1.3.2 Confidential Information Statement

All information in this OMOR submission that DSM considers confidential, proprietary or a trade secret, in accordance with Section 505G(d)(1) and 505G(d)(2) of the FD&C Act, 18 U.S.C. 1905, and FOIA exemptions under 5 U.S.C. 552(b)(4), has been identified. Confidential information is clearly designated using the following methodology.

- **Headers/Footers:** Pages are marked with "CONFIDENTIAL," "TRADE SECRET," or "PROPRIETARY."
- **Brackets and Highlighting:** Confidential sections are enclosed in square brackets [] and highlighted in yellow.

1.3.3 Environmental Assessment

RECORDS NOT WITHIN SCOPE OF SECTION 505G(d)(2) OF THE FD&C ACT

MGF-400105
Bemotrizinol (BEMT)

RECORDS NOT WITHIN SCOPE OF SECTION 505G(d)(2) OF THE FD&C ACT

1.3.4 Statement of Claimed Exclusivity

DSM requests 18 months of market exclusivity for BEMT 6% under Section 505G(b)(5)(C) of the FD&C Act. This OMOR submission for BEMT includes new human pharmacokinetic MuST studies ([BEMT-001, Module 5](#)), sponsored by DSM, which are essential for the GRASE determination and therefore qualify for exclusivity. Furthermore, the final order will establish BEMT 6% as a new active ingredient in FDA's OTC Monograph M020, confirming its GRASE status for the intended use.

1.3.5 Draft USP Monograph for BEMT

In follow-up to the Type Y meeting between the DSM and the FDA on February 5, 2024, a copy of the most recent draft USP Monograph (PF 47(5)) for BEMT is provided as an attachment to this module ([link](#)). DSM is continuing to work with USP on finalizing this monograph.

1.3.6 Pediatric Use

As discussed during the Type Y meeting between DSM and the FDA on February 5, 2024 (refer to the official meeting minutes from March 6, 2024, in [Module 1.6.3](#)), DSM confirmed its intent to market Bemotrizinol (BEMT) at a 6% concentration for use in sunscreen products intended for adults and children aged six months and older. Consequently, DSM has updated the Drug Facts Label to include the statement “*Children under 6 months: Ask a doctor*” and align with FDA's sunscreen labeling requirements as outlined in the Over-the-Counter Sunscreen Monograph M020 ([Module 1.14](#)).

Furthermore, as indicated by the FDA in the official minutes from the March 6, 2024, Type Y meeting, there are no Pediatric Research Equity Act (PREA) requirements for monograph products. In alignment with the 2019 Sunscreen Proposed Rule and the 2021 Sunscreen Proposed Order, the FDA has indicated that as long as a wide margin of safety exists, it is unlikely to request additional pediatric information beyond the required clinical data. The FDA also recommended that DSM include any available pediatric data from the European market in its OMOR submission, including postmarketing safety reports, while noting that no specific pediatric studies are being requested.

MGF-400105
Bemotrizinol (BEMT)

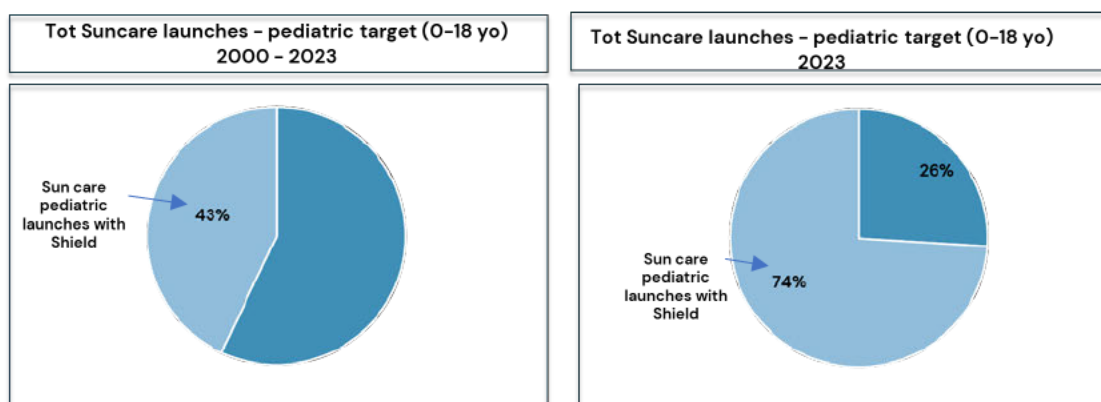

In follow-up, has conducted a market analysis using data from the 2000 -2023 Global New Product Database (GNPD) for data EU Countries including: Austria; Belgium; Czech Republic; Denmark; Finland; France; Germany; Greece; Hungary; Ireland; Italy; Netherlands; Poland; Portugal; Spain; Sweden; Switzerland; UK; Latvia; Lithuania; Estonia; Bulgaria; Romania; Croatia; Slovakia; Slovenia (excluding Cyprus, Luxembourg and Malta).

