING REVIEW CHECKLIST

The following parameters are necessary in order to initiate a full review, i.e., complete enough to review but may have deficiencies. On **initial** overview of the NDA application for filing:

<b>A. GENERAL</b>
-------------------

**ONDQA Initial Quality Assessment (IQA) and Filing Review  
For Pre-Marking Applications**

NDA #: 207925

Received Date: 17-SEP-2014

	<b>Parameter</b>	<b>Yes</b>	<b>No</b>	<b>N/A</b>	<b>Comment</b>
14.	Is the CMC section organized adequately?	X	<input type="checkbox"/>	<input type="checkbox"/>	
15.	Is the CMC section indexed and paginated (including all PDF files) adequately?	X	<input type="checkbox"/>	<input type="checkbox"/>	
16.	Are all the pages in the CMC section legible?	<input type="checkbox"/>	<input type="checkbox"/>		All pages examined for production of this IQA/filing review were legible.
17.	Has all information requested during the IND phase, and at the pre-NDA meetings been included?	X	<input type="checkbox"/>	<input type="checkbox"/>	Information regarding the determination of the target granule fill count has been provided in the manufacturing process development section; however, the adequacy will be a review issue (see CMC EoP2 meeting minutes). For biopharmaceutics related items, see above.

**B. FACILITIES\***

	<b>Parameter</b>	<b>Yes</b>	<b>No</b>	<b>N/A</b>	<b>Comment</b>
1	Is a single, comprehensive list of all involved facilities available in one location in the application?	X	<input type="checkbox"/>	<input type="checkbox"/>	See form 356h
1	For a naturally-derived API only, are the facilities responsible for critical intermediate or crude API manufacturing, or performing upstream steps, specified in the application? If not, has a justification been provided for this omission? <b>This question is not applicable for synthesized API.</b>	<input type="checkbox"/>	<input type="checkbox"/>	X	

**ONDQA Initial Quality Assessment (IQA) and Filing Review  
For Pre-Marking Applications**

NDA #: 207925

Received Date: 17-SEP-2014

2	<p>Are drug substance manufacturing sites identified on FDA Form 356h or associated continuation sheet? For each site, does the application list:</p> <ul style="list-style-type: none"> <li>• Name of facility,</li> <li>• Full address of facility including street, city, state, country</li> <li>• FEI number for facility (if previously registered with FDA)</li> <li>• Full name and title, telephone, fax number and email for on-site contact person.</li> <li>• Is the manufacturing responsibility and function identified for each facility?, and</li> <li>• DMF number (if applicable)</li> </ul>	<input type="checkbox"/>	X	<input type="checkbox"/>	<p>The ivacaftor <sup>(b) (4)</sup> used to prepare the dosage form is referenced to the applicant's NDA 203188.</p>
2	<p>Are drug product manufacturing sites identified on FDA Form 356h or associated continuation sheet. For each site, does the application list:</p> <ul style="list-style-type: none"> <li>• Name of facility,</li> <li>• Full address of facility including street, city, state, country</li> <li>• FEI number for facility (if previously registered with FDA)</li> <li>• Full name and title, telephone, fax number and email for on-site contact person.</li> <li>• Is the manufacturing responsibility and function identified for each facility?, and</li> <li>• DMF number (if applicable)</li> </ul>	X	<input type="checkbox"/>	<input type="checkbox"/>	

**ONDQA Initial Quality Assessment (IQA) and Filing Review  
For Pre-Marking Applications**

NDA #: 207925

Received Date: 17-SEP-2014

2	<p>Are additional manufacturing, packaging and control/testing laboratory sites are identified on FDA Form 356h or associated continuation sheet. For each site, does the application list:</p> <ul style="list-style-type: none"> <li>• Name of facility,</li> <li>• Full address of facility including street, city, state, country</li> <li>• FEI number for facility (if previously registered with FDA)</li> <li>• Full name and title, telephone, fax number and email for on-site contact person.</li> <li>• Is the manufacturing responsibility and function identified for each facility?, and</li> <li>• DMF number (if applicable)</li> </ul>	X	<input type="checkbox"/>	<input type="checkbox"/>	
2	Is a statement provided that all facilities are ready for GMP inspection at the time of submission?	X	<input type="checkbox"/>	<input type="checkbox"/>	

\* If any information regarding the facilities is omitted, this should be addressed ASAP with the applicant and can be a *potential* filing issue or a *potential* review issue.

<b>C. ENVIRONMENTAL ASSESMENT</b>					
	<b>Parameter</b>	<b>Yes</b>	<b>No</b>	<b>N/A</b>	<b>Comment</b>
24.	Has an environmental assessment report or categorical exclusion been provided?	X	<input type="checkbox"/>	<input type="checkbox"/>	Exclusion requested as per 21 CFR 25.15 and 25.31(b); Applicant also claims that they know of no extraordinary circumstances regarding the EA.

<b>D. MASTER FILES (DMF/MAF)</b>					
	<b>Parameter</b>	<b>Yes</b>	<b>No</b>	<b>N/A</b>	<b>Comment</b>
25.	Is information for critical DMF references (i.e., for drug substance and important packaging components for non-solid-oral drug products) complete?	X	<input type="checkbox"/>	<input type="checkbox"/>	Refer to table of DMF information above.

