REVIEW OF REVISED LABEL AND LABELING

Division of Medication Error Prevention and Analysis (DMEPA)

Office of Medication Error Prevention and Risk Management (OMEPRM)

Office of Surveillance and Epidemiology (OSE)

Center for Drug Evaluation and Research (CDER)

*** This document contains proprietary information that cannot be released to the public***

Date of This Review: May 19, 2016

Requesting Office or Division: Division of Anti- Infective Products (DAIP)

Application Type and Number: NDA 208562

Product Name and Strength: Voriconazole for injection; 200 mg per vial

Product Type: Single ingredient

Rx or OTC: Rx

Applicant/Sponsor Name: Xellia Pharmaceuticals APS

 Submission Date:
 May 19, 2016

 OSE RCM #:
 2015-1728-1

DMEPA Primary Reviewer: Sevan Kolejian, Pharm. D.

DMEPA Team Leader: Vicky Borders-Hemphill, PharmD

1 REASON FOR REVIEW

The Division of Anti –Infective Products (DAIP) requested that we review the revised container labels and carton labeling for Voriconazole for injection (*See* Appendix A) to determine if it is acceptable from a medication error perspective. The revisions are in response to recommendations that we made during a previous label and labeling review.¹

2 CONCLUSION

The revised container labels and carton labeling for Voriconazole for injection is acceptable from a medication error perspective. We have no further recommendations at this time.

APPENDIX A. LABEL AND LABELING SUBMITTED ON MAY 19, 2016

Team Leader

Office of Prescription Drug Promotion (OPDP)

Subject: NDA 208562 Voriconazole for injection, for intravenous use

This consult review is in response to DAIP's April 22, 2016, request for OPDP's review of the draft package insert (PI) and carton and container label for NDA 208562 Voriconazole for injection, for intravenous use (Voriconazole). OPDP's review of the draft PI is based on the substantially complete version titled "NDA 208562 Voriconazole Draft Label.docx" accessed via SharePoint on May 16, 2016. We have no comments on the draft PI at this time. OPDP's review of the draft carton and container labels is based upon the versions sent via email from Naseya Minor to Adam George on May 16, 2016. We have not comments on the draft carton and container label at this time. Copies of reviewed materials are attached to this consult response for your reference.

OPDP appreciates the opportunity to provide comments on these materials. If you have any questions or concerns, please contact Adam George at 301-796-7607 or adam.george@fda.hhs.gov.

54 Page(s) of Draft Labeling have been Withheld in Full as b4 (CCI/TS) immediately following this page

*** This document contains proprietary information that cannot be released to the public***

Date of This Review: March 23, 2016

Requesting Office or Division: Division of Anti- Infective Products (DAIP)

Application Type and Number: NDA 208562

Product Name and Strength: Voriconazole for injection; 200 mg per vial

Product Type: Single ingredient

Rx or OTC:

Applicant/Sponsor Name: Xellia Pharmaceuticals APS

Submission Date: July 24, 2015

OSE RCM #: 2015-1728

DMEPA Primary Reviewer: Sevan Kolejian, Pharm. D.

DMEPA Team Leader: Vicky Borders-Hemphill, PharmD

1 REASON FOR REVIEW

The Division of Anti –Infective Products (DAIP) requested that we review the container label, carton labeling and Full Prescribing Information (FPI) for Voriconazole for injection; 200 mg per vial (See Appendix G) to determine if they are acceptable from a medication error perspective.

2 MATERIALS REVIEWED

We considered the materials listed in Table 1 for this review. The Appendices provide the methods and results for each material reviewed.

Table 1. Materials Considered for this Label and Labeling Review				
Material Reviewed	Appendix Section (for Methods and Results)			
Product Information/Prescribing Information	A			
Previous DMEPA Reviews	В			
Human Factors Study	C (N/A)			
ISMP Newsletters	D			
FDA Adverse Event Reporting System (FAERS)*	E			
Full Prescribing Information (FPI)	F			
Labels and Labeling	G			

N/A=not applicable for this review

3 OVERALL ASSESSMENT OF THE MATERIALS REVIEWED

Voriconazole for injection, 200 mg per vial is currently available on the market as follows:

- Voriconazole for injection, 200 mg per vial, ANDA 090862, Sandoz Inc.
- Vfend (Voriconazole for injection) 200 mg per vial, NDA 021267, Pfizer.