This database, operated by Mintel, tracks new product launches, formulations, packaging, and claims across a wide range of industries, including beauty, personal care, food, and beverages. The GNPD is widely used by companies, marketers, and researchers to understand market trends, innovations, and consumer preferences. The GNPD-based market survey includes information on European market usage trends, market size, and examples of pediatric sunscreen products and labels containing BEMT (INCI: Bis-ethylhexyloxyphenol Methoxyphenyl Triazine). The relevant product age demographics searched were:

- Babies & Toddlers (age 0-4 years) and includes products intended for newborns, babies, toddlers, or infants.
- Children (age 5-12 years).
- Teenagers (age 13-17 years).

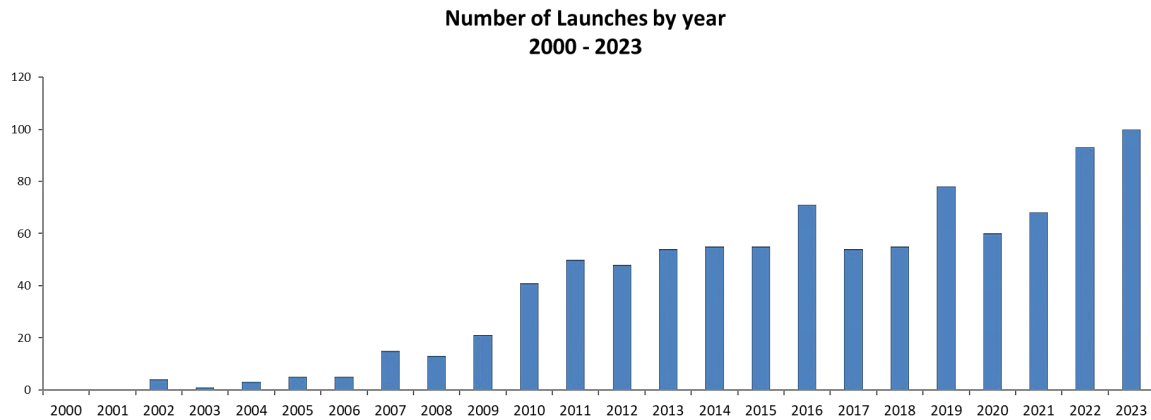

Survey results indicate the following:

- 43% of total Suncare pediatric launches between years 2000 to 2023 contained BEMT (PARSOL® Shield: DSM Tradename for BEMT)
- Number of launches increased YoY, leading to a greater share of 74% in 2023

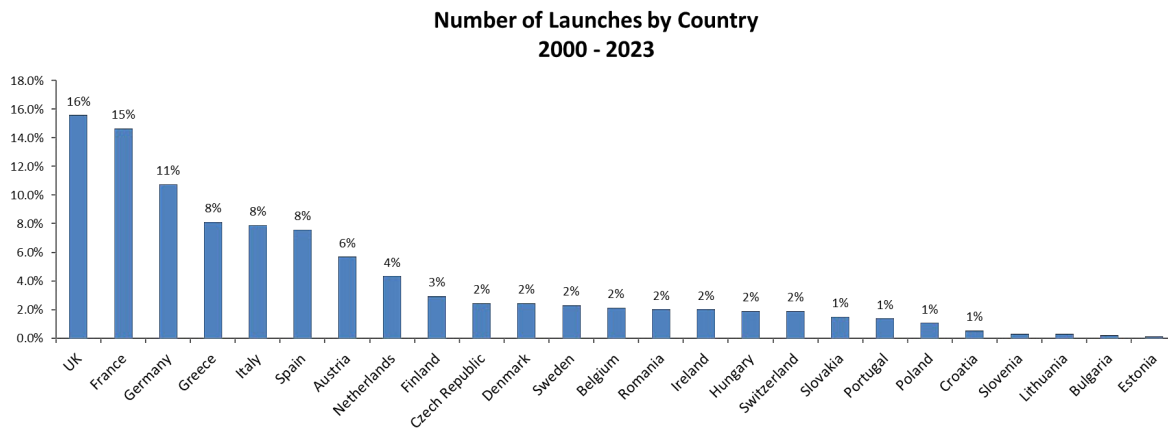

MGF-400105
Bemotrizinol (BEMT)

