

## Draft Guidance on Lutetium Dotatate Lu-177

This draft guidance, when finalized, will represent the current thinking of the Food and Drug Administration (FDA, or the Agency) on this topic. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations. To discuss an alternative approach, contact the Office of Generic Drugs.

<b>Active Ingredient:</b>	Lutetium dotatate Lu-177
<b>Dosage Form; Route:</b>	Solution; intravenous
<b>Strength:</b>	10 mCi/mL
<b>Recommended Study:</b>	Request for waiver of in vivo bioequivalence study requirements

---

### I. Waiver:

To qualify for a waiver from submitting an in vivo bioequivalence (BE) study on the basis that BE is self-evident under 21 CFR 320.22(b), a generic Lutetium dotatate Lu-177 10 mCi/mL product must be qualitatively (Q1)<sup>1</sup> and quantitatively (Q2)<sup>2</sup> the same as the Reference Listed Drug (RLD).

An applicant may seek approval of a drug product intended for parenteral use that differs from the RLD in preservative, buffer, or antioxidant provided that the applicant identifies and characterizes the differences and provides information demonstrating that the differences do not affect the safety or efficacy of the proposed drug product.<sup>3</sup>

---

<sup>1</sup> Q1 (Qualitative sameness) means that the test product uses the same inactive ingredient(s) as the RLD product.

<sup>2</sup> Q2 (Quantitative sameness) means that concentrations of the inactive ingredient(s) used in the Test product are within  $\pm 5\%$  of those used in the RLD product.

<sup>3</sup> 21 CFR 314.94(a)(9)(iii).
