Approval Package for:

APPLICATION NUMBER:

219531Orig1s000

Trade Name: Sdamlo for oral solution

Generic or Proper Name: amlodipine

Sponsor: Brillian Pharma Inc.

Approval Date: July 24, 2025

Indication: Indicated for the treatment of:

- Hypertension
 - to lower blood pressure in adults and pediatric patients 6 years of age and older.
- Coronary Artery Disease in adults
 - Chronic Stable Angina
 - Vasospastic Angina (Prinzmetal's or Variant Angina)
 - Angiographically Documented Coronary Artery Disease in patients without heart failure or an ejection fraction < 40%

APPROVAL LETTER

NDA 219531

NDA APPROVAL

Brilliant Pharma Inc.
Attention: Nuo Wang, PhD
Chief Technology Officer
139 Glendale Avenue
Edison, NJ 08817

Dear Dr. Wang:

Please refer to your new drug application (NDA) dated July 19, 2024, received September 24, 2024, and your amendments, submitted pursuant to section 505(b)(2) of the Federal Food, Drug, and Cosmetic Act (FDCA) for Sdamlo (amlodipine) for oral solution.

This NDA provides for the use of Sdamlo (amlodipine) for oral solution for the treatment of:

- Hypertension, to lower blood pressure in adults and pediatric patients 6 years of age and older.
- Coronary Artery Disease in adults; chronic stable angina, vasospastic angina (Prinzmetal's or variant angina), and angiographically documented coronary artery disease in patients without heart failure or an ejection fraction < 40% to reduce the risk of a coronary revascularization procedure.

APPROVAL & LABELING

We have completed our review of this application, as amended. It is approved, effective on the date of this letter, for use as recommended in the enclosed agreed-upon labeling.

CONTENT OF LABELING

As soon as possible, but no later than 14 days from the date of this letter, submit the content of labeling [21 CFR 314.50(l)] in structured product labeling (SPL) format using the FDA automated drug registration and listing system (eLIST), as described at [FDA.gov](https://www.fda.gov).¹ Content of labeling must be identical to the enclosed labeling (text for the Prescribing Information and Instructions for Use) as well as annual reportable changes not included in the enclosed labeling. Information on submitting SPL files using eLIST may be found in the guidance for industry *SPL Standard for Content of Labeling*

¹ <https://www.fda.gov/ForIndustry/DataStandards/StructuredProductLabeling/default.htm>

*Technical Qs and As.*²

The SPL will be accessible via publicly available labeling repositories.

CARTON AND CONTAINER LABELING

Submit final printed carton and container labeling that are identical to the enclosed carton and container labeling as soon as they are available, but no more than 30 days after they are printed. Please submit these labeling electronically according to the guidance for industry *SPL Standard for Content of Labeling Technical Qs & As*. For administrative purposes, designate this submission “**Final Printed Carton and Container Labeling for approved NDA 219531.**” Approval of this submission by FDA is not required before the labeling is used.

DATING PERIOD

Based on the stability data submitted to date, the expiry dating period for Sdamlo (amlodipine) for oral solution shall be 24 months from the date of manufacture when stored at 20°C to 25°C.

REQUIRED PEDIATRIC ASSESSMENTS

Under the Pediatric Research Equity Act (PREA) (21 U.S.C. 355c), all applications for new active ingredients (which includes new salts and new fixed combinations), new indications, new dosage forms, new dosing regimens, or new routes of administration are required to contain an assessment of the safety and effectiveness of the product for the claimed indication in pediatric patients unless this requirement is waived, deferred, or inapplicable.

We are waiving the pediatric study requirement for age birth to 17 years for the treatment of coronary artery disease (chronic stable angina, vasospastic angina (Prinzmetal's or variant angina), and angiographically documented coronary artery disease in patients without heart failure or an ejection fraction < 40%) because necessary studies are impossible or highly impracticable.

We are deferring submission of your pediatric study for ages birth to <6 years of age for the treatment of hypertension because this product is ready for approval for use in adults and the pediatric study has not been completed.

Your deferred pediatric study required by section 505B(a) of FDCA is a required postmarketing study. The status of this postmarketing study must be reported annually according to 21 CFR 314.81 and section 505B(a)(4)(C) of the FDCA. This required

² We update guidances periodically. For the most recent version of a guidance, check the FDA Guidance Documents Database <https://www.fda.gov/RegulatoryInformation/Guidances/default.htm>.

study is listed below.

- 4873-1 Conduct a dose-ranging, safety, tolerability, and efficacy study of amlodipine oral solution for the treatment of hypertension in pediatric patients birth to <6 years of age. The study protocol should be agreed with the FDA prior to initiation of the study.

Final Protocol Submission: 12/2025

Study Initiation: 09/2026

Study Completion: 09/2030

Final Report Submission: 03/2031

FDA considers the term *final* to mean that the applicant has submitted a protocol, the FDA review team has sent comments to the applicant, and the protocol has been revised as needed to meet the goal of the study or clinical trial.³

Submit the protocol to your IND 157136, with a cross-reference letter to this NDA. Reports of this required pediatric postmarketing study must be submitted as an NDA or as a supplement to your approved NDA with the proposed labeling changes you believe are warranted based on the data derived from this study. When submitting the reports, please clearly mark your submission "**SUBMISSION OF REQUIRED PEDIATRIC ASSESSMENTS**" in large font, bolded type at the beginning of the cover letter of the submission.

PROMOTIONAL MATERIALS

You may request advisory comments on proposed introductory advertising and promotional labeling. For information about submitting promotional materials, see the final guidance for industry *Providing Regulatory Submissions in Electronic and Non-Electronic Format—Promotional Labeling and Advertising Materials for Human Prescription Drugs*.⁴

As required under 21 CFR 314.81(b)(3)(i), you must submit final promotional materials, and the Prescribing Information, at the time of initial dissemination or publication, accompanied by a Form FDA 2253. Form FDA 2253 is available at FDA.gov.⁵ Information and Instructions for completing the form can be found at FDA.gov.⁶

³ See the guidance for Industry *Postmarketing Studies and Clinical Trials—Implementation of Section 505(o)(3) of the Federal Food, Drug, and Cosmetic Act (October 2019)*.

REPORTING REQUIREMENTS

We remind you that you must comply with reporting requirements for an approved NDA (21 CFR 314.80 and 314.81).

COMPENDIAL STANDARDS

A drug with a name recognized in the official United States Pharmacopeia or official National Formulary (USP-NF) generally must comply with the compendial standards for strength, quality, and purity, unless the difference in strength, quality, or purity is plainly stated on its label (see FD&C Act § 501(b), 21 USC 351(b)). FDA typically cannot share application-specific information contained in submitted regulatory filings with third parties, which includes USP-NF. To help ensure that a drug continues to comply with compendial standards, application holders may work directly with USP-NF to revise official USP monographs. More information on the USP-NF is available on USP's website⁷.

If you have any questions, please contact Sabry Soukehal, Regulatory Health Project Manager, at (240) 402-6187.

Sincerely,

{See appended electronic signature page}