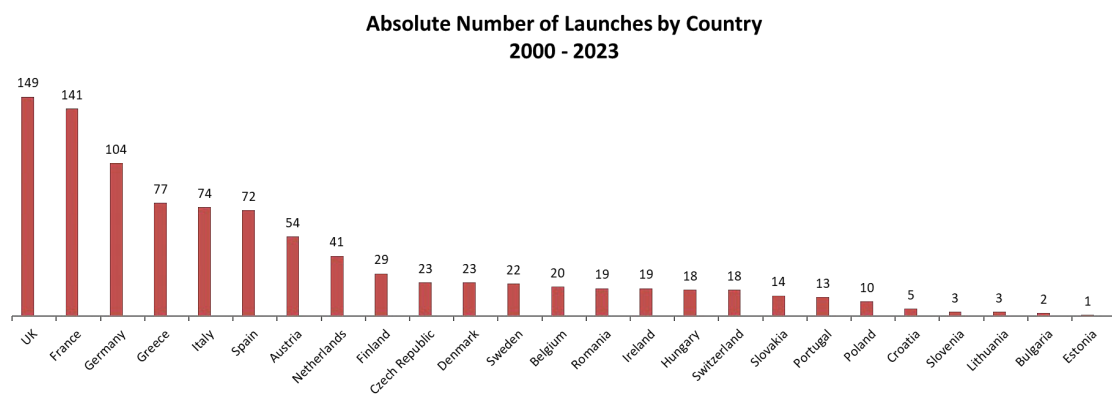

- Number of pediatric suncare product launches have increased year on year

- UK, France and Germany account for 40% of launches

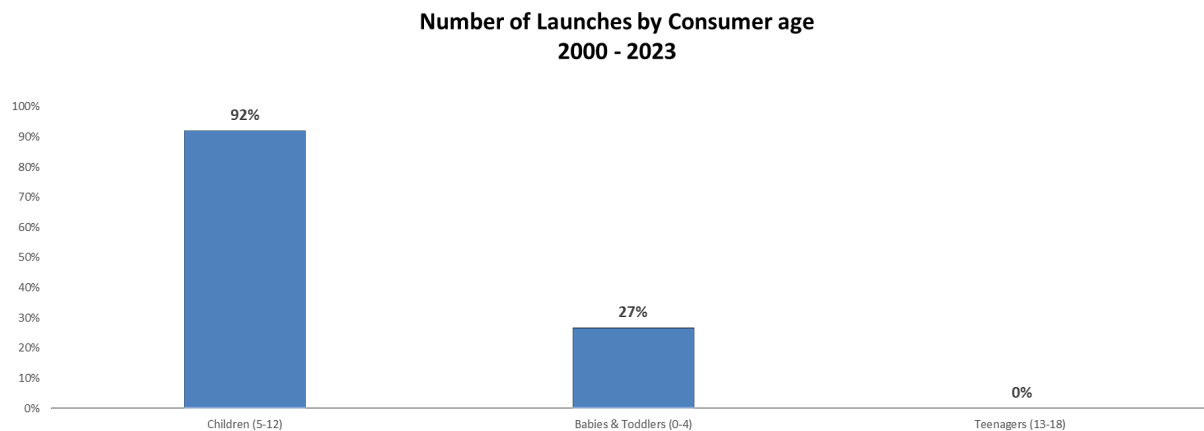

- Absolute Number of product launches (2000-2023)

MGF-400105
Bemotrizinol (BEMT)

Most of the launches target kids (5-12yo): 92%, followed by babies and toddlers (0-4yo): 27%

Source: Mintel GNPD – 2000 -2023 data – EU Countries (excluding Cyprus, Luxembourg and Malta) SunCare launches with Bis-Ethylhexyloxyphenol Methoxyphenyl Triazine/ Pediatric target (0-18yo).

Examples of various product labels for the years 2010, 2016 and 2023 are attached to this module ([Appendix 1](#), [2](#), [3](#), respectively). Additional information supporting the margin of safety for pediatric use can be found in [section 2.4.5](#).

Pharmacovigilance

Bemotrizinol has been approved in the EU since 2000 and since then has been approved in most countries and regions around the world. It is included in the EU Cosmetics Regulation (EC No 1223/2009) under Annex VI, which lists approved UV filters for use in cosmetic products. Bemotrizinol is allowed in concentrations of up to 10%. In Australia, Bemotrizinol was approved for use in sunscreens in 2006 by the Therapeutic Goods Administration (TGA). Bemotrizinol is listed as an approved UV filter under the Australian Therapeutic Goods Order (TGO) 92.

There are no widely documented case reports or clinical data that specifically highlight adverse events related to the use of Bemotrizinol in children. Post-market surveillance of the public literature, case reports, and adverse event databases such as the European Medicines Agency (EMA) pharmacovigilance reporting EudraVigilance system, the Australian Therapeutic Goods Administration (TGA) Database of Adverse Event Notifications reporting systems, and the Canada Vigilance Adverse Reaction Online Database available in countries where Bemotrizinol is already approved do not indicate any safety concerns in pediatric populations.

MGF-400105
Bemotrizinol (BEMT)

Safety Assessment

The overall safety of BEMT for use in consumer sun protection products has been demonstrated in each of the pivotal nonclinical studies and the clinical safety studies we have conducted and include in this Tier 1 OMOR. The large MOS is considered sufficient for all age categories, including pediatric populations (6 months and older).

