1 INTRODUCTION

This memorandum is to reassess the proposed proprietary name, Symproic, which was found conditionally acceptable under IND 107475 on December 2, 2015.¹ We note that all product characteristics remain the same.

2 METHODS AND DISCUSSION

For re-assessment of the proposed proprietary name, DMEPA evaluated the previously identified names of concern considering any lessons learned from recent post-marketing experience, which may have altered our previous conclusion regarding the acceptability of the proposed proprietary name. Additionally, DMEPA searched the USAN stem list to determine if the name contains any USAN stems as of the last USAN updates. The June 10, 2016 search of USAN stems did not find any USAN stems in the proposed proprietary name.

2.1 MISBRANDING ASSESSMENT

The Office of Prescription Drug Promotion (OPDP) determined that the proposed name would not misbrand the proposed product. DMEPA and the Division of the Division of Gastroenterology and Inborn Errors Products (DGIEP) concurred with the findings of OPDP's assessment of the proposed name.

3 CONCLUSIONS

Our re-assessment did not identify any names that represent a potential source of drug name confusion. Therefore, we maintain that the proposed proprietary name is acceptable.

If you have any questions or need clarifications, please contact Ginneh Stowe, OSE project manager, at 301-796 4049.

3.1 COMMENTS TO THE APPLICANT

We have completed our review of the proposed proprietary name, Symproic, and have concluded that this name is acceptable.

If any of the proposed product characteristics as stated in your April 19, 2016 submission are altered prior to approval of the marketing application, the name must be resubmitted for review.