We noted that the Applicant's proposed FPI for this product added

(b) (4)

^{*}We do not typically search FAERS for label and labeling reviews unless we are aware of medication errors through our routine postmarket safety surveillance

We communicated our concerns to the review team and inquired about the Clinical implications associated with healthcare practitioners confusing Vfend's renal function monitoring and use parameters with those of the proposed product. At the February 24, 2016, team labeling meeting, the review team agreed that data provided in the response to an information request from the Applicant was inadequate to justify the proposed differences in the labeling from Vfend. Additionally, the

(b) (4) in the formulations of the proposed product and the RLD share the same pharmacokinetic profile. Hence, DAIP decided that proposed PI will be harmonized with the reference drug's PI and both PIs will have updated renal impairment dosing/monitoring parameter descriptions. Thus, we have no concerns from medication error perspective for the introduction of this product on the market.

FAERS Cases

DMEPA conducted a FAERS search of Pfizer's Vfend to inform our review of the proposed label and labeling and identified one wrong dose error resulting in renal dysfunction and confusion. No additional information on the root cause of the overdose was provided. The outcomes reported that the patient recovered (*see* Appendix E). We note DAIP will be revising the FPI for Pfizer's Vfend and the proposed product to reflect the current Guidance for Industry: Pharmacokinetics in Patients with Impaired Renal Function¹ and have no additional recommendations to mitigate this error.

Container Label and Carton Labeling

We performed a risk assessment of the proposed label and labeling for Xellia's Voriconazole for Injection, 200 mg per vial to identify deficiencies that may lead to medication errors and for areas of improvement. We informed the Office of Product Quality (OPQ) that the principal display panel on the proposed product's container label and carton labeling has the following statements:

(b) (4) and (b) (4) and defer to OPQ to determine the appropriateness of these statements on the container label and carton labeling.

Our review of the proposed container label and carton labeling (Appendix G) identified areas of improvement. In section 4.2, we provide additional recommendations to mitigate confusion and promote the safe use of this product.

 $\underline{http://www.fda.gov/downloads/drugs/guidancecomplianceregulatoryinformation/guidances/ucm204959.pdf}$

¹ Draft Guidance for Industry Pharmacokinetics in Patients with Impaired Renal Function — Study Design, Data Analysis, and Impact on Dosing and Labeling, U.S. Department of Health and Human Services Food and Drug Administration Center for Drug Evaluation and Research (CDER), March 2010 Clinical Pharmacology Lines [264-276] available online at:

Full Prescribing Information (FPI)

We note that package type term (b) (4) is used throughout the labels and labeling. We informed the Office of Product Quality (OPQ) and defer to OPQ to determine the appropriate package type term. Our review of the *Dosage and Administration, Dosage Forms and Strengths and How it Supplied sections* of the FPI identified areas of improvement. In section 4.1, we provide additional recommendations to mitigate confusion and promote the safe use of this product.

4 CONCLUSION & RECOMMENDATIONS

DMEPA concludes that the proposed container label, carton labeling, and Full Prescribing Information can be improved to increase clarity and prominence of important information to promote safe use of this product.

If you have further questions or need clarification, please contact Karen Townsend, OSE Project Manager, at 301-796-5413.

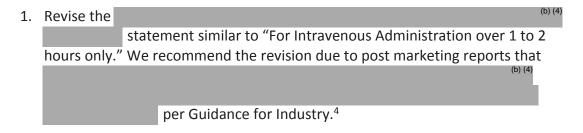

4.1 RECOMMENDATIONS FOR THE DIVISION

We advise the following recommendations be implemented prior to approval:

A. Full Prescribing Information:

- 1. Remove trailing zero throughout the FPI to mitigate confusion².
- 2. Revise abbreviated "IV" route of the administration to read "For Intravenous Use" or "Intravenously" as appropriate throughout the FPI³ to mitigate confusion.

a) DOSAGE AND ADMINISTRATION

² Guidance for Industry: Safety Considerations for Container Labels and Carton Labeling Design to Minimize Medication Errors. Food and Drug Administration. 2013, lines [465-476]. Available from http://www.fda.gov/downloads/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/UCM349009.pdf