This is particularly and strongly supported by the absence of adverse effects or indications from of the development and reproductive tests of the complete reproductive cycle in rats, rabbit embryo-fetal developmental testing, and absence of effects to estrogen, androgen, fertility markers. In none of the nonclinical repeat dose studies, including subchronic and chronic dosing for lifetime of rats and 9 months to minipigs did any of the animals have behavioral signs or cellular and tissue-organ level changes signaling a hormone-axis related effect. Neoplastic, non-neoplastic, or genotoxic markers were not induced by BEMT through any of the dosing regimens used and thereby do not indicate any cause-for-concern of target tissue effects.

The absence of adverse effects clinically and in key nonclinical studies gives clear indication that BEMT can be used in products intended for use in people ages 6 months and older and has been so used and marketed globally since 2000 as indicated above.

Bemotrizinol (BEMT)

Product Description

Dado Sens Dermacosmetics specialises in making products for sensitive skin and all delicate skin conditions (including psoriasis and eczema). Its dermatologically-tested products are free from fragrance, colourant, parabens, petroleum derivatives, PEG, SLS and silicone, do not contain animal ingredients, and come in recyclable packaging bearing the FSC label. They have not been tested on animals. The SUN range is claimed to provide high, long-lasting UVA/UVB protection. It is formulated with an anti-ageing complex of ectoin, tiliroside and SymHelios to prevent premature skin ageing, block free radicals and other environmental aggressors, and promote the natural skin renewal process to minimise wrinkles; vitamin E to support skin regeneration; and jojoba oil, sweet almond oil and West African shea butter to care for sensitive skin. Available in the range is Crème Solaire Enfants IP 30 (Kids Sun Cream SPF 30), targeted at dry and sensitive skin. The water-resistant product is said to protect and calm the skin, as well as supporting regeneration.

Beauty Innovation

Native product name:

Crème Solaire Enfants IP 30

Leaflet Info:

- High dermatological sun protection
- Care and protection for sensitive and irritated skin

Millions of people suffer from a variety of skin problems such as sun and contact allergies, atopic dermatitis or dry skin.

Despite their sensitive skin, many people still require sun protection. The dermatological sun protection care from DADO SENS has been especially developed for problematic skin. Sensitive, irritated skin needs dependable sun protection with an optimal caring effect.

DADO SENS SUN with anti-aging active ingredient complex
Ectoin, flavonoids and Vitamin E support the regeneration process of the skin. Panthenol, allantoin and botanical squalane have a caring and calming effect.

DADO SENS SUN with the unique SymHelios cell protection
Offers long-lasting protection against damaging UV rays and other negative environmental influences. Minimizes wrinkles and inflammation caused by UV rays.

Especially developed for children's delicate skin

MGF-400105
Bemotrizinol (BEMT)

DADO SENS SUN Kids Sun Cream SPF 30 with valuable natural caring oils from controlled biological cultivation. Jojoba and almond oil combined with shea butter ensure an optimal caring effect.

Kids Sun Cream SPF 30

High sun protection factor especially for children's delicate, sun-sensitive skin. Also suitable for atopic dermatitis.

Directions:

Apply generously before exposure to the sun and repeat regularly, especially after swimming.

Cautions:

Babies and small children should wear protective clothing in addition to sun protection products with a high SPF.

Outer pack information:

Dry and sensitive skin

- High sun protection for delicate, dry and sensitive skin
- Especially suitable for atopic dermatitis and psoriasis
- Valuable natural oils

SPF 30 UVA/UVB

High

- Based on nature, free from fragrance, colorant, parabens, silicone

Manufacturer/product website information:
ALL ABOUT US

Skin care is a question of trust

Welcome to our DADO SENS Homepage! Here you will find all the information you need for natural, effective skin care.

Today skin problems are becoming increasingly common as more of people suffer from sensitive, allergic, dry and blemished skin. A number of factors including sunlight, air pollution and damaging additives in our food are largely responsible for this. Unfortunately many skin care products contain ingredients that are simply not compatible with your skin, and which can make your skin's condition worse.

How can you take the best care of your skin? We are convinced: you can fully meet the requirements of your skin when you understand what they are. It is our aim to give your skin exactly what it needs - no more and no less. We want to help your skin to find its natural balance. Beautiful skin is healthy skin! Years of research have given us considerable knowledge about the skin which, together with the focused input of dermatologists, forms the basis of our unique DADO SENS skin care products.

We have developed derma-cosmetic solutions based on nature for all delicate skin conditions. They are effective for allergy sufferers, those with atopic dermatitis, psoriasis, diabetes, rosacea or acne and are suitable for people of all ages. DADO SENS is the expert for natural, effective and skin-compatible derma-cosmetics.

Skin care is a matter of trust and that is why we promise to offer you only top quality products with clear information about our ingredients and how they work with your skin.

Welcome to the world of natural, effective skin care
Your DADO SENS Skin Care Team

Our Company

DADO-cosmed was founded in 1987, as part of the Börlind Group, and now employs more than 160 people and has an international reputation.