**ONDQA Initial Quality Assessment (IQA) and Filing Review  
For Pre-Marking Applications**

NDA #: 207925

Received Date: 17-SEP-2014

<b>E. DRUG SUBSTANCE/ACTIVE PHARMACEUTICAL INGREDIENT (DS/API)</b>					
	<b>Parameter</b>	<b>Yes</b>	<b>No</b>	<b>N/A</b>	<b>Comment</b>
26.	Does the section contain a description of the DS manufacturing process?	<input type="checkbox"/>	X	<input type="checkbox"/>	The ivacaftor drug substance is formulated into the drug product from the ivacaftor <sup>(b) (4)</sup> of NDA 203188.
27.	Does the section contain identification and controls of critical steps and intermediates of the DS (in process parameters)?	<input type="checkbox"/>	X	<input type="checkbox"/>	See comment for 26 above.
28.	Does the section contain information on impurities?	<input type="checkbox"/>	X	<input type="checkbox"/>	See comment for 26 above.
29.	Does the section contain information regarding the characterization of the DS?	<input type="checkbox"/>	X	<input type="checkbox"/>	See comment for 26 above.
30.	Does the section contain controls for the DS?	<input type="checkbox"/>	X	<input type="checkbox"/>	See comment for 26 above.
31.	Has stability data and analysis been provided for the drug substance?	<input type="checkbox"/>	X	<input type="checkbox"/>	See comment for 26 above.
32.	Does the application contain Quality by Design (QbD) information regarding the DS?	<input type="checkbox"/>	X	<input type="checkbox"/>	See comment for 26 above.
33.	Does the application contain Process Analytical Technology (PAT) information regarding the DS?	<input type="checkbox"/>	X	<input type="checkbox"/>	See comment for 26 above.
34.	Does the section contain container and closure information?	<input type="checkbox"/>	X	<input type="checkbox"/>	See comment for 26 above.

**ONDQA Initial Quality Assessment (IQA) and Filing Review  
For Pre-Marking Applications**

NDA #: 207925

Received Date: 17-SEP-2014

<b>F. DRUG PRODUCT (DP)</b>					
	<b>Parameter</b>	<b>Yes</b>	<b>No</b>	<b>N/A</b>	<b>Comment</b>
35.	Does the section contain quality controls of excipients?	X	<input type="checkbox"/>	<input type="checkbox"/>	
36.	Does the section contain information on composition?	X	<input type="checkbox"/>	<input type="checkbox"/>	
37.	Is there a description of manufacturing process and methods for DP production through finishing, including formulation, filling, labeling and packaging?	X	<input type="checkbox"/>	<input type="checkbox"/>	
38.	Does the section contain identification and controls of critical steps and intermediates of the DP, including analytical procedures and method validation reports for assay and related substances if applicable?	X	<input type="checkbox"/>	<input type="checkbox"/>	
39.	Is there a batch production record and a proposed master batch record?	X	<input type="checkbox"/>	<input type="checkbox"/>	See R. Regional Information
40.	Has an investigational formulations section been provided? Is there adequate linkage between the investigational product and the proposed marketed product?	X	<input type="checkbox"/>	<input type="checkbox"/>	See P.2.2
41.	Have any biowaivers been requested?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	The biopharmaceutics team has addressed any biowaiver requests ( <i>vide supra</i> ).
42.	Does the section contain description of to-be-marketed container/closure system and presentations?	X	<input type="checkbox"/>	<input type="checkbox"/>	
43.	Does the section contain controls of the final drug product?	X	<input type="checkbox"/>	<input type="checkbox"/>	
44.	Has stability data and analysis been provided to support the requested expiration date?	X	<input type="checkbox"/>	<input type="checkbox"/>	Stability data are provided, but other than what appears to be some linear regression, there have been no detailed analyses information included.

**ONDQA Initial Quality Assessment (IQA) and Filing Review  
For Pre-Marking Applications  
NDA #: 207925                      Received Date: 17-SEP-2014**

45.	Does the application contain Quality by Design (QbD) information regarding the DP?	X	<input type="checkbox"/>	<input type="checkbox"/>	
46.	Does the application contain Process Analytical Technology (PAT) information regarding the DP?	<input type="checkbox"/>	X	<input type="checkbox"/>	

<b>G. METHODS VALIDATION (MV)</b>					
	<b>Parameter</b>	<b>Yes</b>	<b>No</b>	<b>N/A</b>	<b>Comment</b>
47.	Is there a methods validation package?	<input type="checkbox"/>	X	<input type="checkbox"/>	Method validation reports are in P.5.3, but there is no separate methods validation package.

<b>H. MICROBIOLOGY</b>					
	<b>Parameter</b>	<b>Yes</b>	<b>No</b>	<b>N/A</b>	<b>Comment</b>
48.	If appropriate, is a separate microbiological section included discussing sterility of the drug product?	<input type="checkbox"/>	<input type="checkbox"/>		The microbiology team has been informed of the submission of this application and will make a determination of any review necessary, as per the pilot.

<b>I. LABELING</b>					
	<b>Parameter</b>	<b>Yes</b>	<b>No</b>	<b>N/A</b>	<b>Comment</b>
49.	Has the draft package insert been provided?	X	<input type="checkbox"/>	<input type="checkbox"/>	
50.	Have the immediate container and carton labels been provided?	X	<input type="checkbox"/>	<input type="checkbox"/>	
51.	Does section contain tradename and established name?	X	<input type="checkbox"/>	<input type="checkbox"/>	The current established name proposed is "ivacaftor granules."

<b>A. FILING CONCLUSION</b>					
	<b>Parameter</b>	<b>Yes</b>	<b>No</b>	<b>N/A</b>	<b>Comment</b>
52.	<b>IS THE PRODUCT QUALITY SECTION OF THE APPLICATION FILEABLE?</b>	X	<input type="checkbox"/>	<input type="checkbox"/>
