PALYNZIQ® (pegvaliase-pqpz) may cause a severe allergic reaction (anaphylaxis) that may be life-threatening. You may experience a severe allergic reaction (anaphylaxis) right after you inject a dose of PALYNZIQ or at any time after you inject PALYNZIQ.

Stop injecting PALYNZIQ and call 911 or go to the closest emergency medical center if you have any of the following signs or symptoms:

- fainting (passing out)
- dizziness or lightheadedness
- sudden confusion
- trouble breathing or wheezing
- chest discomfort or chest tightness
- fast heart rate
- swelling of your face, lips, eyes, or tongue
- throat tightness
- flushed skin
- skin rash, itching, or raised bumps on skin
- nausea, vomiting, or diarrhea
- losing control of urine or stools

Use auto-injectable epinephrine as directed by your doctor.