Mrs. Annemarie Lindner, a pioneer of natural cosmetics with her brand Annemarie Börlind Natural Beauty, founded DADO-cosmed after she was meeting increasing numbers of people with extremely sensitive and problematic skin.

MGF-400105 Bemotrizinol (BEMT)

They were allergic to fragrances, preservatives and herbal extracts, or had atopic dermatitis or psoriasis, and various types of acne. At this time derma-cosmetics based on nature were simply not available, in fact most over the counter treatments were (and largely still are) based on mineral oil derivatives and contain fragrances, colorants and preservatives. Seeing this Annemarie Lindner once again pioneered a new natural option. With the laboratory researchers from DADO-cosmed, and in consultation with dermatologists she was able to combine the very best of natural ingredients with the requirements of extremely sensitive, problematic skin.

Her efforts produced a range of unique products available under DADO SENS DERMACONTROL. These products are unique because they are formulated exclusively to meet the needs of sensitive skin and are effective, skin-compatible and natural.

The highly effective formulas contain high quality botanical oils and natural active ingredients, to stimulate the skin's own repair mechanism and support the skin to help itself. The latest development, the REGENERATION E series, is a response to the increasing demand for anti-aging products for sensitive, mature skin and irritated, allergic skin. REGENERATION E achieves a wonderful smooth and firm skin in only a short period of time.

In order to give consumers the best service in terms of recommending the most suitable DADO SENS product for their individual skin situation, we have created DADO-consult and the DADO-academy. DADO-consult is a highly effective, long term and very close cooperation with our trading partners. Supporting them in establishing a "centre of skin healthiness" we train them related to know-how in dermatology, natural derma-cosmetics and consumer communication. We do offer our partners to study these subjects at the DADO-academy which is working in close cooperation with the University of Calw.

Our Quality Criteria

- DADO SENS is a unique combination of natural ingredients, efficacy and skin-compatibility
- All products are based on nature
- They support the skin's own healing and regenerative powers
- Skin-compatibility and efficacy dermatologically tested
- All products meet with our strict quality standards
- Products for sensitive skin are free from fragrance, colorants and parabens
- DADO SENS products do not contain petroleum derivatives (e.g. paraffin) and no silicones
- They are free from PEG (Polyethylene glycol), SLS (sodium lauryl sulfate) and other irritating ingredients
- Our products do not contain any extracts obtained from dead animals
- There is no animal testing
- Detailed information about all ingredients is given with the products

FAQ

MGF-400105
Bemotrizinol (BEMT)

Do the products contain animal extracts?

No. All our products are exclusively based on natural active ingredients with excellent caring and protective properties. We categorically refuse to use animal extracts in our products.

I am an allergy sufferer. How can I find out which products are suitable?

All our products carry a full new, internationally applicable INCI-Norm (International Nomenclature of Cosmetic Ingredients) declaration. The ingredients search facilities in the category MY DADOSENS offers you the possibility to find the right product. Naturally, we would be pleased to answer any questions you may have about specific ingredients with reference to your own allergies.

How long is the shelf life of the products?

All products comply with the cosmetic guidelines and have a shelf life of at least 30 months.

Can I combine products from different series?

Basically, yes, as long as the products are all suitable for your skin type.

I am 28 years old. Do I already need Anti-Aging skin care? My skin is fairly sensitive and dry. Sensitive and dry skin is in particular danger of aging prematurely. This is because it is lacking in moisture and many of the skin's normal activities no longer function correctly. The skin loses vitality and its resistance to damaging environmental influences is reduced. The result is often premature wrinkle formation. It does, therefore, make sense to begin with anti-aging skin care at 28.

Press Release:

New Suncare Range DADO SENS SUN:

Dado Sens launches its new suncare range Dado Sens Sun, the products are suitable for those prone to skin conditions, sensitivity, and allergies in order to give a proper solution!

Dado Sens Sun, the dermatological sun protection for skin conditions!

Sun allergies, psoriasis, eczema, it can be difficult to find the right sun protection for skin conditions. The Dado Sens Sun range helps braving the sun while being safe, also for children and those with sensitive skin. Skin tolerance and efficiency have been clinically verified.

High tolerance formulas!

The Dado Sens Sun range formulas provide high protection thanks to SPF 30-50 filters, and a good tolerance for those with sensitive skin, dermatitis, psoriasis or acne rosacea.

Block free radicals!

The anti-ageing complex made from natural ectoin, tiliroside and SymHelios prevents premature ageing of the skin while protecting it from free radical damage. It also promotes the natural skin renewal process.

MGF-400105
Bemotrizinol (BEMT)

Multiply protections!

Dado Sens Sun developed an innovative formula, "SymHelios cell protection", which protects cells from long term damage caused by UVB rays and other environmental aggressors.

Answer all your needs!

To answer sensitive skin's demands and in particular those of children, the active ingredients used are jojoba oil, sweet almond oil and West African shea butter.

On the sunny beach, shells and seafood...