³Guidance for Industry: Safety Considerations for Container Labels and Carton Labeling Design to Minimize Medication Errors. Food and Drug Administration. 2013, lines [478-484]. Available from http://www.fda.gov/downloads/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/UCM349009.pdf

⁴ Guidance for Industry: Safety Considerations for Container Labels and Carton Labeling Design to Minimize Medication Errors. Food and Drug Administration. 2013, lines [479-492]. Available from http://www.fda.gov/downloads/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/UCM349009.pdf

- 2. Revise the statement under the section 2.5, Intravenous Administration, from

 to read "The reconstituted solution can be diluted with:

 0.9 % Sodium Chloride USP" for clarity.
- 3. Revise the negative statement from "Voriconazole for injection must not be infused concomitantly with any blood product or short-term infusion of concentrated electrolytes, even if the two infusions are running in separate intravenous lines (or cannulas)" to a positive statement similar to read "Administration of Voriconazole for injection concomitantly with any blood product or short-term infusion of concentrated electrolytes, even if the two infusions are running in separate intravenous lines (or cannulas) is prohibited" per Guidance for Industry.⁵

b) HOW SUPPLIED/STORAGE AND HANDLING

1. Add statement "Discard unused portion" to appear after OPQ approved package type term to promote the safe use of the product and According to 21 CFR 201.57(17)(iv).

4.2 RECOMMENDATIONS FOR XELLIA

We recommend the following be implemented prior to approval of this NDA 208253.

A. Container Label

1. Principle Display Panel

- a. In collaboration with OPQ, remove statement to reduce clutter.
- b. Revise the statement from to read "Must be reconstituted then diluted. For Intravenous Infusion Only." to provide clarity of important product preparation and administration information.
- c. Add the statement "Discard Unused Portion" to minimize risk of the entire contents of the vial being given as a single dose in pediatric patients.

2. Side Panel

a) For clarity, delete the comment storage statement to read clutter.

⁵ Guidance for Industry: Safety Considerations for Container Labels and Carton Labeling Design to Minimize Medication Errors. Food and Drug Administration. 2013, lines [479-492]. Available from http://www.fda.gov/downloads/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/UCM349009.pdf

b) Revise the statement further diluted for immediate use" for clarity.

B. Carton labeling

- 3. See A.1 above a, b, and c.
- 4. See A.2 above a and b.
- 5. On the side panel, revise the statement from to read "to provide final voriconazole solution containing 0.5 mg/mL to 5 mg/mL concentrations."

APPENDICES: METHODS & RESULTS FOR EACH MATERIALS REVIEWED APPENDIX A. PRODUCT INFORMATION/PRESCRIBING INFORMATION

Table 2 presents relevant product information for Voriconazole for Injection, 200 mg per vial that Xellia submitted on July 24, 2015.

Table 2. Relevant Produ	ict Information for Voricor	nazole for injection	i, 200 mg per viai
Initial Approval Date	N/A		
Active Ingredient	Voriconazole		
Indication	skin, abdomen, kidn	s. utropenics) and dis ey, bladder wall, an used by <i>Scedospor</i> cluding <i>Fusarium sc</i>	seminated candidiasis in and wounds. Sium apiospermum and Colani, in patients
Route of Administration	intravenous		
Dosage Form	lyophilized powder cont hydroxypropyl ß-cyclode mg/mL of voriconazole	extrin (HPβCD); afte	
Strength	200 mg per vial		
Dose and Frequency	Infection	Loading dose	Maintenance Dose
		IV	IV
	Candidemia in non- neutropenics and other deep tissue Candida infections Scedosporiosis and Fusariosis	6 mg/kg q12h for the first 24 hours	4 mg/kg q12h 3–4 mg/kg q12h 4 mg/kg q12h
How Supplied		• •	ingle (b) (4) vial as a sterile oriconazole and 3200 mg

	hydroxypropyl β-cyclodextrin (HPβCD).
Storage	 Voriconazole for injection unreconstituted vials should be stored at (b) (4) [see USP Controlled Room Temperature].
	 Following reconstitution of the lyophile with Water for Injection, the reconstituted solution should be used immediately. If not used immediately, in-use storage times and conditions prior to use are the responsibility of the user and should not be longer than 24 hours at 2° to 8°C (36° to 46°F). Chemical and physical in-use stability has been
	demonstrated for 24 hours at 2° to 8°C (36° to 46°F).

