Draft Guidance on Lacosamide

This draft guidance, once finalized, will represent the Food and Drug Administration's (FDA's) current thinking on this topic. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. You can use an alternative approach if the approach satisfies the requirements of the applicable statutes and regulations. If you want to discuss an alternative approach, contact the Office of Generic Drugs.

Active ingredient: Lacosamide

Form/Route: Tablet; Oral

Recommended studies: 2 Options: BCS or In Vivo Studies

I. **BCS option:**

It may be possible to request waiver of in-vivo testing for all strengths of this product provided that the appropriate documentation regarding high solubility, high permeability and rapid dissolution as detailed in the Guidance for Industry: *Waiver of In Vivo Bioavailability and Bioequivalence for Immediate – Release Solid Oral Dosage Forms Based on the Biopharmaceutics Classification System* is submitted in the application. Information contained in the approved labeling of the reference product may be used. Peer reviewed articles may not contain the necessary details of the testing for the Agency to make a judgment regarding the quality of the studies. A decision regarding the acceptability of the waiver request can only be made upon review of the data submitted in the application.

II. **In Vivo option: 2 studies**

1. Type of study: Fasting
   Design: Single-dose, two-way crossover in vivo
   Strength: 200mg
   Subjects: Healthy males and non-pregnant females, general population
   Additional Comments:

2. Type of study: Fed
   Design: Single-dose, two-way crossover in vivo
   Strength: 200mg
   Subjects: Healthy males and non-pregnant females, general population
   Additional Comments: Please refer to the Amantadine Hydrochloride Tablet Draft Guidance for additional information regarding fed studies.

**Analytes to measure (in appropriate biological fluid):** Lacosamide

**Bioequivalence based on (90% CI):** Lacosamide in plasma

Recommended Jun 2012
Waiver request of in-vivo testing: 50mg, 100mg, and 150mg based on (i) acceptable bioequivalence studies on the 200mg strength, (ii) acceptable in vitro dissolution testing of all strengths, and (iii) proportional similarity of the formulations across all strengths.

Dissolution test method and sampling times:
Please note that a Dissolution Methods Database is available to the public at the OGD website at http://www.accessdata.fda.gov/scripts/cder/dissolution/. Please find the dissolution information for this product at this website. Please conduct comparative dissolution testing on 12 dosage units each of all strengths of the test and reference products. Specifications will be determined upon review of the application.