But before basking in the blazing sun, think of protecting yourself with the new Dado Sens Sun range.

Natural cosmetic Eco Control certified

Kids Sun Cream SPF 30

Specifically formulated for children's sensitive and fragile skin.

Product Description

Garnier Ambre Solaire Rapido Spray Latte Diffusione Continua IP 50 (Children's Light Rapid Sun Milk Spray SPF 50) features an easy to use continuous diffusion, ultra rapid and multi-position applicator spray, and conforms to EU recommendations. The hypoallergenic product features a fragrance-free formula that is water-resistant, and has been paediatrician-tested. The product has been formulated with the patented Mexoryl SX and Mexoryl XL formulas to protect from UVA/UVB rays, and hydrates the delicate skin of children. It is available in a 150ml pack and has been formulated to minimise the risk of allergies.

Product Description

Baby Sebamed Sun Spray SPF 50 has been clinically tested and is said to shield against sunburn. It is described as an easy to use, full-bodied, but very absorbing sun spray to protect baby's delicate skin. According to the manufacturer, it effectively repels water and sand and contains both physical and chemical protection. The dermatologically tested, unscented, alcohol-free, paraben-free product contains UVA filter 98% and pH 5.5. The product retails in a 200ml pack. Also available is Sun Lotion SPF 30.

Product Description

The Boots Soltan range of sun care products offering 5-star protection against premature-ageing UVA, sun-induced rashes and allergies extends with the addition of Once Kids Water Play Lotion SPF 50+, designed for children who are in and out of the water continuously while on holiday. The product is said to provide up to three hours water resistance and very high protection, with one application giving SPF 50+ protection for up to six hours. It features advanced protection system (patent pending) with a blend of photostable UVA and UVB filters that reduce the sun's burning effect on skin by up to 50 times. It also contains a patented antioxidant complex to boost skin's natural defence against longer-term skin damage, and innovative Optisol to reduce the amount of UVA and UVB rays entering the skin and counteract immediate damage from free radicals. The dermatologically-tested product comes in a 150ml pack priced £13.29.

Product Description

The Shiseido Expert Sun line features a WetForce formula, which has been designed to boost SuperVeil 360 technology, present in all Shiseido sunscreens, enabling the sunscreen to become stronger when it comes into contact with water or perspiration. The patented anti-ageing formula contains a stabilised form of Ionic Mineral Sensor, which contains negative ions recruiting the minerals in the water and perspiration to become part of the water-repellent layer that makes the UV-protective veil even stronger. Included as part of the range is Protection Lotion SPF 50+ for Sensitive Skin & Children, suitable for all skin types and said to protect skin from harmful environmental factors, sun, dryness and pollutants. The product is said to spread lightly and blend quickly with the skin, is easy to cleanse off with regular cleanser and is claimed to promote a smoother application of foundation. Designed for face and body, it contains minimum ingredients known to irritate the skin, and only carefully selected raw ingredients known for their high safety; and is infused with Profense CELS. a complex of ingredients that inhibits the enzyme activity, cell damage and DNA damage linked to the formation of wrinkles, and aloe extract, which has a soothing effect. Tested on sensitive skin and kids under dermatologist and paediatrician control, the tearless and non-comedogenic formula is very water- and perspiration-resistant, sand-proof and free from parabens, alcohol and fragrance.

Beauty Innovation

Leaflet Info:

Multi-Environment Defense. Multi-Faceted Skin Protection.

Protecting skin from harmful environmental factors is the key to maintaining a beautiful and healthy look. UV rays accelerate visible aging not only when skin faces intense summer rays, but also when it has cumulative exposure to weaker rays. Sun, dryness and pollutants all stress the skin's cell functions and impact its DNA. Building on more than a century of breakthroughs in skincare, Shiseido delivers scientifically advanced solutions for sun protection. Shiseido UV Protectors fuse innovative sunscreen technology with protective and stress-responsive skincare, so you can enjoy spending time outdoors.

360° protection

Exclusive SuperVeil-UV 360,H technology creates a UV-protective veil that adheres evenly to skin's microscopic contours. So no matter which angle the UV rays come from, the veil helps prevent them from reaching deep within, providing effective protection.

When you get wet, the veil of protection gets even stronger.*

Sunscreen products may wear off when you sweat or swim. But exclusive WetForce technology binds with the minerals in sweat and water, enhancing additional power in the protective veil.*

MGF-400105
Bemotrizinol (BEMT)

SPF (Sun Protection Factor) shows protection against UVB rays, the rays causing sunburn. A higher number equals higher protection.

UVA appears on products that follow the recommendations by the Cosmetics Europe for the efficacy and claims of sunscreen products. This mark indicates that the UVA protection factor is at least one-third as strong as the UVB protection factor. UVA rays cause photo-aging, while UVB rays cause sunburn.