APPENDIX B. PREVIOUS DMEPA REVIEWS

B.1 Methods

On November 3, 2015, we searched the L:drive and AIMS using the terms, Voriconazole to identify reviews previously performed by DMEPA.

B.2 Results

Our search did not identify any reviews.

APPENDIX D. ISMP NEWSLETTERS

D.1 Methods

On November 3, 2015, we searched the Institute for Safe Medication Practices (ISMP) newsletters using the criteria below, and then individually reviewed each newsletter. We limited our analysis to newsletters that described medication errors or actions possibly associated with the label and labeling.

ISMP Newsletters Search	Strategy
ISMP Newletter(s)	Acute Care, Community, Nursing, ISMP Medication Safety Alert
Search Strategy and Terms	Match Any of the Words: Voriconazole

D.2 Results

Our search of ISMP Newsletters resulted in three newsletter articles. Our review of the following articles did not describe any medication errors relevant to this review.

Title	Subject/Summary
ISMP Medication Safety Alert! Vol. 17, No. 21 October 18, 2012	WorthRepeating Preventing mix-ups between various formulations of amphotericin B
ISMP Medication Safety Alert! Vol. 19, No. 10 May 22, 2014	Posaconazole dose depends on dosage form.
ISMP Medication Safety Alert! Vol.20, No. 18 September 10, 2015	Mix-ups among "V" drugs: VFEND mix up with Venofer.

APPENDIX E. FDA ADVERSE EVENT REPORTING SYSTEM (FAERS)

E.1 Methods

We searched the FDA Adverse Event Reporting System (FAERS) on November 4, 2015 using the criteria in Table 3, and then individually reviewed each case. We limited our analysis to cases that described errors possibly associated with the label and labeling. We used the NCC MERP Taxonomy of Medication Errors to code the type and factors contributing to the errors when sufficient information was provided by the reporter.⁶

Table 3: FAERS Sea	rch Strategy
Date Range	November 1, 2010 to November 1, 2015
Product	VORICONAZOLE [Active Ingredient]
Event (MedDRA	DMEPA Official FBIS Search Terms Event List:
Terms)	Contraindicated Drug Administered (PT) Drug Administered to Patient of Inappropriate Age (PT) Inadequate Aseptic Technique in Use of Product (PT) Medication Errors (HLGT) Overdose (PT) Prescribed Overdose (PT) Prescribed Underdose (PT) Product Adhesion Issue (PT) Product Compounding Quality Issue (PT) Product Formulation Issue (PT) Product Label Issues (HLT) Product Use Issues (PT)
	Underdose (PT)
Country (derived)	USA

⁶ The National Coordinating Council for Medication Error Reporting and Prevention (NCC MERP) Taxonomy of Medication Errors. Website http://www.nccmerp.org/pdf/taxo2001-07-31.pdf.

E.2 Results

Our search identified 68 cases, of which one (n= 1) described errors relevant for this review. We excluded 67 cases because they described:

- Adverse effect (n=13)
- Insufficient information to determine that a medication error occurred (n= 6)
- Medication error unrelated to voriconazole (n=17)
- Did not involve injectable formulation of Voriconazole (n=30)
- Product selection error due to name confusion between brand name Vfend and Venofer (n=1)

Improper Dose (n=1)

We identified one improper dose medication where patient was given wrong dose of voriconazole IV and experienced renal dysfunction and confusion while on voriconazole. Relevant lab data was unknown. No outcomes or additional information on the root cause of the overdose were provided. Hence, no further mitigations are required at this time. We will continue to monitor for this type of error through our routine post-market surveillance.

E.3 List of FAERS Case Numbers

Below is a list of the FAERS case number and manufacturer control numbers for the cases relevant for this review.

