Manage Designees

Note: The enrolled prescriber is responsible for all information entered and activities performed in the iPLEDGE REMS by all designees under their supervision.

A designee is a staff member in the prescriber’s office. An activated designee may perform some patient functions on behalf of the prescriber. A designee may support some of the enrolled prescribers in a multi-physician practice and will also have rights for any patient of a delegate prescriber. Each office staff designee will only need to enroll once, even if they support several prescribers. Also, if a prescriber is not activated in the iPLEDGE REMS website, neither the prescriber nor the designee can enroll a patient.

To add a designee, click on the Add Designee button.

To remove a designee, click the "Remove Designee" button at the bottom of the tile.