SHISEIDO EXPERT SUN PROTECTION LOTION

For sensitive skin & children

Formulated with ingredients selected especially for sensitive skin, sun-sensitive skin and children's skin, this low-irritant sunscreen also features Shiseido's exclusive WetForce technology, so it gains power with water and perspiration*. The superior UV sunscreen powerfully protects the skin with a texture gentle enough for delicate skin.

- Protects skin from UVA.UVB rays and helps reduce the appearance of photo-aging with exclusive SuperVeil-UV 360° technology.
- Formulated with WetForce technology, which reacts positively to sweat and water on contact, activating additional strength within the protective veil.*
- Formulated with Profense CELS. a complex of ingredients that inhibits the enzyme activity,* cell damage and DNA damage" linked to the formation of wrinkles.
- Very water resistant Perspiration-resistant. Sand-proof.
- Contains minimum ingredients known to irritate the skin, and only carefully selected raw ingredients known for their high safety.
- Alcohol-free and fragrance-free.
- Contains aloe extract, which has a soothing effect.
- Tested on sensitive skin and kids under dermatologist and pediatrician control.
- Tearless formula.
- A lotion for the face and body that spreads lightly and blends quickly with the skin.
- Easy to cleanse off with regular cleanser
- Promotes a smoother application of foundation.

NON-COMEDOGENIC

The indicated sun protection level was measured by the quantity of 2 mg per 1 square centimeter in conformity with the authorized Sun Protection Factor Test Method.

* in vitro test

Directions:

Shake well before use.

MGF-400105
Bemotrizinol (BEMT)

Shake well before use.

Before sun exposure, apply generously and evenly over the skin.

When using on the face, apply after your regular skincare.

To remove, rinse off thoroughly using daily cleanser.

Cautions:

Avoid direct contact with eyes. If contact occurs, rinse eyes thoroughly with water.

Avoid contact with clothing and other textiles - may stain.

SUN SAFETY TIPS:

- Apply sunscreen products before exposure.
- Reapply frequently to maintain the sun protection, especially after swimming actively, or after towel-drying skin.
- Reducing the quantity of application will lower the level of protection significantly.
- Avoid prolonged sun exposure, even when using a sunscreen product.
- Overexposure to sun is a serious health threat.
- Seek shade during the hottest hours of the day.
- Always wear protective clothing, a wide-brimmed hat, and sunglasses.

Sun Safety Tips especially for babies and young children:

- Keep babies and young children out of direct sunlight.
- In addition to protective clothing, babies and young children should wear high protection sunscreen.

Outer pack information:

Shiseido

You vs. the Sun

Shiseido Suncare delivers scientifically advanced solutions for sun protection, sun make-up, after sun and self tanning.

Our latest WetForce technology is perhaps the most step forward since the invention of SPF, UV protection that's boosted by water and perspiration.
Now available for sensitive skin and children

PROTECTION

Shiseido UV protection fuses innovative sunscreen technology with protective and stress-responsive skincare, so you can enjoy spending time outdoors with confidence.

WETFORCE PROTECTION

UV Protection that teams up with water for extra performance.

MGF-400105
Bemotrizinol (BEMT)

WETFORCE TECHNOLOGY is perhaps the most spectacular step forward since the invention of SPF and most certainly a milestone in the history of suncare products. With WetForce, the UV protection is boosted by water and perspiration. LET WATER BE YOUR ALLY.

This game-changing innovation is designed to provide extra protection to those who swim and play sport. The anti-ageing formulas guarantee an even application and resistance to water. Now with a new, safer formula for all skin types including sensitive skin and children.

*To activate WetForce technology, expose the applied area to water or perspiration for 15 minutes. Be sure to reapply immediately after towel-drying skin.

Formulated for sensitive skin and children.

In consideration of sensitive skin and children, we have eliminated all allergic and irritant ingredients, and rigorously tested it so that it is tear-free and safe for even the most reactive skin.

Shiseido's unprecedented WetForce sun protection technology reacts to the minerals in water and perspiration to become even stronger. Together with WetForce technology, our SuperVeil-UV 360 actually strengthens to defend skin from the sun's damaging rays.

Now everyone can have fun in the sun-whether you're in the water or working up a sweat. Plus, our sensitive skin and children's formulations make it gentle enough for all skin types.*

No parabens, alcohol, or fragrance. Soothing extracts. Tear-free formula.

*For babies under 6 months, ask a doctor before use.

REAL RESULTS

Users overwhelmingly endorse Shiseido WetForce for sensitive skin & children.

93% of women said

"THE FORMULATION DOES NOT FEEL GREASY ON MY SKIN"

*After 1st application

The science behind Wetforce

Shiseido has achieved a revolutionary sunscreen development: WetForce technology. WetForce reinforces the UV-protective veil when it comes into contact with water or perspiration.

Every new Shiseido suncare product launched is formulated with our SuperVeil-UV 360 technology. It creates a UV-protective veil that adheres evenly to skin's microscopic contours. So no matter which angle the UV rays come from, the veil helps prevent them from reaching deep within, providing effective protection.