Case #	FDA Initial Recd Date	FDA Recd Date	Narrative
7837545	3/2/2011	3/2/2011	This is a spontaneous report from a non contactable consumer. This consumer reported for a physician that a patient (age, sex and race unknown) began taking voriconazole (VFEND) unknown dose unknown frequency for an unknown indication on an unknown date. Relevant medical history was unknown. Relevant concomitant medication was none. On an unknown date the patient was given wrong dose of voriconazole IV and experienced renal dysfunction and confusion while on voriconazole. Relevant lab data was unknown. At the time of the report patient was not taking voriconazole. At the time of the report the clinical outcome of all the above mentioned events was recovered. Follow-up status: Case closed (21Aug2009).

E.4 Description of FAERS

The FDA Adverse Event Reporting System (FAERS) is a database that contains information on adverse event and medication error reports submitted to FDA. The database is designed to support the FDA's postmarket safety surveillance program for drug and therapeutic biologic products. The informatic structure of the FAERS database adheres to the international safety reporting guidance issued by the International Conference on Harmonisation. FDA's Office of Surveillance and Epidemiology codes adverse events and medication errors to terms in the Medical Dictionary for Regulatory Activities (MedDRA) terminology. Product names are coded using the FAERS Product Dictionary. More information about FAERS can be found at: http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Surveillance/AdverseDrugEffects/default.htm.

Version: 7/10/2015 4

therefore, requesting exclusivity is not required.					
NDAs only : Is the proposed product a single enantiomer of a					
racemic drug previously approved for a different therapeutic					
use?					
If yes, did the applicant: (a) elect to have the single	📙		🗀		
enantiomer (contained as an active ingredient) not be					
considered the same active ingredient as that contained in an					
already approved racemic drug, and/or (b): request					
exclusivity pursuant to section 505(u) of the Act (per					
FDAAA Section 1113)?					
If yes, contact the Orange Book Staff (CDER-Orange Book Staff).					
BLAs only: Has the applicant requested 12-year exclusivity					
under section 351(k)(7) of the PHS Act?					
If yes, notify Marlene Schultz-DePalo, CDER Purple Book					
Manager					
Note: Exclusivity requests may be made for an original BLA					
submitted under Section 351(a) of the PHS Act (i.e., a biological					
reference product). A request may be located in Module 1.3.5.3					
and/or other sections of the BLA and may be included in a					
supplement (or other correspondence) if exclusivity has not been previously requested in the original 351(a) BLA. An applicant can					
receive exclusivity without requesting it; therefore, requesting					
exclusivity is not required.

REGULATORY PROJECT MANAGEMENT			
Signatory Authority: Sumati Nambiar, MD, MPH, Director			
Date of Mid-Cycle Meeting (for NME NDAs/BLAs in "the Program" PDUFA V):			
21st Century Review Milestones (see attached) (listing review milestones in this document is optional):			
Comm	nents:		
	REGULATORY CONCLUSIONS/DEFICIENCIES		
	The application is unsuitable for filing. Explain why:		
	The application, on its face, appears to be suitable for filing.		
	Review Issues:		
	No review issues have been identified for the 74-day letter. Review issues have been identified for the 74-day letter.		
	Review Classification:		
	Standard Review Priority Review		
ACTION ITEMS			
	Ensure that any updates to the review priority (S or P) and classifications/properties are entered into the electronic archive (e.g., chemical classification, combination product classification, orphan drug).		
	If RTF, notify everyone who already received a consult request, OSE PM, and RBPM		
	If filed, and the application is under AIP, prepare a letter either granting (for signature by Center Director) or denying (for signature by ODE Director) an exception for review.		
	If priority review, notify applicant in writing by day 60 (see CST for choices)		
	Send review issues/no review issues by day 74		
	Conduct a PLR format labeling review and include labeling issues in the 74-day letter		
	Update the PDUFA V DARRTS page (for applications in the Program)		
	Other		

Annual review of template by OND ADRAs completed: September 2014

REGULATORY PROJECT MANAGER PHYSICIAN'S LABELING RULE (PLR) FORMAT REVIEW OF THE PRESCRIBING INFORMATION

Complete for all new NDAs, BLAs, Efficacy Supplements, and PLR Conversion Labeling Supplements

Application: 208562

Application Type: New NDA

Name of Drug/Dosage Form: Voriconazole for Injection, 200mg

Applicant: Xeilla Pharmaceuticals ApS

Receipt Date: July 24, 2015

Goal Date: May 24, 2016

1. Regulatory History and Applicant's Main Proposals

On July 24, 2015 Xeilla Pharmaceuticals ApS submitted a new 505(b)(2)NDA for Voriconazole for Injection, 200mg. The basis for submission of this 505(b)(2) NDA is the Reference Listed Drug (RLD), Vfend[®] I.V. (voriconazile), 200 mg, subject of NDA # 021267 held by Pfizer and approved on May 24, 2002. The filing date of the application is September 22, 2015.

