Marketed by Swedish Match USA Inc.

The Center for Tobacco Products of the Food and Drug Administration (FDA) has carefully considered the potential environmental effects of these actions and has concluded that these actions will not have significant impacts on the quality of the human environment. Therefore, environmental impact statements are not required.

Swedish Match USA Inc. wishes to continue marketing 20 nicotine pouch products in interstate commerce in the United States and submitted to FDA 20 premarket tobacco product applications to obtain marketing orders under the provisions of section 910(c) of the Federal Food, Drug, and Cosmetic Act.

The Agency prepared the programmatic environmental assessment (PEA), dated January 2, 2025, in accordance with FDA's regulations (21 CFR 25.40) implementing the National Environmental Policy Act to support the finding of no significant impact. The evidence supporting this finding is contained in the attached PEA, which is available to the public upon request.

The PEA evaluates potential environmental effects due to manufacturing, use, and disposal of the new products. No increased or new types of environmental effects due to manufacturing the new products are anticipated. The Agency does not foresee that use of the new products would result in new or different environmental effects. The Agency believes that the disposal of the new products is the same as the disposal conditions of other products that are currently marketed in the United States. Therefore, the Agency does not foresee significant impacts on the environment due to the proposed actions from manufacturing, use, and disposal of the new products.