Now Shiseido has achieved another revolutionary sunscreen development: WetForce technology.

WetForce reinforces the UV-protective veil when it comes into contact with water or perspiration.

This new protector is sunscreen formulated with a stabilized form of Ionic Mineral Sensor, which contains negative ions. They bond powerfully with minerals in water (which are positive ions) to create a highly water-repellent layer.

*Compared before and after soaking in water for 30 minutes. Be sure to reapply product immediately after towel-drying skin. **To activate WetForce technology, expose the applied area to water or perspiration for 30 minutes.

We've done the tests, the results are in.

Customer Survey Result on 105 Caucasian women using
Expert Sun Aging Protection Cream Plus (after 1 - 2 days of application)

93% "It is more resistant to water and perspiration than any other protector I've ever used."

98% "it comes off easily with a regular cleanser."

94% "it doesn't feel sticky on my skin."

96% "I think it has longer lasting UV protection than other protectors."

92% "Definitely want to use it when going to the beach or on holiday."

Understanding UV Rays

UV rays may only count for a small fraction of the sun's rays, but they're still the driving force behind skin cancer. Here are the 2 main types of UV radiation.

MGF-400105
Bemotrizinol (BEMT)

UVA: Rays that age skin and increase vulnerability to melanomas.

UVB: Rays that burn skin that are mostly prevalent between 10am and 2pm.

The effect of UV rays varies by how much light is directly absorbed by the skin as well as by the amount reflected by the surrounding environment.

Snow and water have a particularly high rate of reflectivity, so when you're enjoying winter sports, don't forget to use broad spectrum sun-protection products with a high SPF.

Expert Sun Protection Lotion
For sensitive skin and children

Formulated with ingredients selected especially for sensitive skin, sun-sensitive skin and children's skin, this low-irritant sunscreen also features Shiseido's exclusive Wetforce technology, so it gains power with water and perspiration*. The superior UV sunscreen powerfully protects the skin with the texture gentle enough for delicate skin.

Protects skin from UVA/UVB rays and helps reduce the appearance of photo-aging with exclusive SuperVeil-UV 360 technology.

Very water-resistant. Perspiration-resistant. Sand-proof.

For whom?

Formulated with ingredients selected especially for sensitive skin, sun-sensitive skin and children's skin.

TECHNOLOGY

UV PROTECTION THAT TEAMS UP WITH WATER FOR EXTRA PERFORMANCE.

WetForce. Safer,* stronger UV protection — powered by water or sweat.**

THE WETFORCE TECHNOLOGY is perhaps the most spectacular step forward since the invention of UV protection and most certainly a milestone in the history of suncare products. In our Wetforce products, the UV Protection gets boosted by water and perspiration.

THE SCIENCE BEHIND WETFORCE

Every new Shiseido suncare product launched is formulated with our SuperVeil-UV technology. It creates a UV-protective veil that adheres evenly to skin's microscopic contours. So no matter which angle the UV rays come from, the veil helps prevent them from reaching deep within, providing effective protection.

Now Shiseido has achieved another revolutionary sunscreen development: WetForce technology. WetForce reinforces the UV-protective veil when it comes into contact*** with water or perspiration**.

MGF-400105
Bemotrizinol (BEMT)

This new protector is sunscreen formulated with a stabilized form of Ionic Mineral Sensor, which contains* negative ions. They bond powerfully with minerals in water (which are positive ions) to create a highly water-repellent layer.

*Safer formula for all skin types including sensitive skin and children.

**Compared before and after soaking in water for 30 minutes. Be sure to reapply product immediately after towel-drying skin.

**To activate WetForce technology, expose the applied area to water or perspiration for 30 minutes. Be sure to reapply immediately after towel-drying skin.

Product Description

Expanscience Laboratoires Mustela Bébé-Enfant Latte Solare Protezione Molto Alta SPF 50+ (Baby-Children Very High Protection Sun Lotion SPF 50+) is now available in a newly designed 100ml pack bearing a QR code. Suitable for sun sensitive, intolerant and atopic prone skin, the formula features a photo protectant system with anti UV rays plus a patented natural avocado perseose, said to reinforce skin barrier and preserve cellular richness of the skin from UV damaging rays. The clinically proven, hypoallergenic and water resistant product is tested under dermatological and paediatric control and is formulated to minimise the risk of allergic reactions and environmental impact. It is free from parabens, phthalates, phenoxyethanol, fragrance and alcohol.

Product Description

La Roche-Posay Anthelios Dermo-Pediatrics Enfants Spray Multi-Positions SPF 50+ (Children Multi-Positions Spray SPF 50+) has been relaunched with a new formula and a newly designed 125ml pack. Suitable for the sensitive skin of children, this easy to apply product features a non-greasy, non-sticky, water-resistant formula enriched with La Roche-Posay Thermal Water which is claimed to offer very high UVA/UVB protection. It has been paediatrician- and dermatologist-recommended and is free from fragrance and paraben, and has been nickel-tested.