2. Review of the Prescribing Information

This review is based on the applicant's submitted Word format of the prescribing information (PI). The applicant's proposed PI was reviewed in accordance with the labeling format requirements listed in the "Selected Requirements for Prescribing Information (SRPI)" checklist (see the Appendix).

3. Conclusions/Recommendations

No SRPI format deficiencies were identified in the review of this PI.

RPM PLR Format Review of the PI: May 2014 Page 1 of 10

Appendix

The Selected Requirement of Prescribing Information (SRPI) is a 42-item, drop-down checklist of important <u>format</u> elements of the prescribing information (PI) based on labeling regulations (21 CFR 201.56 and 201.57) and guidances.

Highlights

See Appendix A for a sample tool illustrating the format for the Highlights.

HIGHLIGHTS GENERAL FORMAT

YES 1. Highlights (HL) must be in a minimum of 8-point font and should be in two-column format, with ½ inch margins on all sides and between columns.

Comment:

YES 2. The length of HL must be one-half page or less unless a waiver has been granted in a previous submission. The HL Boxed Warning does not count against the one-half page requirement.

<u>Instructions to complete this item</u>: If the length of the HL is one-half page or less, select "YES" in the drop-down menu because this item meets the requirement. However, if HL is longer than one-half page, select "NO" unless a waiver has been granted.

Comment:

3. A horizontal line must separate HL from the Table of Contents (TOC). A horizontal line must separate the TOC from the FPI.

Comment:

YES 4. All headings in HL must be **bolded** and presented in the center of a horizontal line (each horizontal line should extend over the entire width of the column as shown in Appendix A). The headings should be in UPPER CASE letters.

Comment:

NO 5. White space should be present before each major heading in HL. There must be no white space between the HL Heading and HL Limitation Statement. There must be no white space between the product title and Initial U.S. Approval. See Appendix A for a sample tool illustrating white space in HL.

Comment:

YES 6. Each summarized statement or topic in HL must reference the section(s) or subsection(s) of the Full Prescribing Information (FPI) that contain more detailed information. The preferred format is the numerical identifier in parenthesis [e.g., (1.1)] at the end of each summarized statement or topic.

Comment:

YES 7. Section headings must be presented in the following order in HL:

Section	Required/Optional
Highlights Heading	Required
Highlights Limitation Statement	Required
Product Title	Required
Initial U.S. Approval	Required

SRPI version 4: May 2014 Page 2 of 10

Boxed Warning	Required if a BOXED WARNING is in the FPI
Recent Major Changes	Required for only certain changes to PI*
Indications and Usage	Required
Dosage and Administration	Required
Dosage Forms and Strengths	Required
Contraindications	Required (if no contraindications must state "None.")
Warnings and Precautions	Not required by regulation, but should be present
Adverse Reactions	Required
Drug Interactions	Optional
Use in Specific Populations	Optional
Patient Counseling Information Statement	Required
Revision Date	Required

^{*} RMC only applies to the BOXED WARNING, INDICATIONS AND USAGE, DOSAGE AND ADMINISTRATION, CONTRAINDICATIONS, and WARNINGS AND PRECAUTIONS sections.

Comment:

HIGHLIGHTS DETAILS

Highlights Heading

YES

8. At the beginning of HL, the following heading must be **bolded** and should appear in all UPPER CASE letters: "HIGHLIGHTS OF PRESCRIBING INFORMATION".

Comment:

Highlights Limitation Statement

NO

9. The bolded HL Limitation Statement must include the following verbatim statement: "These highlights do not include all the information needed to use (insert name of drug product) safely and effectively. See full prescribing information for (insert name of drug product)." The name of drug product should appear in UPPER CASE letters.

Comment: Name of drug product not in upper case letters.

Product Title in Highlights

YES

10. Product title must be **bolded**.

Comment:

Initial U.S. Approval in Highlights

YES

11. Initial U.S. Approval in HL must be **bolded**, and include the verbatim statement "**Initial U.S. Approval:**" followed by the **4-digit year**.

Comment:

Boxed Warning (BW) in Highlights

N/A

12. All text in the BW must be **bolded**.

Comment:

13. The BW must have a heading in UPPER CASE, containing the word "WARNING" (even if more than one warning, the term, "WARNING" and not "WARNINGS" should be used) and other words to identify the subject of the warning (e.g., "WARNING: SERIOUS INFECTIONS and ACUTE HEPATIC FAILURE"). The BW heading should be centered.

SRPI version 4: May 2014 Page 3 of 10

Comment:

N/A

14. The BW must always have the verbatim statement "See full prescribing information for complete boxed warning." This statement should be centered immediately beneath the heading and appear in italics.

Comment:

N/A

15. The BW must be limited in length to 20 lines (this includes white space but does not include the BW heading and the statement "See full prescribing information for complete boxed warning.").

Comment:

Recent Major Changes (RMC) in Highlights

N/A

16. RMC pertains to only the following five sections of the FPI: BOXED WARNING, INDICATIONS AND USAGE, DOSAGE AND ADMINISTRATION, CONTRAINDICATIONS, and WARNINGS AND PRECAUTIONS. RMC must be listed in the same order in HL as the modified text appears in FPI.

Comment:

17. The RMC must include the section heading(s) and, if appropriate, subsection heading(s) affected by the recent major change, together with each section's identifying number and date (month/year format) on which the change was incorporated in the PI (supplement approval date). For example, "Warnings and Precautions, Acute Liver Failure (5.1) --- 9/2013".

Comment:

18. The RMC must list changes for at least one year after the supplement is approved and must be removed at the first printing subsequent to one year (e.g., no listing should be one year older than revision date).

Comment:

Indications and Usage in Highlights

19. If a product belongs to an established pharmacologic class, the following statement is required under the Indications and Usage heading in HL: "(Product) is a (name of established pharmacologic class) indicated for (indication)".

Comment:

Dosage Forms and Strengths in Highlights

20. For a product that has several dosage forms (e.g., capsules, tablets, and injection), bulleted subheadings or tabular presentations of information should be used under the Dosage Forms and Strengths heading.

Comment:

Contraindications in Highlights

SRPI version 4: May 2014 Page 4 of 10

Reference ID: 3828075

21. All contraindications listed in the FPI must also be listed in HL or must include the statement "None" if no contraindications are known. Each contraindication should be bulleted when there is more than one contraindication.

Comment:

Adverse Reactions in Highlights

YES

22. For drug products other than vaccines, the verbatim **bolded** statement must be present: "To report SUSPECTED ADVERSE REACTIONS, contact (insert name of manufacturer) at (insert manufacturer's U.S. phone number) or FDA at 1-800-FDA-1088 or www.fda.gov/medwatch".

Comment:

Patient Counseling Information Statement in Highlights

YES

23. The Patient Counseling Information statement must include one of the following three **bolded** verbatim statements that is most applicable:

If a product **does not** have FDA-approved patient labeling:

• "See 17 for PATIENT COUNSELING INFORMATION"

If a product has FDA-approved patient labeling:

- "See 17 for PATIENT COUNSELING INFORMATION and FDA-approved patient labeling"
- "See 17 for PATIENT COUNSELING INFORMATION and Medication Guide"

Comment:

Revision Date in Highlights

YES

24. The revision date must be at the end of HL, and should be **bolded** and right justified (e.g., "Revised: 9/2013").

Comment:

SRPI version 4: May 2014 Page 5 of 10

Contents: Table of Contents (TOC)

See Appendix A for a sample tool illustrating the format for the Table of Contents.

YES 25. The TOC should be in a two-column format.

Comment:

YES 26. The following heading must appear at the beginning of the TOC: "FULL PRESCRIBING INFORMATION: CONTENTS". This heading should be in all UPPER CASE letters and bolded.

Comment:

N/A 27. The same heading for the BW that appears in HL and the FPI must also appear at the beginning of the TOC in UPPER CASE letters and **bolded**.

Comment:

YES 28. In the TOC, all section headings must be **bolded** and should be in UPPER CASE.

Comment:

YES 29. In the TOC, all subsection headings must be indented and not bolded. The headings should be in title case [first letter of all words are capitalized except first letter of prepositions (through), articles (a, an, and the), or conjunctions (for, and)].

Comment:

YES 30. The section and subsection headings in the TOC must match the section and subsection headings in the FPI.

Comment:

YES 31. In the TOC, when a section or subsection is omitted, the numbering must not change. If a section or subsection from 201.56(d)(1) is omitted from the FPI and TOC, the heading "FULL PRESCRIBING INFORMATION: CONTENTS" must be followed by an asterisk and the following statement must appear at the end of TOC: "*Sections or subsections omitted from the full prescribing information are not listed."

Comment:

SRPI version 4: May 2014 Page 6 of 10

Full Prescribing Information (FPI)

FULL PRESCRIBING INFORMATION: GENERAL FORMAT

YES

32. The **bolded** section and subsection headings in the FPI must be named and numbered in accordance with 21 CFR 201.56(d)(1) as noted below (section and subsection headings should be in UPPER CASE and title case, respectively). If a section/subsection required by regulation is omitted, the numbering must not change. Additional subsection headings (i.e., those not named by regulation) must also be **bolded** and numbered.

Comment:

33. The preferred presentation for cross-references in the FPI is the <u>section</u> (not subsection) heading followed by the numerical identifier. The entire cross-reference should be in *italics* and enclosed within brackets. For example, "[see Warnings and Precautions (5.2)]" or "[see Warnings and Precautions (5.2)]".

<u>Comment</u>:

SRPI version 4: May 2014 Page 7 of 10

Reference ID: 3828075

34. If RMCs are listed in HL, the corresponding new or modified text in the FPI sections or subsections must be marked with a vertical line on the left edge.

Comment:

FULL PRESCRIBING INFORMATION DETAILS

FPI Heading

YES 35. The following heading must be **bolded** and appear at the beginning of the FPI: "FULL PRESCRIBING INFORMATION". This heading should be in UPPER CASE.

Comment:

BOXED WARNING Section in the FPI

N/A 36. In the BW, all text should be **bolded**.

Comment:

N/A

37. The BW must have a heading in UPPER CASE, containing the word "WARNING" (even if more than one Warning, the term, "WARNING" and not "WARNINGS" should be used) and other words to identify the subject of the Warning (e.g., "WARNING: SERIOUS INFECTIONS and ACUTE HEPATIC FAILURE").

Comment:

CONTRAINDICATIONS Section in the FPI

YES 38. If no Contraindications are known, this section must state "None."

Comment:

ADVERSE REACTIONS Section in the FPI

YES 39. When clinical trials adverse reactions data are included (typically in the "Clinical Trials Experience" subsection of ADVERSE REACTIONS), the following verbatim statement or appropriate modification should precede the presentation of adverse reactions:

"Because clinical trials are conducted under widely varying conditions, adverse reaction rates observed in the clinical trials of a drug cannot be directly compared to rates in the clinical trials of another drug and may not reflect the rates observed in practice."

Comment:

YES 40. When postmarketing adverse reaction data are included (typically in the "Postmarketing Experience" subsection of ADVERSE REACTIONS), the following verbatim statement or appropriate modification should precede the presentation of adverse reactions:

"The following adverse reactions have been identified during post-approval use of (insert drug name). Because these reactions are reported voluntarily from a population of uncertain size, it is not always possible to reliably estimate their frequency or establish a causal relationship to drug exposure."

Comment:

PATIENT COUNSELING INFORMATION Section in the FPI

NO 41. Must reference any FDA-approved patient labeling in Section 17 (PATIENT COUNSELING INFORMATION section). The reference should appear at the beginning of Section 17 and

SRPI version 4: May 2014 Page 8 of 10

include the type(s) of FDA-approved patient labeling (e.g., Patient Information, Medication Guide, Instructions for Use).

Comment:

NO

42. FDA-approved patient labeling (e.g., Medication Guide, Patient Information, or Instructions for Use) must not be included as a subsection under section 17 (PATIENT COUNSELING INFORMATION). All FDA-approved patient labeling must appear at the end of the PI upon approval.
